picture of the mechanisms by which the legacy of an historical figure may be perpetuated including the sometimes supra rational and imaginative dimensions of transmission **Visual Culture and Mathematics in the Early Modern Period**

Ingrid Alexander-Skipnes, 2017-01-06 During the early modern period there was a natural correspondence between how artists might benefit from the knowledge of mathematics and how mathematicians might explore through advances in the study of visual culture new areas of enquiry that would uncover the mysteries of the visible world This volume makes its contribution by offering new interdisciplinary approaches that not only investigate perspective but also examine how mathematics enriched aesthetic theory and the human mind The contributors explore the portrayal of mathematical activity and mathematicians as well as their ideas and instruments how artists displayed their mathematical skills and the choices visual artists made between geometry and arithmetic as well as Euclid's impact on drawing artistic practice and theory These chapters cover a broad geographical area that includes Italy Switzerland Germany the Netherlands France and England The artists philosophers and mathematicians whose work is discussed include Leon Battista Alberti Nicholas Cusanus Marsilio Ficino Francesco di Giorgio Leonardo da Vinci and Andrea del Verrocchio as well as Michelangelo Galileo Piero della Francesca Girard Desargues William Hogarth Albrecht Dürer Luca Pacioli and Raphael **Transformations of Time and**

Temporality in Medieval and Renaissance Art Simona Cohen, 2014-03-10 Although studies of specific time concepts expressed in Renaissance philosophy and literature have not been lacking few art historians have endeavored to meet the challenge in the visual arts This book presents a multifaceted picture of the dynamic concepts of time and temporality in medieval and Renaissance art adopted in speculative ecclesiastical socio political propagandist moralistic and poetic contexts It has been assumed that time was conceived in a different way by those living in the Renaissance as compared to their medieval predecessors Changing perceptions of time an increasingly secular approach the sense of self determination rooted in the practical use and control of time and the perception of time as a threat to human existence and achievements are demonstrated through artistic media Chapters dealing with time in classical and medieval philosophy and art are followed by studies that focus on innovative aspects of Renaissance iconography Everyday Objects Tara Hamling, Catherine Richardson, 2016-12-14 This book is about the objects people owned and how they used them Twenty three specially written essays investigate the type of things that might have been considered everyday objects in the medieval and early modern periods and how they help us to understand the daily lives of those individuals for whom few other types of evidence survive for instance people of lower status and women of all status groups Everyday Objects presents new research by specialists from a range of disciplines to assess what the study of material culture can contribute to our understanding of medieval and early modern societies Extending and developing key debates in the study of the everyday the chapters provide analysis of such things as ceramics illustrated manuscripts pins handbells carved chimneypieces clothing drinking vessels bagpipes paintings shoes religious icons and the built fabric of domestic houses and guild halls These things are examined in relation

to central themes of pre modern history for instance gender identity space morality skill value ritual use belief public and private behaviour continental influence materiality emotion technical innovation status competition and social mobility This book offers both a collection of new research by a diverse range of specialists and a source book of current methodological approaches for the study of pre modern material culture The multi disciplinary analysis of these everyday objects by archaeologists art historians literary scholars historians conservators and museum practitioners provides a snapshot of current methodological approaches within the humanities Although analysis of material culture has become an increasingly important aspect of the study of the past previous research in this area has often remained confined to subject specific boundaries This book will therefore be an invaluable resource for researchers and students interested in learning about important new work which demonstrates the potential of material culture study to cut across traditional historiographies and disciplinary boundaries and access the lived experience of individuals in the past New Activities For Cultural Heritage

Raphael's painting and illuminates major cultural shifts in attitudes toward nature and images in the Renaissance. More than simply an examination of a single artist or a single subject, Raphael's *Ostrich* offers an accessible, erudite, and charming alternative to Vasari's pervasive model of the history of sixteenth-century Italian art. *Italian Renaissance Frames at the V&A*, Christine Powell, Zoë Allen, Victoria and Albert Museum, 2010. An in-depth analysis of materials and techniques used on 40 of the V&A's most important Renaissance frames. It will enable the reader to recognise frame style, the design appropriate for the period, as well as additions or alterations and frames that have been made later but aged to look older. **"His Words Were Nourishment and His Counsel Food"**, Efrosini Camatsos, Tassos A. Kaplanis, Jocelyn Pye, 2014-05-02. *His Words were Nourishment and his Counsel Food*, A Festschrift for David W. Holton brings together essays on Greek literature from medieval romances to postmodern fiction. It provides an illuminating first insight into the variety of Modern Greek literature for the general reader while also catering to more specialised students and scholars with new research findings and close studies of individual texts. The editors and authors, all former doctoral students of Professor Holton at Cambridge, conceived this volume as a thanksgiving present to him on the occasion of his retirement and as a collection which reflects the high quality and significance of Modern Greek studies at the University of Cambridge. The essays explore themes ranging from the erotic gaze and nightingales to cannibalism and dictatorships. Individual contributions discuss the relationship of Greek works with French and Persian medieval romances, the Italian Renaissance, and German expressionism, and the influence of Shakespeare on the best-known Modern Greek poet, C. P. Cavafy. Others explore the interrelation of architecture and literature in the Cretan Renaissance masterpiece *Erotokritos*, the influence of religious texts on Roidis's *Pope Joan*, and the assimilation of Byzantium into Greek historiography by intellectuals of Greek Romanticism. On a more personal level, the reader will learn about the experiences of a British Victorian woman translator in 1880s Athens and the friendship between George Seferis and Sir Steven Runciman. Cretan cities figure in three essays which investigate the literary and historical context of the long Ottoman siege of Chandax in the seventeenth century and issues of identity in the modern-day lives of Chania's Greek and Turkish inhabitants. Shifting notions of identity are further explored in the contemporary Greek novels of an Albanian immigrant author. *His Words were Nourishment* demonstrates the remarkable capacity of Greek literature to thrive within the context of cultural exchange and shifting historical boundaries. *The Robert Lehman Collection, Volume XV: European and Asian Decorative Arts*, 1987. *Collecting Art in the Italian Renaissance Court*, Leah R. Clark, 2018-06-28. In this book, Leah R. Clark examines collecting practices across the Italian Renaissance court, exploring the circulation, exchange, collection, and display of objects. Rather than focusing on patronage strategies or the political power of individual collectors, she uses the objects themselves to elucidate the dynamic relationships formed through their exchange. Her study brings forward the mechanisms that structured relations within the court and, most importantly, also with individuals, representations, and spaces outside the court. The volume examines the courts of Italy through the wide variety of objects.
