Fixing Columbine The Challenge To American Liberalism:

Fixing Columbine Doriane Lambelet Coleman, 2002 *Fixing Columbine* uses the 1999 school shootings at Columbine High School in Littleton Colorado as a metaphor for the much larger and largely silent epidemic of childhood dysfunction that has swept the nation in the last thirty years claiming as its victims approximately 15 to 25 million American children annually Using both a child development lens and comparative analysis the book first describes the causes of the epidemic which include for the affected children absent adults toxic media exposures dysfunctional peers and an anti social educational environment It then tackles the question how to fix it The book argues that classical liberal principles as represented in the constitutional doctrines of parental autonomy and free speech simultaneously enabled the epidemic and impede the most obvious law based solutions It concludes with a partial answer in the public schools as they perform their original and still salient communitarian function

Bootstrap New Urbanism Joseph A. Rodriguez,2014-08-26 Joseph A Rodriguez critically examines the urban design and revitalization initiatives undertaken by both the government and the people of Milwaukee Wisconsin In the 1990s New Urbanists followed a city tradition of using urban design to solve problems while seeking to elevate the city s national reputation and status While New Urbanism was not the only design element undertaken to further Milwaukee s redevelopment the elite focus on New Urbanism reflected an attempt to fashion a self help narrative for the revitalization of the city This approach linked New Urbanist design to the strengthening of grassroots community organizing and volunteerism to solve urban problems

Bootstrap New Urbanism Design Race and Redevelopment in Milwaukee uncovers a practice with implications for urban history architectural history planning history environmental design ethnic studies and urban politics

The Bully Society Jessie Klein, 2013-08 Choice's Outstanding Academic Title list for 2013 Through interviews and case studies Klein develops an explanation for bully behavior in America's schools In today's schools kids bullying kids is not an occasional occurrence but rather an everyday reality where children learn early that being sensitive respectful and kind earns them no respect Jessie Klein makes the provocative argument that the rise of school shootings across America and childhood aggression more broadly are the consequences of a society that actually promotes aggressive and competitive behavior The Bully Society is a call to reclaim America's schools from the vicious cycle of aggression that threatens our children and our society at large Heartbreaking interviews illuminate how both boys and girls obtain status by acting masculine displaying aggression at one another's expense as both students and adults police one another to uphold gender stereotypes Klein shows that the aggressive ritual of gender policing in American culture creates emotional damage that perpetuates violence through revenge and that this cycle is the main cause of not only the many school shootings that have shocked America but also related problems in schools manifesting in high rates of suicide depression anxiety eating disorders self-cutting truancy and substance abuse After two decades working in schools as a school social worker and professor Klein proposes ways to transcend these destructive trends transforming school bully societies into compassionate communities

Guided by the relational developmental systems metatheory the chapters in the volume are ordered them in a manner that begins with the near proximal contexts in which children find themselves and moving through to distal contexts that influence children in equally compelling if less immediately manifest ways The volume emphasizes that the child s environment is complex multi dimensional and structurally organized into interlinked contexts children actively contribute to their development the child and the environment are inextricably linked and contributions of both child and environment are essential to explain or understand development Understand the role of parents other family members peers and other adults teachers coaches mentors in a child s development Discover the key neighborhood community and institutional settings of human development Examine the role of activities work and media in child and adolescent development Learn about the role of medicine law government war and disaster culture and history in contributing to the processes of human development The scholarship within this volume and as well across the four volumes of this edition illustrate that developmental science is in the midst of a very exciting period There is a paradigm shift that involves increasingly greater understanding of how to describe explain and optimize the course of human life for diverse individuals living within diverse contexts This Handbook is the definitive reference for educators policy makers researchers students and practitioners in human development psychology sociology anthropology and neuroscience

Edwards, 2011-01-16 *Educational Change From Traditional Education to Learning Communities* outlines the transition of curriculum and instruction as well as classroom discipline historically Various discipline approaches are described that vary in their applications in terms of the degree of teacher control and student self direction Various issues are identified which impact decorum in the schools in particular the No Child Left Behind Act and associated standardized testing The need for change in the schools is detailed along with the appropriateness of moving from traditional classroom instruction to democratic discipline as applied in learning communities The nature of classroom discipline is described in connection with specific components of learning communities When learning communities are employed in school the leadership structures needs to be changed The nature of relationships between school learning communities and communities outside the school are also described This book explains how the learning community approach to education can be successfully implemented with the modifications that will be required of both teachers and students in making associated changes **The Relationship Rights of Children** James G. Dwyer, 2006-04-17 This book presents a sustained theoretical analysis of what rights children should possess in connection with state decision making about their personal relationships which the state does in numerous aspects of family law including paternity adoption custody and visitation termination of parental rights and grandparent visitation It examines the nature and normative foundation of adults rights in connection with relationships among themselves and then assesses the extent to which the moral principles underlying adults rights apply also to children It concludes that the law should ascribe to children rights equivalent though not identical to those which adults enjoy and this would require substantial changes in the way the legal system treats children including a reformation of the rules for establishing legal parent child relationships at birth and of the rules for deciding whether to end a parent child relationship *American Book Publishing Record* ,2002 *Michigan Law Review* ,2002 *The North Carolina Historical Review* ,2003 **Current Publications in Legal and Related Fields** ,2003 Between Self-improvement and Self-destruction Jeremy Daniel Kaye, 2008 *The AALS Directory of Law Teachers* ,2007
