Five Scenarios For The Year :

Five Scenarios for the Year 2000. Franco Ferrarotti, 1986-08-13 With the advent of a new millennium little more than a decade away Professor Ferrarotti has written a unique collection of futurological scenarios that stresses the importance of both the historical and a multi disciplinary approach The author draws attention to the political tension underlying technological innovation while heralding the anticipated appearance of a new ethos shaped by the exigencies of the new technological age Old fashioned individualism appears to be doomed acknowledges the author yet a new kind of socially oriented individualism could develop preserving that which is still vital in traditional values and influencing new socio psychological attitudes which are required by a technically advancing society **Hazardous Forecasts and Crisis**

Scenario Generator Arnaud Clément-Grandcourt, Hervé Fraysse, 2015-10-06 This book presents a crisis scenario generator with black swans black butterflies and worst case scenarios It is the most useful scenario generator that can be used to manage assets in a crisis prone period offering more reliable values for Value at Risk VaR Conditional Value at Risk CVaR and Tail Value at Risk TVaR Hazardous Forecasts and Crisis Scenario Generator questions how to manage assets when crisis probability increases enabling you to adopt a process for using generators in order to be well prepared for handling crises Evaluates risk oriented philosophy forecast risk oriented philosophy and its processes Features scenario building processes with an emphasis on main and extreme scenarios Discusses asset management processes using a generator methodology to avoid risk understatement and increase optimization **Farmer Cooperatives**, 1981 **Innovations in Circular**

Economy and Renewable Energy in Africa Mona-Maria Narra, Satyanarayana Narra, 2024-10-14 In many African countries access to electricity and modern energy fuels remains a significant concern Over 570 million people in Sub Saharan Africa still lack electricity and only 18% have access to modern cooking fuels The region faces immense challenges including massive debts lack of maintenance and system failures underscoring the urgent need for investment in the energy sector s transition Africa s overreliance on fossil fuels and the growing demand for energy driven by economic expansion and population growth could lead to sharp increases in greenhouse gas emissions Meanwhile urbanization economic activities and rising living standards are increasing waste production making waste management a pressing issue The absence of adequate waste treatment technologies financing and regulatory frameworks exacerbates this challenge Biomass remains a predominant energy source in Sub Saharan Africa often used in its raw state leading to health hazards from incomplete combustion However the continent s abundant agricultural residues and other energetic wastes offer a significant opportunity These can be transformed into various energy carriers helping to meet or supplement Africa s energy and fuel needs The current situation presents a unique opportunity for Africa to shift from a fossil based economy to a sustainable green economy Leveraging technology knowledge and skills can support this rapid transition and drive economic growth Innovations in Circular Economy and Renewable Energy highlights current advancements in waste management biomass
