*Guide to Modern Methods of Instrumental Analysis [Contributors: Edward M. Barrall II and Others]*. T. H. Gouw (ed), 1972

**Guide to Modern Methods of Instrumental Analysis** T. H. Gouw, 1972 The chemical researcher has a vast array of methods techniques and commercially available equipment at his disposal *Guide to Modern Methods of Instrumental Analysis* contains juxtaposed descriptions of the most widely used procedures for instrumental analysis thus providing the reader with the information necessary to understand the role of each technique in the solution of a particular problem to easily compare the different techniques to integrate two or more techniques for wider applications While theoretical material is included in conjunction with specific methods the majority of the twelve chapters reflect the strong practical background of most of the contributing authors Whether involved in academics or industry practicing chemists regularly confronted with analytical problems will find this up to date survey a convenient addition to their professional resources Graduate students in a variety of survey and specialized courses now have a comprehensive overview designed to stimulate a well rounded knowledge of the field Publisher *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1972 First multi year cumulation covers six years 1965 70 *U.S. Environmental Protection Agency Library System Book Catalog Holdings as of July 1973* United States. **Forensic and Environmental Detection of Explosives** Jehuda Yinon, 1999-09-09 *Forensic and Environmental Detection of Explosives* is the first comprehensive book on the detection of explosives It combines the two main fields of application Forensic detection of explosives the detection of hidden explosives in airfreight luggage vehicles and on suspects Environmental detection of explosives detecting on site explosives in soil and water of contaminated areas and the detection of landmines Dr Jehuda Yinon is a world renowned expert on the analysis of explosives and has served as consulting expert during the Oklahoma bombing trial where his previous book *Modern Methods and Applications in Analysis of Explosives* was quoted by both the prosecution and defense experts This new book

complements the author's previous book on the analysis of explosives. It includes the following features: Classifications of explosives, Explanations of the basic terms related to the detection of explosives, Vapor detection methods, Probing radiation methods, Tagging of explosives, Systems integration and performance testing, Detection of explosives in contaminated areas, Detection of landmines. This book is an ideal reference book for those working in forensic and law enforcement agencies concerned with the detection of hidden explosives as well as for environmental scientists dealing with explosives decontamination. The book is also recommended as a text book for graduate students in analytical environmental and forensic science.

Written by experts in their specialist fields, the series creates a unique service for the active research chemist, supplying regular critical in-depth accounts of progress in particular areas of chemistry. For over 80 years the Royal Society of Chemistry and its predecessor the Chemical Society have been publishing reports charting developments in chemistry which originally took the form of Annual Reports. However, by 1967 the whole spectrum of chemistry could no longer be contained within one volume, and the series Specialist Periodical Reports was born. The Annual Reports themselves still existed but were divided into two and subsequently three volumes covering Inorganic, Organic, and Physical Chemistry. For more general coverage of the highlights in chemistry, they remain a must. Since that time the SPR series has altered according to the fluctuating degree of activity in various fields of chemistry. Some titles have remained unchanged while others have altered their emphasis along with their titles; some have been combined under a new name, whereas others have had to be discontinued. The current list of Specialist Periodical Reports can be seen on the inside flap of this volume. As a spectroscopic method, Nuclear Magnetic Resonance (NMR) has seen spectacular growth over the past two decades, both as a technique and in its applications. Today, the applications of NMR span a wide range of scientific disciplines, from physics to biology to medicine. Each volume of Nuclear Magnetic Resonance comprises a combination of annual and biennial reports which together provide comprehensive coverage of the literature on this topic. This Specialist Periodical Report reflects the growing

volume of published work involving NMR techniques and applications in particular NMR of natural macromolecules which is covered in two reports NMR of Proteins and Acids and NMR of Carbohydrates Lipids and Membranes For those wanting to become rapidly acquainted with specific areas of NMR this title provides unrivalled scope of coverage Seasoned practitioners of NMR will find this an invaluable source of current methods and applications Specialist Periodical Reports provide systematic and detailed review coverage in major areas of chemical research Compiled by teams of leading authorities in the relevant subject areas the series creates a unique service for the active research chemist with regular in depth accounts of progress in particular fields of chemistry Subject coverage within different volumes of a given title is similar and publication is on an annual or biennial basis

**Practical Estuarine Chemistry** P. C. Head, 1985-05-23 Originally published in 1985 this book concentrates on the techniques and practicalities of data collection from the estuarine environment It is intended that the information presented will increase the reader's understanding of estuarine processes thus enabling him to devise sensible sampling programmes and to interpret the results once obtained
