Five Lectures On Reincarnation:

Five Lectures on Reincarnation Swami Abhedananda, 2022-09-16 In *Five Lectures on Reincarnation* Swami Abhedananda explores the profound philosophical and spiritual implications of reincarnation through a series of engaging lectures. Written in the late 19th century, this text exemplifies Abhedananda's eloquent and accessible literary style, drawing on both Eastern and Western thought. The work situates reincarnation within broader discussions of consciousness, identity, and the eternal soul, serving as a bridge between various intellectual traditions. Abhedananda meticulously parses scientific, metaphysical, and spiritual perspectives, making compelling arguments for the reality of reincarnation as a mechanism for soul growth and evolution. Swami Abhedananda was a prominent disciple of the renowned mystic Ramakrishna and an influential figure in the spread of Vedanta philosophy in the West. His extensive travels and experiences studying various spiritual traditions undoubtedly informed his insights on reincarnation. Abhedananda's lifelong commitment to uplifting humanity through spiritual knowledge captures the zeitgeist of the early 20th century, an era marked by a burgeoning interest in Eastern spirituality among Western audiences. This book is highly recommended for readers interested in metaphysics, spirituality, and comparative religion. Abhedananda's lucid presentation makes this complex subject accessible, inviting contemplation on the nature of life, death, and the soul's journey through multiple lifetimes. His scholarly yet approachable style ensures that both novices and seasoned scholars will find profound meaning in his teachings. *Vedanta Philosophy* Swami

Abhedananda, 2004-10 The visible phenomena of the universe are bound by the universal law of cause and effect. The effect is visible or perceptible, while the cause is invisible or imperceptible. The falling of an apple from a tree is the effect of a certain invisible force called gravitation. Although the force cannot be perceived by the senses, its expression is visible. All perceptible phenomena are but the various expressions of different forces which act as invisible agents upon the subtle and imperceptible forms of matter. These invisible agents or forces, together with the imperceptible particles of matter, make up the subtle states of the phenomenal universe. When a subtle force becomes objectified, it appears as a gross object. Therefore, we can say that every gross form is an expression of some subtle force acting upon the subtle particles of matter. The minute particles of hydrogen and oxygen, when combined by chemical force, appear in the gross form of water. Water can never be separated from hydrogen and oxygen, which are its subtle component parts. Its existence depends upon that of its component parts, or in other words, upon its subtle form. If the subtle state changes, the gross manifestation will also change. The peculiarity in the gross form of a plant depends upon the peculiar nature of its subtle form, the seed. *Five Lectures on Reincarnation* Swami
