*Paradoxes and Inconsistencies in the Law* Oren Perez, Gunther Teubner, 2005-12-13 Is law paradoxical This book seeks to unravel the riddle of legal paradoxes It focuses on two main questions the nature of legal paradoxes and their social ramifications In exploring the structure of legal paradoxes the book focuses both on generic paradoxes such as those associated with the self referential character of legal validity and the endemic incoherence of legal discourse and on paradoxes that permeate more restricted fields of law such as contract law euthanasia and human rights the prohibition of torture The discussion of the social effects of legal paradoxes focuses on the role of paradoxes as drivers of legal change and explores the institutional mechanisms that ensure the stability of the law in spite of its paradoxical makeup The essays in the book discuss these questions from various perspectives invoking insights from philosophy systems theory deconstruction and economics

Mindfulness and Educating Citizens for Everyday Life Malgorzata Powietrzynska, Kenneth Tobin, 2016-07-23 Mindfulness and Educating Citizens for Everyday Life invites readers to explore the role mindfulness can play in mediating how we enact social life in today's increasingly challenging and challenged world The educators and researchers who have contributed to this book use mindfulness as a lens to address and untangle what is becoming a profoundly complicated way of being within the reality of global capitalism Education is framed broadly the research transcends the walls of classrooms and includes museums nursing homes hospitals AA meetings and homes Hence the chapters feature participants occupying varied social positions and spaces that may be situated in different parts of the globe The authors address two overarching and dialectically related themes of mindfulness and wellness and collectively the chapters expand possibilities for readers to act mindfully in a world in which wellness and wellbeing are pervasive concerns as a fragile Earth adapts to a dynamic flux of human led changes that threaten the future of lifeworlds that support humanity and myriad species that face extinction The authors do not offer oversimplified solutions to dramatically switch direction and preserve life as we have known it Instead the ideas that emerge from the research presented in this volume expand possibilities for informed conduct self help and educating citizens with a goal of individuals and collectives transforming lifeworlds by embracing mindfulness saturated ontologies

Cause and Effect, Conditionals, Explanations Richard L Epstein, 2018-11-05 This series of books presents the fundamentals of reasoning well in a style accessible to both students and scholars The text of each essay presents a story the main line of development of the ideas while the footnotes and appendices place the research within a larger scholarly context The essays overlap forming a unified analysis of reasoning yet each essay is designed so that it may be read independently of the others The topic of this volume is the evaluation of reasoning about cause and effect reasoning using conditionals and reasoning that involves explanations The essay Reasoning about Cause and Effect sets out a way to analyze whether there is cause and effect in terms of whether an inference from a claim describing the purported cause to a claim describing the purported effect satisfies specific conditions Different notions of cause and effect correspond to placing different conditions

on what counts as a good causal inference An application of that method in The Directedness of Emotions leads to a clearer understanding of the issue whether every emotion need be directed at something In the essay Conditionals various ways of analyzing reasoning with claims of the form if then are surveyed Some of those uses are meant to be judged as inferences that are not necessarily valid and conditions are given for when we can consider such inferences to be good In Explanations verbal answers to a question why a claim is true are evaluated in terms of conditions placed on inferences from the explaining claims to the claim being explained Recognizing that the direction of inference of such an explanation is the reverse of that for an argument with the very same claims is crucial in their evaluation Explanations in terms of functions and goals are also investigated
