**Napalm** Robert M. Neer, 2013-04-01 Napalm was invented on Valentine's Day 1942 at a secret Harvard war research laboratory. It created an inferno that killed over 87,500 people in Tokyo more than died in the atomic explosions at Hiroshima or Nagasaki and went on to incinerate 64 Japanese cities. The Bomb got the press but napalm did the work. Robert Neer offers the first history. *Burning Japan* DANIEL T. SCHWABE, 2015-01-01 Burning Japan is an investigation of how and why the air force shifted its tactics against Japan from a precision bombing strategy to area attacks. The guiding doctrine of the 1930s and 1940s called for focused attacks on specific targets deep behind enemy lines. Eager to prove itself the nascent Army Air Force at first lauded the indispensability of strategic bombardment in areas otherwise unreachable by the army or navy. But when strategic bombing failed to yield the desired results in Europe and in initial efforts against Japan the United States switched tactics a shift that culminated in the area firebombing of nearly every major Japanese metropolis and the burning of sixty-six cities to the ground. Air Power and Warfare Elwood L. White, 2002 This highly selective bibliography supplements the original bibliography developed in 1978 by Ms Betsy C Kysely to support the Eighth Military History Symposium. While this bibliography focuses primarily on materials published since the earlier bibliography was developed it does include some significant materials that were published prior to 1978 but that were omitted from that edition. Emphasis in this supplement is on scholarly analysis of air power itself and scholarly depictions of its history. Like most editions of the United States Air Force Academy Directorate of Libraries publication Special Bibliography Series this compilation is limited to current holdings of the Academic Library at the Academy. It includes books, reports, government documents and journal articles. Excluded are pictorial works, newspaper articles, works of fiction, studies of the technology of aircraft and associated weaponry and items focused on the general history of aviation. Readers wanting information on the history of aviation certainly prior to the Wright Brothers are encouraged to consult the U S Air Force Academy Friends of the Library publication *The Genesis of Flight*. The Aeronautical History Collection of Colonel Richard Gimbel. **The Emptiness of Japanese Affluence** Gavan McCormack, Norma Field, 2016-07-08 This work aims to show that Japan even at its height of success while the successful version of capitalism was blighted at its core being unsustainable. This revised edition features an introduction which gives an analysis of Japan's contemporary crisis. **The Emptiness of Affluence in Japan** Gavan McCormack, 2019-07-23 Against the powerful image of Japan as a rising economic superpower or even in Ezra Vogel's influential formulation a decade ago Japan as number 1 this book explores the fragility, hubris and human and environmental costs of Japan's desperate drive for hyperdevelopment. As this economic superpower finds itself drifting rudderless through the decade four seminal events seem to emblemise the enveloping crisis: the Kobe Earthquake which the author shows to be no mere act of nature but an event whose consequences are intimately bound up with desperate hypergrowth; the Aum Rikyo poison gas attack which struck at Japan's sense of security in its deepest senses psychological and moral as well as physical; the collapse of the LDP single

party rule after nearly 40 years plunging Japan's superstable political system into crises manifested by implausible coalition with little more than a thirst to rule in common and Japan's inability to come to terms with war responsibility ever after 50 years best symbolised by the Comfort Women issue and the government's hapless attempt to come up with an appropriate formula for recognising, apologising and making amends for wartime aggression and crimes. Gavan McCormack addresses these issues which are political, economic, social, cultural and moral in the most profound sense directly in this book.

**Special Bibliography Series**, 1957      **Area Bibliography of Japan** Ria Koopmans-de Bruijn, 1998 Provides a general overview of literature relating to Japan and covers a broad range of subject matter from art, feminism and linguistics to corporate culture, history and medicine. Includes books published since 1980 that are related to the geographical area of Japan and to Japanese culture within that area.      Flames Over Tokyo E. Bartlett Kerr, 1991 History of America's air assault on Japan during World War II to destroy Japanese industrial capacity.      Total Mobilization Roy Scranton, 2019-07-30 Since World War II the story of the trauma hero, the noble white man psychologically wounded by his encounter with violence, has become omnipresent in America's narratives of war, an imaginary solution to the contradictions of American political hegemony. In *Total Mobilization* Roy Scranton cuts through the fog of trauma that obscures World War II, uncovering a lost history and reframing the way we talk about war today. Considering often overlooked works by James Jones, Wallace Stevens, Martha Gellhorn and others alongside cartoons and films, Scranton investigates the role of the hero in industrial wartime, showing how such writers struggled to make sense of problems that continue to plague us today: the limits of American power, the dangers of political polarization and the conflicts between nationalism and liberalism. By turning our attention to the ways we make war meaningful and by excavating the politics implicit within the myth of the traumatized hero, *Total Mobilization* revises the way we understand not only World War II but all of postwar American culture.      *Spy Flights of the Cold War* Paul Lashmar, 1996 The author reveals the secret spyplane war which took place in the skies over Soviet Russia during the Cold War.      *Flame On* John W. Mountcastle, 2016-03-01 A concise history of the development and use of incendiary weapons, flamethrowers, incendiary bombs, napalm and more by the American military in the twentieth century with a focus on World War II.      *Japan 1944-45* Mark Lardas, 2019-02-21 The air campaign that incinerated Japan's cities was the first and only time that independent air power has won a war. As the United States pushed Imperial Japan back towards Tokyo Bay, the US Army Air Force deployed the first of a new bomber to the theater. The B-29 Superfortress was complex, troubled and hugely advanced. It was the most expensive weapons system of the war and formidably capable. But at the time no strategic bombing campaign had ever brought about a nation's surrender. Not only that, but Japan was half a world away and the US had no airfields even within the extraordinary range of the B-29. This analysis explains why the B-29s struggled at first and how General LeMay devised radical and devastating tactics that began to systematically incinerate Japanese cities and industries and eliminate its maritime trade with aerial mining. It explains how and why this campaign was

so uniquely successful and how gaps in Japan's defences contributed to the B 29s success      *Tokyo 1944-45* Mark Lardas, 2024-02-15 The full history of how the United States targeted and destroyed the Japanese capital from the air in a ten month long campaign by the US Army Air Force and the US Navy In November 1944 the US Army Air Force launched a 111 plane B 29 strike against Tokyo the first raid since the morale boosting Doolittle Raid of 1942 From then until August 13 1945 the United States would attack Tokyo 25 times 20 from B 29s based in the Marianas and five from US Navy carrier task forces The campaign included the single deadliest air raid in human history when around 100 000 people were killed by the firestorm created by the Operation Meetinghouse raid of March 10 1945 This book the first to examine the full history of the United States air campaign against the greatest target in Japan looks at the USAAF's and US Navy's efforts to use air power to eliminate Tokyo's strategic value to the Empire It considers how the campaign developed from daylight bombing to firebombing and anti ship mining and finally how the target was handed over to the US Navy whose carrier based bombers and fighter bombers continued to strike Tokyo during July and August 1945 Using specially commissioned battlescenes strategic maps and diagrams this volume presents a detailed picture of how Tokyo was vanquished from the air
