provides the following key outputs i development and implementation of an agreed methodology for estimating illegal fishing levels and progress ii information from case studies in three Asia Pacific countries and iii analysis of results from the agreed method estimating the incidence of illegal fishing and implication of efforts to reduce it The approach taken to achieve these goals included a structured online survey of fisheries officials in APFIC countries semi structured interviews of key informants knowledgeable about illegal fishing in the APFIC region and analysis of articles on illegal fishing from public media data across the APFIC area of competence
