Quality Assurance and Certification in Ecotourism Rosemary Black, Alice Crabtree, 2007. Genuine ecotourism can have many positive impacts particularly the conservation of biodiversity and cultural heritage and the creation of economic opportunities for local communities. While promoting these it aims to eliminate negative impacts such as environmental degradation cultural commoditisation and playground effects. Unfortunately the concept is broadly misunderstood and its true definition is widely debated. It is often used as a marketing tool with some operators taking advantage of the ecotourism label to attract more business while behaving in environmentally irresponsible ways. This book considers the important topic of quality control and accreditation in ecotourism describing the mechanisms that can be implemented to ensure quality in all aspects of the industry namely protected areas businesses products and tour guides. *Costa Rica: The Complete Guide* James Kaiser, 2015-01-01.
