Five Figure Tables Of Natural Trigonometrical Functions:

Six-Figure Tables of Trigonometric Functions L. S. Khrenov, 2014-06-16 THE PRESENT six figure trigonometric tables complete the series of tables of the natural values of the trigonometric functions published by Fizmatgiz Now that small computers have become very widely available almost all computations are carried out by machine and the majority of computational schemes are suited to this purpose The situation calls urgently for the availability of tables containing the natural values of all six trigonometric functions The following special factor emerges here In logarithmic computations the same relative accuracy is guaranteed more or less automatically for all values of the argument the number of correct significant figures in the result is either equal to or in rare cases one less than the number of significant figures in the mantissa of the logarithm In computations with natural values of the functions the same relative accuracy is guaranteed in practice for all arguments only by having a constant number of significant figures throughout the tables Until recently however tables of the natural values of the trigonometric functions have been compiled both in Russia and abroad with the same number of places after the decimal point which leads to a loss of accuracy when computing with functions of small angles In view of this there is an urgent need for tables of the natural values of the trigonometric functions with a constant number of significant figures which substantially guarantees roughly the same relative accuracy for all angles The present tables together with the following already published by Fizmatgiz Five figure Tables L S Khrenov 1954 Five figure Tables with the Argument in Time L S Khrenov 1954 Seven figure Tables L S Khrenov 1956 and Six figure Tables with the Argument in Time S A Angelov 1957 form a complete series with the same number of significant figures satisfying the main requirements of a wide variety of computers When compiling the present tables use was made for purposes of collation of the following tables of the natural values of the trigonometric functions The 1 figure Table of H Andoyer Paris 1915 1918 the Eight figure Table of J Peters Berlin 1939 the Seven figure Table of L S Khrenov 2nd ed Gostekhizdat 1956 the Seven figure Table of H C Ives and the Eight figure Tables of the Logarithm of Numbers and of the Trigonometric functions of J Bauschinger and J Peters Geodezizdat 1942 and 1944 Five-place Logarithmic and Trigonometric Tables Claude Irwin Palmer, Charles Wilbur Leigh, 1925 **Five-place Logarithms** George William Jones, 1896 *A Guide to Mathematical Tables* N. M. Burunova, A. V. Lebedev, R. M. Fedorova, 2014-05-09 A Guide to Mathematical Tables is a supplement to the Guide to Mathematical Tables published by the U S S R Academy of Sciences in 1956 The tables contain information on subjects such as powers rational and algebraic functions and trigonometric functions as well as logarithms and polynomials and Legendre functions An index listing all functions included in both the Guide and the Supplement is included Comprised of 15 chapters this supplement first describes mathematical tables in the following order the accuracy of the table that is the number of decimal places or significant figures the limits of variation of the argument and the interval of the table and the serial number of the book or journal in the reference material The second part gives the author title publishing house and date and place of publication for

books and the name of the journal year of publication series volume and number page and author and title of the article cited for journals Topics range from exponential and hyperbolic functions to factorials Euler integrals and related functions Sums and quantities related to finite differences are also tabulated This book will be of interest to mathematicians and mathematics students *The History of Mathematical Tables* Martin Campbell-Kelly,2003-10-02 This book contains a series of articles summarizing the technical institutional and intellectual history of mathematical tables from earliest times until the late 20th century when the electronic spreadsheet changed the way information is processed Five-place Logarithmus George William Jones,1915 *Machinery* Fred Herbert Colvin,Lester Gray French,1917 *Machinery* ,1917
