Dow,2013-04-08 Teacher administrator Philip

Dow explores the implications of setting intellectual character rather than intellectual content at the heart of our educational programs With ample stories and practical suggestions Dow shows how intellectual virtues like tenacity carefulness and curiosity are teachable traits that can produce good lives **Fatigue in Cancer** Maryl Lynne Winningham,Margaret

Barton-Burke,2000 The study of fatigue as a major focus in clinical practice and research is relatively new but the editors argue that much more is known about it than most texts admit Here two dozen essays and interviews represent the perspectives of clinically oriented people who often go beyond the established **The 7 Most Important Equations for Your Retirement** Moshe A. Milevsky,2012-05-10 The 800 years of scientific breakthroughs that will help salvage your

retirement plans Physics Chemistry Astronomy Biology every field has its intellectual giants who made breakthrough discoveries that changed the course of history What about the topic of retirement planning Is it a science Or is retirement income planning just a collection of rules of thumb financial products and sales pitches In The 7 Most Important Equations

for Your Retirement And the Stories Behind Them Moshe Milevsky argues that twenty first century retirement income planning is indeed a science and has its foundations in the work of great sages who made conceptual and controversial breakthroughs over the last eight centuries In the book Milevsky highlights the work of seven scholars summarized by seven equations who shaped all modern retirement calculations He tells the stories of Leonardo Fibonnaci the Italian businessman Benjamin Gompertz the gentleman actuary Edmund Halley the astronomer Irving Fisher the stock jock Paul Samuelson the economic guru Solomon Heubner the insurance and marketing visionary and Andrey Kolmogorov the Russian mathematical genius all giants in their respective fields who collectively laid the foundations for modern retirement income planning With baby boomers starting to hit retirement age planning for retirement income has become a hot topic across the country Author Moshe Milevsky is an internationally respected financial expert with the knowledge you need to assess whether you are ready to retire or not Presents an entertaining informative narrative approach to financial planning Understanding the ideas behind these seven foundation equations which Moshe Milevsky explains in a manner that everyone can appreciate will help baby boomers better prepare for retirement This is a book unlike anything you have ever read on retirement planning Think Suze Orman meets Stephen Hawking If you ever wondered what the point of all that high school mathematics was Moshe Milevsky s answer is So that you can figure out how to retire while you can still enjoy your money *The Great Equations: Breakthroughs in Science from Pythagoras to Heisenberg* Robert P. Crease, 2010-01-18 Any reader who aspires to be scientifically literate will find this a good starting place Publishers Weekly While we may be familiar with some of science s greatest equations we may not know that each and every equation emerged not in Eureka moments but in years of cultural developments and scientific knowledge With vignettes full of humor drama and eccentricity philosopher and science historian Robert P Crease shares the stories behind ten of history s greatest equations from the first equation $1 = 1^2$ which promises a rational well ordered world to Heisenberg s uncertainty principle which reveals the limitations of human knowledge For every equation Crease provides a brief account of who discovered it what dissatisfactions lay behind its discovery and what the equation says about the nature of our world *The Psychology Research Handbook* Frederick T. L. Leong, James T. Austin, 2023-11-16 In the Third Edition of *The Psychology Research Handbook* editors Frederick T L Leong and James T Austin have assembled experienced expert researchers to provide graduate students and research assistants with a comprehensive framework for conducting many types of psychology research The book is organized around the idea of a research script following the step by step process of research planning design data collection analysis and disseminating research Many chapters are coauthored by advanced graduate students to give their fellow students a sense of real world research adding to the clarity and practicality of many chapters Students and instructors alike will appreciate chapters on topics typically missing from introductory methods texts including applying for research grants dealing with journal editors and reviewers working within research teams and conducting cross cultural research Structures such as recommended

readings and exercises guide students to develop and expand their research skills New chapters include Power and Evidence IRB as Critical Collaborators in Research Alternative Data Collection Strategies Structural Equation Modeling and Replicability and Reproducibility A comprehensive easy to understand guide to the entire research process this book quickly and efficiently equips advanced students and research assistants to conduct a full research project Block by Block, 2020

Pedagogies of the Imagination Timothy Leonard, Peter Willis, 2008-06-11 I have long admired the mythopoetic tradition in curriculum studies That admiration followed from my experience as a high school teacher of English in a wealthy suburb of New York City at the end of the 1960s A dream job I taught four classes of 15 20 students during a nine period day in a dream suburb where I could afford to reside only by taking a room in a retired teacher s house many of these often Ivy League bound students had everything but meaningful lives This middle class Midwestern young teacher was flabbergasted In one sense my academic life has been devoted to understanding that searing experience Matters of meaning seemed paramount in the curriculum field to which Paul Klohr introduced me at Ohio State Klohr assigned me the work of curriculum theorists such as James B Macdonald Like Timothy Leonard who also studied with Klohr at Ohio State and Peter Willis Macdonald 1995 understood that school reform was part of a broader cultural and political crisis in which meaning is but one casualty In the mythopoetic tradition in curriculum studies scholars labor to understand this crisis and the conditions for the reconstruction of meaning in our time in our schools

Information Age Tales Brad Bradford, 2011-08-30 Early in recorded human history the literacy rate was as low as one percent and reading materials were available to only the elite How times have changed In *Information Age Tales* author Brad Bradford chronicles these changes documenting how technology growth continues to change the world upsetting the balance of power on almost every continent *Information Age Tales* recaps the history of speech languages writing and memory and describes how these revolutions paved the way for today s age of cyberspace He shows how history may be repeating itself as knowledge sharing information technology such as Facebook and Twitter have a global effect Bradford presents an information technology trail that includes concepts such as the following Water monkeys may have been our ancestors Fearsome Mongol warriors played a positive role in the rise of Western Civilization Hindus in India and the Arabs unveiled long hidden numerical tools needed for modern science to emerge in the West Interchangeable parts appear more than four centuries before Eli Whitney won his historic patent to manufacture muskets with them *Information Age Tales* imparts stories revolving around the wonders of the written word and shows the role technology has played in the rise of past civilizations
