

A SWIMMING DEVICE For M. Andrieu Gamonet of Lyons, France, swimming was too much work. Trying to cover a few hundred feet in the water was exhausting! His swimming device was the only way to travel.

This swimming device was made of rubber and inflated with air. It allowed the swimmer to float in the water in a comfortable sitting position. A handle (out of view in this illustration) turned a propeller in the rear. A swimmer could remain in the water all day, Gamonet stated, and never get out of breath.

This invention was made of wood, looked like an ordinary tree stump, and was intended for use in the forest. Harold L. Webb hoped his invention would be useful, but not in an obvious way.
