narrative and a wealth of iconography Up until now there has been no history of architecture from the perspective of fish although there are counterparts for meat timber oil and many other industries Tavares provides a counternarrative to the traditional history of marine environments which tends to focus on water ecosystems and instead forms a bridge between what happens at sea and what happens on land The hope is that after reading this book readers will better understand life in the sea in relation to urban growth and terrestrial landscapes King Solomon and the Golden Fish Matilda

Duplicity in the Gilgamesh Flood Story Martin Worthington,2019-10-29 This volume opens up new perspectives on Babylonian and Assyrian literature through the lens of a pivotal passage in the Gilgamesh Flood story It shows how using a nine line message where not all was as it seemed the god Ea inveigled humans into building the Ark The volume argues that Ea used a bitextual message one which can be understood in different ways that sound the same His message thus emerges as an ambivalent oracle in the tradition of folktale prophecy The argument is supported by interlocking investigations of lexicography divination diet figurines social history and religion There are also extended discussions of Babylonian word play and ancient literary interpretation Besides arguing for Ea s duplicity the book explores its implications for narrative sophistication in Gilgamesh for audiences and performance of the poem and for the relation of the Gilgamesh Flood story to the versions in Atrahasis the Hellenistic historian Berossos and the Biblical Book of Genesis Ea s Duplicity in the Gilgamesh Flood Story will interest Assyriologists Hebrew Bible scholars and Classicists but also students and researchers in all areas concerned with Gilgamesh word play oracles and traditions about the Flood **Publishers' circular and booksellers' record** ,1891 *The Jewish Story Finder* Sharon Barcan Elswit,2012-08-10 Storytelling as oral tradition and in writing has

The Publishers' Circular and Booksellers' Record of British and Foreign Literature ,1901 The Economic Sources of Social Order Development in Post-socialist Eastern Europe

Richard Connolly,2013 Nearly twenty years after the collapse of socialism the countries of post socialist Eastern Europe have experienced divergent trajectories of political development This book looks at why this is the case based on the assumption that societies or social orders can be distinguished by the extent to which competitive tendencies contained within them economic political social and cultural are resolved according to open rule based processes The book explores which economic conditions allow for increased levels of political competition and it tests the hypothesis that the nature of a country s ties with the international economy and the level of competition within a country s economic system will shape the trajectory of political competition within that society The book goes on to argue that after several decades of relative bloc autarky during the socialist period the ongoing process of reintegration with the international economy across the post socialist region has resulted in distinct patterns of structural economic development and that that these patterns are of crucial importance in explaining the variation in social order type across the post socialist region By offering a more precise analysis of the causal mechanisms that link economic and political competition the book makes a useful contribution to research on the different patterns of political behaviour that have been observed across the post socialist region since the collapse of the socialist regimes
