Five Epochs of Civilization William McGaughey, 2000 Based on the idea that communication technologies are a primary shaping force of civilizations Five Epochs of Civilization presents a new scheme of world history It identifies five epochs of historical experience and associates each with a civilization focused on particular institutions These are Civilization I focused on government ending in large political empires Civilization II focused on religion ending in the three world religions Civilization III focused on commerce and education within the nation state Civilization IV focused on the media of news and entertainment Civilization V focused on the internet and beyond The communication technologies which triggered these changes in culture and their approximate dates of introduction include ideographic writing 3100 B C alphabetic writing 800 B C printing 1450 A D electronic recording and broadcasting 1920 A D and computer networks 1990 A D McGaughey includes separate narratives for each of the four civilizations that have appeared to date in a developed form plus imaginative and plausible speculations concerning a possible fifth computer based civilization *The Axial Age and Its Consequences* Robert N. K. Venkatasubramanian, 2010 Recent scholarship on the history of music in South Asia has examined the processes by which music as an art form was reinvented for nationalist purposes yet the disciplined study of music and its aesthetics remains only a few centuries old Studying music through a historical lens has opened new approaches to interdisciplinary studies Music as History in Tamilnadu examines how history can be interpreted through aesthetics and music and vice versa Musicologists focus on the study of musical activity while ethnomusicologists examine this activity first hand using the field research methods of cultural anthropology The historian's task then is to interpret the musical past as part of cultural production and thereafter relate music to general historical trends This collection of essays seeks to establish the interdisciplinarity between music the Karnatak system and the history of Tamilnadu south India *The Queen of the South in Matthew 12:42* Soleilmavis Liu, 2013-12-26 The Bible prophesies the Queen of the South will rise at the judgment but did not give her name or any other detail about her The Queen of the South in Matthew 12:42 authored by Soleilmavis Liu is a strong and well reasoned piece that demonstrates who the Queen of the South is by using plenty of historical facts It lets readers understand where the Ends of the Earth are how the Queen of the South will come from the Ends of the Earth and what the judgment is Ultimately readers will come to know God's great plan regarding the Queen of the South However Satan and his followers will persecute her Soleilmavis hopes that her presentation sheds new light on this important person who will play a decisive role in the history This book is a step in that direction **Bioceramics, Biomimetic and Other Compatible Materials Features for Medical Applications** Stevo

International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences ,1999 **The Clash of Civilizations and the Remaking of World Order** Samuel P.

Huntington,2007-05-31 The classic study of post Cold War international relations more relevant than ever in the post 9 11 world with a new foreword by Zbigniew Brzezinski Since its initial publication The Clash of Civilizations and the Remaking of

World Order has become a classic work of international relations and one of the most influential books ever written about foreign affairs. An insightful and powerful analysis of the forces driving global politics, it is as indispensable to our understanding of American foreign policy today as the day it was published. As former National Security Adviser Zbigniew Brzezinski says in his new foreword to the book, it has earned a place on the shelf of only about a dozen or so truly enduring works that provide the quintessential insights necessary for a broad understanding of world affairs in our time. Samuel Huntington explains how clashes between civilizations are the greatest threat to world peace but also how an international order based on civilizations is the best safeguard against war. Events since the publication of the book have proved the wisdom of that analysis. The 9/11 attacks and wars in Iraq and Afghanistan have demonstrated the threat of civilizations but have also shown how vital international cross-civilization cooperation is to restoring peace. As ideological distinctions among nations have been replaced by cultural differences, world politics has been reconfigured. Across the globe, new conflicts and new cooperation have replaced the old order of the Cold War era. *The Clash of Civilizations and the Remaking of World Order* explains how the population explosion in Muslim countries and the economic rise of East Asia are changing global politics. These developments challenge Western dominance, promote opposition to supposedly universal Western ideals, and intensify intercivilization conflict over such issues as nuclear proliferation, immigration, human rights, and democracy. The Muslim population surge has led to many small wars throughout Eurasia, and the rise of China could lead to a global war of civilizations. Huntington offers a strategy for the West to preserve its unique culture and emphasizes the need for people everywhere to learn to coexist in a complex multipolar multicivilizational world. **America, History and Life**, 2003. Provides historical coverage of the United States and Canada from prehistory to the present. Includes information abstracted from over 2,000 journals published worldwide.
