A Companion to Seals in the Middle Ages, 2019-02-11 A Companion to Seals in the Middle Ages is a cross disciplinary collection of fourteen essays on medieval sigillography It is organized thematically and it emphasizes important often cutting edge methodologies for the study of medieval seals and sealing cultures As the chronological temporal and geographic scope of the essays in the volume suggests the study of the medieval seal its manufacture materiality usage iconography inscription and preservation is a rich endeavour that demands collaboration across disciplines as well as between scholars working on material from different regions and periods It is hoped that this collection will make the study of medieval seals more accessible and will stimulate students and scholars to employ and further develop these material and methodological approaches to seals Contributors are Adrian Ailes Elka Cwiertnia Paul Dryburgh Emir O Filipovi Oliver Harris Philippa Hoskin Ashley Jones Andreas Lehnertz John McEwan Elizabeth A New Jonathan Shea Caroline Simonet Angelina A Volkoff and Marek L Wjcik

Seals and their Context in the Middle Ages Phillipp R. Schofield, 2015-01-08 Seals and their Context in the Middle Ages offers an extensive overview of approaches to and the potential of sigillography as well as introducing a wider readership to the range interest and artistry of medieval seals Seals were used throughout medieval society in a wide range of contexts royal governmental ecclesiastical legal in trade and commerce and on an individual and personal level The fourteen papers presented here which originate from a conference held in Aberystwyth in April 2012 focus primarily on British material but there is also useful reference to continental Europe The volume is divided into three sections looking at the history and use of seals as symbols and representations of power and prestige in a variety of institutional dynastic and individual contexts their role in law and legal practice and aspects of their manufacture sources and artistic attributes Importantly and distinctively the volume moves beyond the study of high status seals to consider such themes as the social and economic status of seal makers the nature and meaning including reflections of deliberate wit and boastfulness of specific motifs employed at various levels of society and the distribution of seals in relation to the location of for instance religious institutions and along major routeways In so doing it sets out ways in which sigillography can open new pathways into the study of non elites and their cultures in medieval society

Identifying the English Edward Higgs, 2011-10-06 Personal identification is very much a live political issue in Britain and this book looks at why this is the case and why paradoxically the theft of identity has become ever more

common as the means of identification have multiplied Identifying the English looks not only at how criminals have been identified branding fingerprinting DNA but also at the identification of the individual with seals and signatures of the citizen by means of passports and ID cards and of the corpse Beginning his history in the medieval period Edward Higgs reveals how it was not the Industrial Revolution that brought the most radical changes in identification techniques as many have assumed but rather the changing nature of the State and commerce and their relationship with citizens and customers In the twentieth century the very different historical techniques have converged on the holding of information on databases and increasingly on biometrics and the multiplication of these external databases outside the control of individuals has continued to undermine personal identity security **When Ego Was Imago** Brigitte Bedos-Rezak,2010-11-26 Twelfth century

individuals negotiated personal relationships along a continuum connecting rather than polarizing immediacy and mediated representation Their markers of individuation signs of identity and media of communication thus evidence practical engagement with contemporary medieval sign theory and perceptions of reality In this study the relevance of modern theory for the interpretation of medieval artifacts is shown to depend upon the parallel existence of theoretical activity by the producers and users of such artifacts In the cultural landscape of the central Middle Ages the axes of iconicity semantics and materiality traced by charters seals and by both concrete and metaphorical images of the imprint dynamically shaped the boundaries within which a sense of self was formulated modulated experienced and enacted Noblewomen, aristocracy and power in the twelfth-century Anglo-Norman realm Susan M. Johns,2013-07-19 This electronic version has been made available under a Creative Commons BY NC ND open access license The first major work on noblewomen in the twelfth century and Normandy and of the ways in which they exercised power Offers an important reconceptualisation of women's role in aristocratic society and suggests new ways of looking at lordship and the ruling elite in the high middle ages Considers a wide range of literary sources such as chronicles charters seals and governmental records to draw out a detailed picture of noblewomen in the twelfth century Anglo Norman realm Asserts the importance of the life cycle in determining the power of aristocratic women Demonstrates that the influence of gender on lordship was profound complex and varied

