Rebecca Earle,2012-04-23 This fascinating history explores the dynamic relationship between overseas colonisation in Spanish America and the bodily experience of eating José Guadalupe Posada Y la Hoja Volante Mexicana Diane Helen Miliotes,José Guadalupe Posada,2006 These powerful and visually arresting newspaper illustrations and woodcut broadsides whose subjects range from news to religion from corridos escapades of bandits and heroes to calveras skeletal figures associated with the Day of the Dead reflect indigenous folk art traditions In his graphically powerful penny handbills Posada responded to the political and social issues of his day addressed cultural ills and spread moral ideas Focusing on the Art Institute of Chicago s impressive and previously unpublished collection of prints by Posada this book examines his work and places it in the larger context of Mexican printmaking in the late 19th and early 20th centuries **Secrets of Chilean Cuisine** Roberto Marin,2010-11-01 With this book Chilean master chef Robert Marin gives the tips and techniques of Chilean cooking for more than 100 recipes straight from his homeland The book also gives a quick lesson in pairing food with Chilean wine as well as an introductory primer on the history and influences of Chilean cuisine *Interface between Literature and Science* Victoria Carpenter,2015-05-13 The boundaries of science and literature are permeable they are continuously crossed and illuminated by a variety of narrative forms and their interpretations Changes in our perception of the world are informed in equal measure by scientific and humanistic disciplines This volume treats both literary and scientific texts as products of the human mind therefore abiding by all the rules it creates scientific and humanistic alike The volume does not propose to replace all literary or discourse analysis with a cross disciplinary science based approach but rather uses this theoretical stance when more conventional means fail to explain or even explore the intricacies of a text It argues that scientific discourse can also be analysed through the prism of literary theories since all texts are governed in varying measure by the unity of contexts that characterize their nature the process of their creation and their place in the cognitive realm of humanity This approach will allow the nature and limitations of scientific research to be questioned while opening up more venues to explore scientific creativity that crosses the subject boundaries of science and humanities Latin American literature offers many examples of the interconnection between literary and scientific discourse Notwithstanding the often explored relationship between Jorge Luis Borges s literary themes and contemporary scientific discoveries a more general question should be asked is the influence of scientific thought a privilege of the select few or is it indeed an all pervading experience in Latin American literary narrative from late modernism to present day This book explores the texts that overtly incorporate scientific content or are structured in such a way that immediately reminds the reader of a scientific phenomenon it will also examine the texts that are presented in such a way that a conventional literary analysis does not help penetrate the many narrative layers that the text comprises The volume offers cross disciplinary readings of such authors as Jorge Luis Borges Gabriel Garc a M rquez Ernesto S bato and Gustavo Sainz to name but a few The Theology of Food Angel F. Méndez-Montoya,2012-03-28 The links between religion and food have been known for centuries and yet we rarely
