Rules, Games, and Common-pool Resources Elinor Ostrom, Roy Gardner, James Walker, 1994 The Levels of Action

Prehistoric Marine Resource Use in the Indo-Pacific Regions David Addison, Rintaro Ono, Alex Morrison, 2013-12-20 Although historic sources provide information on recent centuries archaeology can contribute longer term understandings of pre industrial marine exploitation in the Indo Pacific region providing valuable baseline data for evaluating contemporary ecological trends This volume contains eleven papers which constitute a diverse but coherent collection on past and present marine resource use in the Indo Pacific region within a human ecological perspective The geographical focus extends from Eastern Asia mainly Japan and Insular Southeast Asia especially the Philippines to the tropical Pacific Micronesia Melanesia and Polynesia and outlying sites in coastal Tanzania Indian Ocean and coastal California North Pacific The volume is divided thematically and temporally into four parts Part 1 Prehistoric and historic marine resource use in the Indo Pacific Region Part 2 Specific marine resource use in the Pacific and Asia Part 3 Marine use and material culture in the Western Pacific and Part 4 Modern marine use and resource management

Social Issues in Sustainable Fisheries Management Julie Urquhart, Tim G. Acott, David Symes, Minghua Zhao, 2014-01-20 This volume is an interdisciplinary mix of perspectives and studies on social issues in fisheries from a diverse range of case studies and research disciplines The case is made regarding the dearth of attention to socio cultural considerations which to date have been largely treated as an externality of fisheries policy It will be valuable to researchers and decision makers interested in understanding the social dimension of fisheries and provides a timely and relevant compilation of research and analysis on some of the critical socio cultural issues facing fisheries management and fishing communities today

Poverty Mosaics: Realities and Prospects in Small-Scale Fisheries Svein Jentoft, Arne Eide, 2011-07-15 Small scale fisheries are a major source of food and employment around the world Yet many small scale fishers work in conditions that are neither safe nor secure Millions of them are poor and often they are socially and politically marginalized Macro economic and institutional mechanisms are essential to address these poverty and vulnerability problems however interventions at the local community level are also necessary This requires deep understanding of what poverty means to the fishers their families and communities how they cope with it and the challenges they face to increase resiliency and improve

their lives for the better This book provides a global perspective situating small scale fisheries within the broad academic discourse on poverty fisheries management and development In depth case studies from fifteen countries in Latin America Europe South and Southeast Asia and sub Saharan Africa demonstrate the enormously complex ecological economic social cultural and political contexts of this sector Conclusions for policy making formulated as a joint statement by the authors argue that fisheries development poverty alleviation and resource management must be integrated within a comprehensive governance approach that also looks beyond fisheries The scientific editors Svein Jentoft and Arne Eide are both with the Norwegian College of Fishery Science Faculty of Biosciences Fisheries and Economics University of Troms Norway

Fishing Europe's Troubled Waters David Symes, 2023-03-31 Spanning the last 50 years of fisheries policy in Europe this book is the parting contribution and career spanning reflection from one of Europe's most renowned social scientists working in the field of fisheries management and policy The last 50 years have without doubt been the most turbulent years in the history of North Atlantic fisheries a turbulence brought about by the actions of fishers scientists and above all politicians It is a period of change that sees a radical redrawing of the political geography of fisheries globalisation of trade the development of fisheries management towards increasingly restrictive regulation and declining fish stocks The book explains why the bold but deeply flawed Common Fisheries Policy persistently failed to deliver its basic goal of sustainable fisheries The spotlight falls on the monolithic highly centralised command and control nature of the Policy that strives to apply a universal one size fits all approach thus creating a governing system wholly unsuited to the system to be governed out of kilter with preferred models of governance and disconnected from the practical realities of fishing as a livelihood in a challenging environment A final section on Brexit focuses on its halting progress from concept to reality the implications for the fisheries sector and the fateful final negotiations with the EU over the fisheries question Seeking to explain why the anticipated benefits for the UK industry failed to materialise attention is drawn to the misplaced political hubris over regaining sovereignty in areas like the North Sea This book will be essential reading for students scholars professionals and policymakers working on fisheries marine governance natural resource management environmental policy and the European Project

Marine protected areas: Food and Agriculture Organization of the United Nations, 2018-11-09 Building on work presented at the IUCN World Parks Congress WPC held in Australia in 2014 this document outlines experiences with aquatic protected areas PAs marine protected areas MPAs and protected areas in inland waters in the context of livelihoods and food security It provides a general overview of MPAs and reports on their interface with livelihoods and food security based on case studies in Africa Asia Latin America and Oceania It also synthesizes the papers conclusions and discusses the observed outcomes of aquatic PAs together with problems and solutions