The Ideology of Burgundy Jonathan Boulton,Jan Veenstra,2006-07-01 This book is a collection of eight essays on the ideology of Burgundy dealing with the body of ideas images institutions and narrative fictions produced at the behest of the Valois dukes to create and maintain their incipient domanial state in the period from roughly 1364 to the 1560s Nation building requires an ideological framework and the successive dukes their officers and their court intellectuals all contributed to a self determinative image of Burgundy which became visible in their literature in their quest for a regal title in the foundation of the Order of the Golden Fleece and in their propaganda The essays approach the themes of the collection from the perspective of several disciplines and together present a well rounded picture of Burgundian nation building Contributors include D A J D Boulton Jan Dumolyn Malte Prietzel Graeme Small Robert Stein Bernhard Sterchi Jan R

Moving Women Moving Objects (400-1500) Tracy Chapman Hamilton, Mariah Proctor-Tiffany, 2019-08-12 This collection forges new ground in the discussion of aristocratic and royal women their relationships with their objects and medieval geography It explores how women's geographic and familial networks spread well beyond the borders that defined men's sense of region and how the movement of their belongings can reveal essential information about how women navigated these often disparate spaces Beginning in early medieval Scandinavia ranging from Byzantium to Rus and multiple lands in Western Europe up to 1500 the essays span a great spatio-temporal range Moreover the types of objects extend from traditionally studied works like manuscripts and sculpture to liturgical and secular ceremonial instruments icons and articles of personal adornment such as textiles and jewelry even including shoes **The Law's Two Bodies** John Baker, 2001-07-05 The common law is almost universally regarded as a system of case law increasingly supplemented by legislation but this is only partly true There is an extensive body of lawyers' law which has a real existence outside the formal sources but is seldom acknowledged or discussed either by theorists or legal historians This will still be so even when every judicial decision is electronically accessible In the heyday of the inns of court this second body of law was partly expressed in common learning a corpus of legal doctrine handed on largely by oral tradition and a system of education informing the mind of every common lawyer That common learning emanated from a law school in which the judges actively participated and in which the lecturers of one generation provided the judiciary of the next Some of it was written down though the texts were until recently forgotten and its importance was overlooked by historians as a result of changes in the common law system during the early modern period Other forms of informal law may be seen at work in other times and contexts Although judicial decisions will always remain prime sources of legal history as well as of law the other body of legal thought and practice is equally law in that it influences lawyers and has real consequences Neither the history nor the present working of the common law can be understood without acknowledging its importance *Leper Knights* David Marcombe, 2003 This book explores the important contribution of the English branch of the Order of St Lazarus which by 1300 managed a considerable estate from its chief preceptory at Burton Lazars in Leicestershire *The Ruler Portraits of Anglo-Saxon England* Catherine E. Karkov, 2004 The author argues that this series of portraits never before studied as a corpus creates a visual genealogy equivalent to the textual genealogies and regnal lists that are so much a feature of late Anglo-Saxon culture As such they are an important part of the way in which the kings and queens of early medieval England created both their history and their kingdom BOOK JACKET *Cultural Creativity in the Early English Renaissance* E. Salter, 2006-04-12 This book is about the

ways that ordinary people in town and country creatively define themselves their families and their social networks It explores inheritance strategies personal possessions attitudes to commemoration after death the daily fashioning of identity and the interactions between imagination and daily life **The Acts of Welsh Rulers, 1120-1283** Huw Pryce, 2010-10-15
Now republished with minor corrections this volume provides the first comprehensive collection of charters letters and other documents issued by native rulers of Wales from the early twelfth century to the Edwardian conquest of 1282 3 that extinguished independent rule
