Five Roads to Nordic Security Johan Jørgen Holst, 1973 **Security in Northern Europe** John Andreas Olsen, 2019-03-04 NATO's Northern members are increasingly concerned about Russia's military activities This Whitehall Paper contains perspectives from prominent authors across the region showing how member states are responding individually and collectively to Moscow's resurgence Overall it identifies the common but differentiated responsibility that member states have for security in the Alliance's northern regions **Foreign Policies Of Northern Europe** Bengt Sundelius, 2019-04-05 This cross national treatment of the foreign policies of Northern Europe Denmark Finland Iceland Norway Sweden is organized by substantive policy areas rather than by country thus allowing most similar case analyses of several dimensions of the countries international relations The authors make comparisons among the countries in each area of investigation and present details of security international development and neighborhood and foreign policy processes They also describe and explain international and domestic forces that shape the region's external policies The combination of sound empirically based data and attention to broader international and theoretical interests allows relevant comparisons with other advanced industrial states Handbook of Nordic Cooperation Nina Græger, Ruth Hemstad, Peter Nedergaard, Peter Stadius, 2025-09-10 This illuminating Handbook explores transnational Nordic cooperation from a broad historical and political perspective It examines the entangled and variegated history of Nordic collaboration from early civil society initiatives to comprehensive official cooperation as well as responses to recent challenges such as defence and foreign policy Denmark in International Affairs Henrik Holtermann, 1997 **Library of Congress Catalogs** Library of Congress, 1976 **International Crisis Management** Marc Houben, 2004-11-23 Over the past fifty years crisis management has become essential to achieving and maintaining national security This book offers a comparative analysis of the preconditions and constraints nine European states place on their participation in international crisis management operations and the important consequences of such decisions and provides a theoretical framework to help the reader understand this complex decision making process Library of Congress Catalog Library of Congress, 1974-07 Beginning with 1953 entries for Motion pictures and filmstrips Music and phonorecords form separate parts of the Library of Congress catalogue Entries for Maps and atlases were issued separately 1953 1955 **Yearbook of Finnish Foreign Policy**, 1976

Countries establish defence industries for various reasons Chief among these are usually a concern with national security and a desire to be as independent as possible in the supply of the armaments which they believe they need But defence industries are different from most other industries Their customer is governments Their product is intended to safeguard the most vital interests of the state The effectiveness of these products in the real rather than the experimental sense is not normally tested at the time of purchase If or when it is tested many other factors such as the quality of political and military leadership enter into the equation so complicating judgments about the quality of the armaments and about the reliability of the promises made by the manufacturers All of these features make the defence sector an unusually political industrial sector This has been true in both the command economies of the former Soviet Union and its satellites and in the market or mixed economies of the west In both cases to speak only a little over generally the defence sector has been particularly privileged and particularly protected from the usual economic vicissitudes In both cases too its centrality to the perceived vital interests of the state has given it an unusual degree of political access and support *Scandinavian Government and Politics* Robert Barthel Kvavik,1984 Subject Guide to Books in Print ,1996

Monographic Series Library of Congress,1974 NATO in the Post-Cold War Era S. Papascoma,M. Heiss,2016-04-30

Established in 1949 the North Atlantic Treaty Organization NATO performed its assigned mission exceedingly well as it secured peace for its member states and avoided military confrontation between the superpowers during the remaining four decades of the Cold War But with the dramatic changes that began in 1989 an identity crisis has plagued NATO Whereas the Cold War years had essentially defined who would be fighting whom in a future conflict the uncertain post 1989 years are introducing new and possibly calamitous variables Despite the fact that hardly a voice has been heard calling for its dissolution and that states from the former Warsaw Pact are seeking membership NATO s members face the demanding task of defining the new strategic challenges and formulating appropriate policies and responses The articles in this volume combine to present a comprehensive investigation of the diverse problems confronting NATO The contributions each provide relevant historical background before analyzing current conditions and projecting into the future An opening essay offers an overview of NATO after forty five years and is followed by others dealing with NATO s structural changes for the 1990s NATO s shifting strategy and NATO s developing connections with other international organizations such as the United Nations CSCE and the European Community The concluding part of the volume includes essays focusing on NATO s associations with the United States the Anglo American special relationship the Balkans the former Warsaw Pact states and the Middle East