Compliance with Decisions of the Dispute Settlement Bodies of the UN Convention on the Law of the Sea

Natalie Klein, Jack McNally, 2023-11-20 What happens after a judgment is delivered by a tribunal constituted under the UN Convention on the Law of the Sea In this ground breaking book all the decisions issued by the International Tribunal for the Law of the Sea or Annex VII arbitral tribunals are examined to determine what results transpired following the judgment or order The authors consider what compliance means and whether it has been achieved in UNCLOS dispute settlement We suggest what other outcomes have sometimes eventuated from UNCLOS dispute settlement and propose steps that may be taken to enhance judgment compliance **Fisheries, Quota Management and Quota Transfer** Gordon M.

Winder, 2017-07-11 This volume examines the impact of fish stock assessment and catch share arrangements in context through case studies and in terms of ecosystem economy and society It examines the rationalizing work of bio economic projects especially the institutionalization of individual transferable quota ITQ in fisheries what impact have they had on fisheries and fishers The contributing authors understand ITQ and quota management as bio economic projects that is as widely deployed but locally constituted projects that combine biological and economic logics to rationalize production and in this case fish Politicians and managers use these projects and the models that justify them to rationalize fisheries in favor of modern technology and for capital and species efficiency Aimed at a diverse interdisciplinary fisheries management readership and designed as a guide to issues emerging in any assessment of ITQ the book is a timely investigation of the origins and diverse experiences of ITQ projects including resistance to them attempts to develop fisheries management around them and experiences of the risks that come with them Now around forty years old ITQ has never been subject to the kind of comprehensive sustainability assessments once advocated by Elinor Ostrom let alone the full cost accounting of impacts at the national level that Evelyn Pinkerton recently called for **Fisheries Quota Management and Quota Transfer** offers multi disciplinary assessments of the effects of ITQ from scholars working in eight countries The book brings together scholars from anthropology economics geography sociology the history of science and marine environmental history to discuss experiences from fisheries in eight industrialized countries It considers cases from outside as well as inside the EU including ITQ pioneers New Zealand and Iceland The combination allows for an unprecedented international perspective on stock assessments and share allocation systems By emphasizing emerging becoming learning and transforming through knowledge the book conceives technology as a field of power and choice nevertheless dominated by managers through specific projects in specific contexts Individual chapters relate bio economic projects to separate theoretical literature an approach that facilitates multi disciplinary dialog **Elinor Ostrom and the Bloomington School of Political Economy**

Daniel H. Cole, Michael D. McGinnis, 2015-09-04 In addition to winning the 2009 Nobel Prize in Economic Sciences for her path breaking research on economic governance especially the commons Elinor Lin Ostrom also made important contributions to other fields of political economy and public policy This four volume compendium of papers written by Lin often with coauthors most notably her husband Vincent along with papers by others expanding on her work brings together

the strands of her entire empirical analytical theoretical and methodological research program Together with Vincent s important theoretical contributions they defined a distinctive Bloomington School of political economic thought Volume 2 examines Lin s work on the commons in which she demonstrated that in many cases local resource users can solve collective action problems through common property management regimes It comprises papers including some that are not well known related to and building on the findings of *Governing the Commons* 1990 Part I focuses on key attributes of biophysical resources and the institutions human communities have designed to govern them Part II shows how in various social and ecological circumstances different sets of institutions facilitate or impede the long run sustainability of resources Part III highlights Ostrom s first major research project on water resources in Southern California It was a topic she and her students returned to with the specific intention of gathering data more than 50 years worth for longitudinal analyses of combined institutional and ecological change In sum this volume contextualizes what is at present thought to be Lin s greatest legacy to social science the conditions under which resources can be sustainably managed over very long periods of time by the collective action of ordinary people beyond markets and states

Demographic change in Asian fishing communities - Drivers, outcomes and potential impacts Siar, S.V.; Kusakabe, K. (eds.), 2020-11-03 conducted by the Food and Agriculture Organization of the United Nations Demographic change in fishing communities has implications for the future of fishing fisheries the fishing industry and the social development of fishing communities in the Asian region This publication looks at demographic change in small scale fishing communities to understand potential implications for fisheries sustainability migration patterns climate change adaptation and livelihoods diversification The publication explores the general question How are fishing communities in the region changing with demographic changes Specifically the publication tries to address the following questions 1 What are the changes in demography ageing migration in selected Asian fishing communities 2 How are fishers adjusting their livelihoods with the changes in fishery resources and labour availability Are they moving to other livelihoods 3 What are the consequences of these adaptation strategies Are there any gender differences in the impact of such adaptation strategies 4 What are the challenges faced and policy and programme support needed for fishing communities for sustainable small scale fisheries

