Florida's Space Coast Wade Arnold,2009 Floridaas Space Coast is an area that got its name from one of the most exciting times in United States history Settlers were living in Brevard County as far back as the 1800s and even after World War II it was still a quiet place to live Cities and beach towns along 74 miles of Atlantic Ocean coastline were thrust into the modern age in the early 1950s when rockets began lighting up the skies above them By the end of that decade the space race had begun and the nation would set a path to put men on the moon The areaas population surged with over 200 000 new residents and things would never be the same It was a time when people risked their lives for space exploration and a community came together to make it happen Florida's Space Coast William B. Faherty,2024-03-05 An important interesting study of the relations between the Kennedy Space Center and the communities of Brevard County Florida Roger D Launius chief historian NASA Washington D C This outstanding book provides readers of Florida history our first insight into the impact that high technology has had on the state Brevard County is a veritable laboratory for understanding what happens when space science and engineering put down roots in a wilderness setting Faherty s writing is direct simple even folksy at times I devoured it Michael Gannon author of Pearl Harbor Betrayed and A Short History of Florida Florida s Space Coast tells the compelling story of America s half century in space exploration from the successful launch of the first two stage rocket in 1950 through the latest space shuttle missions of 2000 Told from the unique viewpoint of the people who built the Spaceport this book shows how the space program transformed the east central Florida coast from a traditional citrus production and tourist area to one of the most influential high tech centers in the nation Cape Canaveral was chosen as a missile launch site because of its many geographical advantages However in the early years of the space program the area was far from an ideal place for NASA employees to raise their families NASA brought in thousands of space related workers who besides sending machines and men into space had to meet the challenge of moving their families from urban environs to a rural southern county This book engagingly recounts the parallel stories of the establishment of America s space program
