Five Orchestral Pieces Pelleas Und M:

Analyses of Nineteenth- and Twentieth-Century Music, 1940-2000 D. J. Hoek, 2007-02-15 The latest volume in the Music Library Association's Index and Bibliography series *Analyses of Nineteenth and Twentieth Century Music 1940-2000* features over 9 000 references to analyses of works by more than 1 000 composers of the nineteenth and twentieth centuries. References that address form, harmony, melody, rhythm, and other structural elements of musical compositions have been compiled into this valuable resource. This update of Arthur Wenk's well-known bibliography last published in 1987 includes all the original entries from that work along with additional references to analyses through 2000. International in scope, the bibliography covers writings in English, French, German, Italian, and other European languages and draws from 167 periodicals as well as important theses, dissertations, books, and *Festschriften*. References are arranged alphabetically by composer and include subheadings for specific works and genres. This bibliography provides students, scholars, performers, and librarians with broad coverage, detailed indexing, and ready access to a large and diverse body of analytical literature on nineteenth and twentieth century music.

Musics with and after Tonality Paul Fleet, 2021-12-30 This volume is a journey through musics that emerged at the turn of the 20th Century and were neither exclusively tonal nor serial. They fall between these labels as they are metatonal, being both with and after tonality in their reconstruction of external codes and gestures of Common Practice music in new and idiosyncratic ways. The composers and works considered are approached from analytic, cultural, creative, and performance angles by musicologists, performers, and composers to enable a deeper reading of these musics by scholars and students alike. Works include those by Frank Bridge, Ferruccio Busoni, Mikalojus Konstantinas iurlionis, Rebecca Clarke, John Foulds, Percy Grainger, Mary Howe, Carl Nielsen, Franz Schreker, Erwin Schulhoff, Cyril Scott, and Alexander Scriabin. In the process of engaging with this book, the reader will find an enrichment to their own understanding of music at the turn of the 20th Century.

Works Performed at the Symphony Concerts During the Season of ... Boston Symphony Orchestra, 1928 *Webern Studies* Kathryn Bailey, 1996-08-28 This collection of essays looks at the music of Webern from several different perspectives. Webern scholarship based on the sketches and other primary material now owned by the Paul Sacher Stiftung in Basel and the Library of Congress in Washington has emphasised Webern's lyricism, and this is a theme running through *Webern Studies*. Most of the essays are the result of work with primary material. The volume includes entries from Webern's diaries and all of the row tables for his twelve-note music. A comprehensive Webern bibliography covers thoroughly the period since Zoltan Roman's bibliography of 1978.

The Harvard Biographical Dictionary of Music Don Michael Randel, 1996 Biographical dictionary emphasizes classical and art music; also gives ample attention to the classics as well as jazz, blues, rock, and pop, and hymns and showtunes across the ages.

Musical News, 1906 *The Concepts of Criticism* L. Aschenbrenner, 2012-12-06 This inquiry may be thought of as a sequel to *The Concepts of Value* and as an extension of the brief core vocabulary of aesthetic concepts found in one of the appendices to it In terms of sheer numbers most of the value concepts of our language are to be found in the area of human relations and of the aesthetic There are also other value vocabularies shorter but equally important for example the cognitive and logical These and other objects of philosophical study for example the question of other minds deserve the kind of empirical survey that has been made of moral and aesthetic notions if only to test a priori approaches to them In the present study an even more determined empirical approach than that adopted for the first has been found necessary Once the moral or human value vocabulary has been identified sentential contexts for the use of the terms readily come to mind In a study of the language of criticism however the vocabulary has first to be sought in the utterances of critics themselves and quoted in sufficient context to make their critical intentions clear The outcome is that the present study is of great length about half of it being quotations from critics The rule adopted for arriving at this length go on collecting quotations as long as new types of appraisal came was to to light

Tales from the Symphony Robert Lee Watt, 2024-05-15 This book contains conversations with nineteen African American classical musicians currently performing or who have previously performed in America's major symphony orchestras Each chapter focuses on the story of one musician and sheds light on the realities of African American musicians

playing in a musical environment that absolutely forbade their membership over half a century ago These conversations explore the deeply ingrained prejudices that some hold against African American people in symphony orchestras conservatories and other musical institutions By amplifying these voices the book provides a variety of perspectives on the almost cloistered world of these beloved institutions The stories and lessons shared in this book will be invaluable to music students teachers and orchestral professionals *National Union Catalog* ,1983 International Who's who in Music and Musicians' Directory David M. Cummings,2000 First published in 2000 Routledge is an imprint of Taylor Francis an informa company *Eugene E. Simpson's Travels in Russia, 1910 and 1912* Eugene E. Simpson,1916 **New York Magazine** ,1995-10-30 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine s consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea *The Twelve-Note Music of Anton Webern* Kathryn Bailey,1991 This important new study reassesses the position of Anton Webern in twentieth century music The twelve note method of composition adopted by Anton Webern had profound consequences for composers of the next generation such as Stockhausen and Boulez who saw Webern s music as revolutionary In her detailed analyses however Professor Bailey demonstrates a fundamentally traditional aspect to Webern s creativity when describing his own music Professor Bailey analyses all Webern s twelve note works from Op 17 to Op 31 i e the instrumental and vocal music written between 1924 and 1943 These analyses draw on sketch material recently made available at the Paul Sacher Foundation in Basel and include transcriptions of little known drafts and sketches A most valuable aspect of the book is the inclusion in appendices of such materials as a complete explanation of the row content of each work the correct prime form of each of the rows from Op 20 onwards with a matrix constructed for each and exhaustive row analyses *Style and Idea* Arnold Schoenberg,1984 One of the most influential collections of music ever published Style and Idea includes Schoenberg s writings about himself and his music as well as studies of many other composers and reflections on art and society **Schwann** ,1989 *Church Music Review and Official Bulletin of the American Guild of Organists* ,1920