Energy Economics Peter M. Schwarz, 2017-08-14 With interest in topics such as climate change energy security and alternative energy sources being at an all time high the effects of today s decisions now rest on the shoulders of future generations There are no easy answers to our energy issues so costs and benefits must be considered when evaluating all energy alternatives alongside that prices must be right and need to reflect the full social costs to society of a given source of energy *Energy Economics* outlines the fundamental issues and possible solutions to the challenges of energy production and use and presents a framework for energy decisions based upon sound economic analysis It considers market forces and policy goals including economic prosperity environmental protection and other considerations that affect societal well being This book focuses on both energy choices and the impact of these choices

on market performance environmental conditions and sustainability The initial section covers the fundamental economic concepts for analyzing energy markets Following this a detailed analysis of established energy sources specifically fossil fuels and nuclear energy leads into consideration of energy alternatives such as renewable energy and next generation alternatives Electricity production and regulatory trends are covered in depth The final section considers policy environmental considerations sustainability and energy security The concluding chapter is a comprehensive vision for our energy future Drawing on current energy headlines perspectives familiar from the popular press and views outside economics this text sharpens students ability to understand evaluate and critique policy using appropriate economic analysis The text builds a foundation that culminates in a view of a comprehensive energy policy that improves upon the vacillations of past decades

Evolving Property Rights in Marine Fisheries Donald Leal, 2005 This book examines the development of property rights in marine fisheries and asks whether the obstacles to their continued development cannot be more easily overcome The contributed chapters generally focus on the consequences of a lack of property rights of commercial and small time fishers globally National governments have recognized that the absence of such rights coupled with the technological advances in commercial fishing have resulted in widespread economic and environmental problems e g overfishing bycatching highgrading increased physical dangers and lower profits The most significant solution to these problems and the predominate concern of this book is the institution of Individual Transferable Quotas ITQs also known as Individual Fishing Quotas IFQs These are national and global policies public and private sector managed allocations of the amount of various species of fish at certain qualities can be harvested at particular times by fishers

Polycentric Governance and Development Michael Dean McGinnis, 1999 How communities transcend the tragedy of the commons

Report of the FAO Vigo Dialogue on social responsibility in the fisheries and aquaculture value chains - Addressing current problems triggered by COVID-19. Food and Agriculture Organization of the United Nations, 2021-06-03 The 2020 FAO Vigo Dialogue focused on promoting human and labour rights to ensure better social practices along fisheries and aquaculture value chains including emphasizing social problems associated with the COVID 19 pandemic The main issues and challenges that the sector is facing were discussed and identified The Dialogue raised awareness of the situation faced by fish workers and the industry due to the pandemic and allowed FAO to collaborate with relevant stakeholders by providing a clear outline of the significant challenges on social issues in fisheries and aquaculture value chains

Food in a Changing Climate Alana Mann, 2021-02-15 Chapter 1 We didn't Start the Fire Chapter 2 Food under Fossil Capitalism Chapter 3 Framing the Future of Food Chapter 4 Changing our Water Ways Chapter 5 The Getting of Nutritional Wisdom Chapter 6 Resilience through Resistance

Elinor Ostrom Vlad Tarko, 2016-12-15 Elinor Ostrom was the first woman to win the Nobel Prize in economics She has been at the forefront of New Institutional Economics and Public Choice revolutions discovering surprising ways in which communities around the world have succeed in solving difficult collective problems She first rose to prominence by studying the police in

metropolitan areas in the United States and showing that contrary to the prevailing view at the time community policing and smaller departments worked better than centralized and large police departments Together with her husband Vincent they have set up the Bloomington Workshop in Political Theory and Policy Analysis which has grown into a global network of scholars and practitioners Throughout her career she was interested in studying ecological problems and understanding how people manage communal properties Her most famous discovery is that communities often find ingenious ways of escaping the tragedy of the commons Analysing a wide variety of successes and failures and working together with many other scholars she was able to uncover a series of institutional design principles a set of criteria which if followed societies are more likely to be productive and resilient to shocks Some of her most important theoretical insights about polycentricity and institutional evolution arose from this synthesizing effort Furthermore this led her to develop a framework for the study of the relationship between societies and their natural environment which brought institutional insights into the field of environmental studies
