Bridger, 1998-09-01 Jointly hosted by the Ergonomics Society of South Africa ESSA and the International Ergonomics Association IEA this conference was attended by over 300 delegates and represented the largest and most prestigious gathering of eminent international ergonomists in the history of Africa It also marked the beginning of a revival in concern for the well being and productivity of people at work in South Africa The conference aimed to juxtapose two great ergonomic themes the under developed ethos of the affluent societies and the technologically advanced ethos of the most affluent societies The structure of the proceedings reflects this with the first section addressing the priorities of countries in transition and the last section addressing the priorities of the most industrially developed countries who have by and large long since solved the sorts of ergonomics problems currently of concern in the under developed world In between these in a roughly hierarchical arrangement from micro to macro levels of analysis are sections which collectively help span the whole field of ergonomics Section overviews are provided to outline the topics included in each section      The Interface John Harwood, 2011-11-15 In February 1956 the president of IBM Thomas Watson Jr hired the industrial designer and architect Eliot F Noyes charging him with reinventing IBM s corporate image from stationery and curtains to products such as typewriters and computers and to laboratory and administration buildings What followed a story told in full for the first time in John Harwood s *The Interface* remade IBM in a way that would also transform the relationships between design computer science and corporate culture IBM s program assembled a cast of leading figures in American design Noyes Charles Eames Paul Rand George Nelson and Edgar Kaufmann Jr *The Interface* offers a detailed account of the key role these designers played in shaping both the computer and the multinational corporation Harwood describes a surprising inverse effect the influence of computer and corporation on the theory and practice of design Here we see how in the period stretching from the invention of the computer during World War II to the appearance of the personal computer in the mid 1970s disciplines once well outside the realm of architectural design information and management theory cybernetics ergonomics computer science became integral aspects of design As the first critical history of the industrial design of the computer of Eliot Noyes s career and of some of the most important work of the Office of Charles and Ray Eames *The Interface* supplies a crucial
