Guide To Cleaner Technologies Organic Coating Removal:

Guide to Cleaner Technologies ,1994 *Guide to Cleaner Technologies* Douglas Williams,Paul Randall,1994-09-01
Identifies new approaches for pollution prevention in paint and other coating removal in such industries as autos aircraft
appliances defense material shipbuilding and wood products Addresses available technologies emerging technologies
pollution prevention strategy and benefits operating features application and limitations List of information sources Drawings
charts and figures *Guide to Cleaner Technologies* Douglas Williams,Paul Randall,1994-12 Describes cleaner technologies
that can be used to reduce emissions and wastes from paints and coatings applications Identifies potentially viable clean
technologies that can reduce emissions and waste generation through the use of modified paint and coating formulations or
application and curing techniques Provides resources for obtaining more detailed engineering and economic information
about these technologies Addresses available technologies emerging technologies and pollution prevention strategies List of
information sources Drawings charts and figures **Guide to Cleaner Technologies** United States. Environmental

Control of Airborne Chemical Hazards, Second Edition William Popendorf,2019-06-26 Are you a practicing occupational
hygienist wondering how to find a substitute organic solvent that is safer to use than the hazardous one your company is
using Chapter 6 is your resource Are you a new hygienist looking for an alternative technology as a nonventilation substitute
for an existing hazard Chapter 8 is your resource Are you looking for an overview of ventilation Chapters 10 and 11 are your
resource Are you an industrial hygiene student wanting to learn about local exhaust ventilation Chapters 13 through 16 are
your resource Are you needing to learn about personal protective equipment and respirators Chapters 21 and 22 are your
resources This new edition brings all of these topics and more right up to date with new material in each chapter including
new governmental regulations While many of the controls of airborne hazards have their origins in engineering this author
has been diligent in explaining concepts writing equations in understandable terms and covering the topics of non ventilation
controls both local exhaust and general ventilation and receiver controls at the level needed by most IHs without getting too
advanced Taken as a whole this book provides a unique comprehensive tool to learn the challenging yet rewarding role that
industrial hygiene can play in controlling airborne chemical hazards at work Most chapters contain a set of practice problems
with the solutions available to instructors Features Written for the novice industrial hygienist but useful to prepare for ABIH
certification Explains engineering concepts but requires no prior engineering background Includes specific learning goals
that differentiate the depth of learning appropriate to each topic within the fuller information and explanations provided for
each chapter Contains updated governmental regulations and abundant references Presents a consistent teaching philosophy
and approach throughout the book Deals with both ventilation and non ventilation controls **Monthly Catalog of United**

States Government Publications ,1999 **Monthly Catalogue, United States Public Documents** ,1994 *Industrial Hygiene Control of Airborne Chemical Hazards* William Pependorf,2006-05-15 Do you need guidelines for choosing a substitute organic solvent that is safer to use Do you need an effective cheap but perhaps temporary way to reduce exposures before you can convince your employer to spend money on a long term or more reliable solution Do you need information about local exhaust ventilation or personal protective equipment like respirators and gloves *Industrial Hygiene Control of Airborne Chemical Hazards* provides the answers to these questions and more Science based and quantitative the book introduces methods for controlling exposures in diverse settings focusing squarely on airborne chemical hazards It bridges the gap between existing knowledge of physical principles and their modern application with a wealth of recommendations techniques and tools accumulated by generations of IH practitioners to control chemical hazards Provides a unique comprehensive tool for facing the challenges of controlling chemical hazards in the workplace Although William Pependorf has written the book at a fundamental level he assumes the reader has some experience in science and math as well as in manufacturing or other work settings with chemical hazards but is inexperienced in the selection design implementation or management of chemical exposure control systems Where the book is quantitative of course there are lots of formulae but in general the author avoids vague notation and long derivations **Developments in Surface Contamination and Cleaning: Applications of Cleaning Techniques** Rajiv Kohli,K.L. Mittal,2018-11-27 *Developments in Surface Contamination and Cleaning Applications of Cleaning Techniques* Volume Eleven part of the *Developments in Surface Contamination and Cleaning* series provides a guide to recent advances in the application of cleaning techniques for the removal of surface contamination in various industries such as aerospace automotive biomedical defense energy manufacturing microelectronics optics and xerography The material in this new edition compiles cleaning applications into one easy reference that has been fully updated to incorporate new applications and techniques Taken as a whole the series forms a unique reference for professionals and academics working in the area of surface contamination and cleaning Presents the latest reviewed technical information on precision cleaning applications as written by established experts in the field Provides a single source on the applications of innovative precision cleaning techniques for a wide variety of industries Serves as a guide to the selection of precision cleaning techniques for specific applications Recycling and Reuse of Material Found on Superfund Sites Lawrence Smith,Jeffrey L.
