Faultline Of Consciousness A View Of Interactionism In Sociology:

The Faultline of Consciousness David Maines, 2017-09-08 In this compendium of related and cross referential essays David R Maines draws from pragmatist symbolic interactionist assumptions to formulate a consistent new view of the entire field of sociology Suitable for courses in social theory qualitative methods social psychology and narrative inquiry this volume will change the way the general public looks at interpretive sociology This book is organized as an expression of the centrality of interactionism to general sociology Each chapter is designed to articulate this view of the field Symbolic interactionism the way Maines has come to understand and use it is essentially the concerted application of pragmatist principles of philosophy to social inquiry There are four basic elements to this characterization First people transform themselves people are self aware beings who reflexively form their conduct and thus are capable of adjusting their lines of action and creating new ones Second people transform their social worlds human action takes place in contexts of situations and social worlds People can modify the social matrices in which they act and thus people are agents of change Third people engage in social dialogue communication is generic and is at the heart of both stability and change A fourth element is that people respond to and deal with their transformations Humans construct situations and societies they establish social structures and cultures These are the consequences of human action and once formed they reflexively function to direct and channel conduct Maines argues that when people do things together they can create enduring group formations such as divisions of labor rules for inheritance wage labor relations or ideologies These are instances of group characteristics that influence human conduct and indeed are not reducible to the traits of individuals making up the group or society **The**

Faultline of Consciousness David R. Maines, 2001 In this compendium of related and cross referential essays David R Maines draws from pragmatist symbolic interactionist assumptions to formulate a consistent new view of the entire field of sociology Suitable for courses in social theory qualitative methods social psychology and narrative inquiry this volume will change the way the general public looks at interpretive sociology This book is organized as an expression of the centrality of interactionism to general sociology Each chapter is designed to articulate this view of the field Symbolic interactionism the way Maines has come to understand and use it is essentially the concerted application of pragmatist principles of philosophy to social inquiry There are four basic elements to this characterization First people transform themselves people are self aware beings who reflexively form their conduct and thus are capable of adjusting their lines of action and creating new ones Second people transform their social worlds human action takes place in contexts of situations and social worlds People can modify the social matrices in which they act and thus people are agents of change Third people engage in social dialogue communication is generic and is at the heart of both stability and change A fourth element is that people respond to and deal with their transformations Humans construct situations and societies they establish social structures and cultures These are the consequences of human action and once formed they reflexively function to direct and channel conduct Maines argues

that when people do things together they can create enduring group formations such as divisions of labor rules for inheritance wage labor relations or ideologies These are instances of group characteristics that influence human conduct and indeed are not reducible to the traits of individuals making up the group or society David R Maines is professor and chair of sociology and anthropology at Oakland University Rochester Michigan where he teaches courses on urban sociology and social stratification He was one of the founding members of the Society for the Study of Symbolic Interaction and in 1999 received the SSSI George Herbert Mead Award for lifetime contributions to scholarship

Performing Black Masculinity Bryant Keith Alexander, 2006-07-24 This is a remarkable set of linked essays on the African American male experience Alexander picks a number of settings that highlight Black male interaction sexuality and identity the student teacher interaction the black barbershop drag queen performances the funeral eulogy From these he builds a theory of Black masculine identity using auto ethnography and ideas of performance as his base

Challenging Myths of Masculinity Lee F. Monaghan, Michael Atkinson, 2016-04-15 Many myths surround male bodies and associated bodywork especially when such bodywork is labelled culturally or socially atypical or problematic Bodybuilding for example has been explained in terms of gender inadequacy and an Adonis complex akin to reverse anorexia while men electing to undergo aesthetic cosmetic surgery are deemed too concerned about their appearance and thus woman like Myths also discredit men and boys who do not engage in appropriate bodywork when this is expected For instance amidst public health concerns surrounding a so called obesity epidemic men and boys who resist physical activity and or attempts to promote a healthy weight are deemed ignorant apathetic and in need of correction Drawing on extensive field research conducted in North America and Britain over a twenty year period this book challenges such masculine myth making Mindful of a rich sociological tradition that seeks to understand the social world as lived and experienced the authors provide insights that are likely to challenge common perceptions of various groups of men and boys their diverse physical cultures shared ways of being and identities Presenting empirically grounded understandings of diverse bodily practices and discourses including bodybuilding cosmetic surgery dieting and nightclub security *Challenging Myths of Masculinity* will appeal to scholars of sociology geography and cultural studies with interests in gender embodiment and masculinities

Beyond Sociology's Tower of Babel Bernard S. Phillips, 2001 To look outside the discipline of sociology is to find little credibility given to the field as science Bernard Phillips argues that we are learning to see ever more clearly the contradiction between scientific standards and what in fact has been achieved by sociology Instead of knowledge based on the full range of our findings we have separate pieces of knowledge located within the diverse areas of the discipline and fads and fashions in the ideas and terms we use with relatively little cumulative development This has led many to question whether any scientific method can

be applied to human behavior If the arguments and alternative interpretations in this book on the problematic nature of sociology's use of scientific method prove to be credible and fruitful then the implications are profound For example the conclusions drawn for every single social science study that has ever been conducted would be open to reinterpretation because they fail to take into account systematically the enormous complexity involved within any given instance of human behavior Our present approach assumes implicitly that the pieces of the human jigsaw puzzle can at some point be put together so as to yield a coherent picture Yet as Phillips shows if each piece is itself deficient then no coherent picture emerges when we attempt to put the pieces together Refusing to take the current fragmentation of sociology as inevitable Phillips offers a clear vision through a series of heuristic web images of how sociologists might achieve the cumulative development and credibility that are the hallmarks of any science His research draws heavily on the works of classical and contemporary theorists philosophers and historians of science as well as on postmodernist critiques and responses to postmodernism This reconstruction will be useful for courses in method in the study of the classical tradition of sociology Bernard Phillips was introduced to sociology at Columbia University by C Wright Mills A former professor of sociology at Boston University cofounder of the ASA Section on Sociological Practice and founder of the Sociological Imagination Group his publications emphasize methodology and theory
