Fisonomia Del Regionalismo Boliviano:

Fisonomía del regionalismo boliviano José Luis Roca, 2007 **Fisonomía del regionalismo boliviano** José Luis Roca, 1999 *Fisonomía del regionalismo boliviano* José Luis Roca, 1980 *Bolivia en la hora de su modernización* Mario Miranda Pacheco, 1993 Leading Bolivian intellectuals provide their interpretations of the many complex and contradictory facets of Bolivia's economic, political and societal experience with modernization and neoliberalism Handbook of Latin American Studies v 57 Narrativa del trópico boliviano Keith John Richards, 2004 *Economic Change and Rural Resistance in Southern Bolivia, 1880-1930* Erick Detlef Langer, 1989 In the late nineteenth century the disintegration of the silver mining economy that had survived since the colonial period effected fundamental economic and social changes in southern Bolivia. The changes took three forms: increased conflict between peasants and elites, expanded concentration of land into large estates, and worsened labor conditions among the peasants. This study concentrates on the four provinces in the department of Chuquisaca using them as case studies of how and why rural peoples adapted to and resisted the changes in their lives. Resistance took many forms: strikes, rebellions, insurrections, court challenges, banditry, and flight. In the reactions to change in these provinces, the author sees certain common characteristics that transcend the region and can be discerned in other parts of Latin America. On the basis of the Chuquisaca experience, he also questions the validity of current theories of peasant resistance and rebellion. The author describes the reactions of the oligarchy based in Sucre to the decline of silver as Bolivia's major export, showing how they attempted to regain their preeminent financial and political position by a number of strategies, notably the expansion of the hacienda system. This expansion gave rise to different problems in each of the four provinces: in Yamparaez, fierce resistance by the Indian communities to any changes; in Cinti, violent labor disputes brought on by the creation of enormous agro-industrial estates; in Azero, Indian attempts to escape debt peonage by migrating or by joining Franciscan missions; and in Tomina, widespread banditry. The final chapter compares and contrasts the various forms of rural resistance in the context of their social, economic and cultural foundations.

La permanente construcción de lo cruceño Paula Peña Hasbún, 2003 **Territory and Ideology in Latin America** Kent Eaton, 2017-05-26 Around the world, familiar ideological conflicts over the market are becoming increasingly territorialized in the form of policy conflicts between national and subnational governments. Thanks to a series of trends like globalization, democratization, and especially decentralization, subnational governments are now in a position to more effectively challenge the ideological orientation of the national government. The book conceptualizes these challenges as operating in two related but distinct modes. The first stems from elected subnational officials who use their authority, resources, and legitimacy to design, implement, and defend subnational policy regimes that deviate ideologically from national policy regimes. The second occurs when these same officials use their authority, resources, and legitimacy to question, oppose, and alter the ideological content of national policy regimes. The book focuses on three similarly situated countries in Latin America where these two types of policy challenges

met different fates neither challenge succeeded in Peru both succeeded in Bolivia and Ecuador experienced an intermediate outcome marked by the success of the first type of challenge i e the defence of a deviant neoliberal subnational policy regime and the failure of the second i e the inability to alter a statist national policy regime Derived from the in depth study of these countries the book s theoretical argument emphasizes three critical variables 1 the structural significance of the territory over which subnational elected officials preside 2 the level of institutional capacity they can harness and 3 the strength of the societal coalitions they can build both within and across subnational jurisdictions Transformations in Governance is a major new academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions down to subnational governments and side ways to public private networks It brings together work that significantly advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series targets mainly single authored or co authored work but it is pluralistic in terms of disciplinary specialization research design method and geographical scope Case studies as well as comparative studies historical as well as contemporary studies and studies with a national regional or international focus are all central to its aims Authors use qualitative quantitative formal modeling or mixed methods A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and Walter Mattli of the University of Oxford

Nosotros que nos queremos tanto Antonio Mitre, 2010 Ensayo que habla de la paradoja que existe en la trayectoria política de los países latinoamericanos y se refiere a los Estados de la región que pese a su frágil estructura interna han mantenido una notable continuidad en el tiempo sin experimentar fracturas territoriales aun existiendo enormes conflictos raciales guerras civiles o internacionales Este estudio busca verificar las posibilidades de que este curso pueda ser modificado con el auge de movimientos étnicos regionalistas en algunos países del continente Las conclusiones se fundamentan en el análisis de la experiencia boliviana en donde estos fenómenos se proyectan con particular intensidad y dramatismo

Entre la alianza y la confrontación Pilar Mendieta, 2010 El libro se propone analizar un hecho histórico concreto la rebelión indígena de Pablo Zárate más conocido como el Willka Esta rebelión fue sin lugar a duda una de las más importantes rebeliones indígenas de la historia de Bolivia El trabajo saca a la luz la historia del movimiento de los apoderados generales la lucha por la defensa de las tierras de comunidad y la alianza que durante el conflicto llamado Guerra federal de 1899 se entabló entre los apoderados al mando de Pablo Zárate y los liberales al mando de Jos Manuel Pando Abarca también la historia de los hechos acaecidos en Mohoza en el gobierno indígena de Peasas como las consecuencias de este gran movimiento indígena

Fairfield, 2015-03-05 Inequality and taxation are fundamental problems of modern times How and when can democracies tax economic elites This book develops a theoretical framework that refines and integrates the classic concepts of business s instrumental political power and structural investment power to explain the scope and fate of tax initiatives targeting economic elites in Latin America after economic liberalization In Chile business s multiple sources of instrumental power including cohesion and ties to right parties kept substantial tax increases off the agenda In Argentina weaker business power facilitated significant reform although specific sectors including finance and agriculture occasionally had instrumental and or structural power to defend their interests In Bolivia popular mobilization counterbalanced the power of economic elites who were much stronger than in Argentina but weaker than in Chile The book s in depth medium N case analysis and close attention to policymaking processes contribute insights on business power and prospects for redistribution in unequal democracies
