

DEFINITION OF QUALITY CONTROL

- Quality as defined by Juran is fitness for purpose or use. It refers to the features and characteristics of a product that bears on its ability to satisfy the needs of the consumer. Features like shape, dimension, composition, strength, workmanship , finish and colour.
- According to Broom, quality control is “systematic control of these variables encountered in manufacturing process which affect the excellence of the end product.”
- According to Alford and Beatty, quality control is “that technique or group of techniques of industrial management by means of which products of uniform acceptable quality are manufactured.”
