Primary Mathematics: Teaching For Understanding Barmby, Patrick, Bilborough, Lynn, Harries, Tony, 2009-09-01 This book addresses the particular areas of mathematics within the primary curriculum that teachers find difficult to teach and in which children struggle to achieve. It begins with introductory sections on how children learn mathematics and is then organised on a subject area basis dealing with the teaching of particular maths topics. Key topics addressed include rounding and measuring means and medians, fractions, negative numbers, commutative and associative laws in number operations and shape and space. Within each chapter the authors examine the themes of representing reasoning and communicating, drawing out both the subject knowledge and ways of teaching each topic. A reference section for studies drawn upon is provided at the end of each chapter.

Consumer Behavior Analysis Donald A. Hantula, Victoria K. Wells, 2014-01-21 Consumption is the primary economic activity in our post industrial society. We are consumers not producers. Consumer behavior analysis is leading heterodox marketing scholarship and innovative applied behavioral work with much to offer both constituencies. This volume shows how consumer behavior analysis fits within a larger scale approach to marketing, consumer psychology, behavior analysis and organizational behavior management. Describing both theoretical analyses and empirical studies including laboratory experiments in e commerce, in store experiments in grocery shopping and an analysis of the counterfeit goods market, this book is a working example of translational research. It contains tools and studies to help understand contemporary consumer behavior particularly for those in marketing. Scholars will appreciate the theory and real world applications evident in each chapter when considering their own research direction. All students of marketing theory, behavior analysis and consumer choice will find this collection a thought provoking tool for further understanding of a new behavioral approach to marketing strategy, consumer decisions and marketing firms. This book comprises articles originally published in the Journal of Organizational Behavior Management.
