## **Ecological Revolutions Nature Gender And Science In New England:**

**Ecological Revolutions** Carolyn Merchant, 1989 With the arrival of European explorers and settlers during the seventeenth century Native American ways of life and the environment itself underwent radical alterations as human relationships to the land and ways of thinking about nature all changed This colonial ecological revolution held sway until the nineteenth century when New England's industrial production brought on a capitalist revolution that again remade the ecology economy and conceptions of nature in the region In *Ecological Revolutions* Carolyn Merchant analyzes these two major transformations in the New England environment between 1600 and 1860 In a preface to the second edition Merchant introduces new ideas about narrating environmental change based on gender and the dialectics of transformation while the revised epilogue situates New England in the context of twenty first century globalization and climate change Merchant argues that past ways of relating to the land could become an inspiration for renewing resources and achieving sustainability in the future

**Ecological Revolutions** Carolyn Merchant, 1989 By exploring the stages of ecological transformation that took place in New England as European settlers took control of the land Carolyn Merchant develops a fresh approach to environmental history Her analysis of how human communities are related to the land is a key theme in *First Along the River* Benjamin Kline, 2000 *First Along the River* is the first concise accessible and informative introduction to the U S environmental movement that covers the colonial period through 1999 It provides students with a balanced historical perspective on the history of the environmental movement in relation to major social and political events in U S history The book highlights important people and events places critical concepts in context and shows the impact of government industry and population on the American landscape Comprehensive yet brief *First Along the River* discusses the religious and philosophical beliefs that shaped Americans relationship to the environment traces the origins and development of government regulations that impact Americans use of natural resources and shows why popular environmental groups were founded and how they changed over time

Climate Politics and the Power of Religion Evan Berry, 2022-05-17 How does our faith affect how we think about and respond to climate change *Climate Politics and the Power of Religion* is an edited collection that explores the diverse ways that religion shapes climate politics at the local national and international levels Drawing on case studies from across the globe it stands at the intersection of religious studies environment policy and global politics From small island nations confronting sea level rise and intensifying tropical storms to high elevation communities in the Andes and Himalayas wrestling with accelerating glacial melt there is tremendous variation in the ways that societies draw on religion to understand and contend with climate change *Climate Politics and the Power of Religion* offers 10 timely case studies that demonstrate how different communities render climate change within their own moral vocabularies and how such moral claims find purchase in activism and public debates about climate policy Whether it be Hindutva policymakers in India curanderos in Peru or working class people's concerns about the transgressions of petroleum extraction in Trinidad religion

affects how they all are making sense of and responding to this escalating global catastrophe

*Ethics and Practice in Science Communication* Susanna Priest, Jean Goodwin, Michael F. Dahlstrom, 2018-03-07 From climate to vaccination stem cell research to evolution scientific work is often the subject of public controversies in which scientists and science communicators find themselves enmeshed Especially with such hot button topics science communication plays vital roles Gathering together the work of a multidisciplinary international collection of scholars the editors of *Ethics and Practice in Science Communication* present an enlightening dialogue involving these communities one that articulates the often differing objectives and ethical responsibilities communicators face in bringing a range of scientific knowledge to the wider world In three sections how ethics matters professional practice and case studies contributors to this volume explore the many complex questions surrounding the communication of scientific results to nonscientists Has the science been shared clearly and accurately Have questions of risk uncertainty and appropriate representation been adequately addressed And most fundamentally what is the purpose of communicating science to the public Is it to inform and empower Or to persuade to influence behavior and policy By inspiring scientists and science communicators alike to think more deeply about their work this book reaffirms that the integrity of the communication of science is vital to a healthy relationship between science and society today

**Cultural Landscapes and Environmental Change** Lesley Head, 2017-09-25 Cultural landscapes are usually understood within physical geography as those transformed by human action As human influence on the earth increases advances in palaeocological reconstruction have also allowed for new interpretations of the evidence for the earliest human impacts on the environment It is essential that such evidence is examined in the context of modern trends in social sciences and humanities This stimulating new book argues that convergence of the two approaches can provide a more holistic understanding of long term physical and human processes Split into two major sections this book attempts to bridge the gap between the sciences and humanities The first section provides an analysis of the methodological tools employed in examining processes of environmental change Empirical research in the fields of palaeocology and Quaternary studies is combined with the latest theoretical views of nature and landscape occurring in cultural geography archaeology and anthropology The author examines the way in which environmental management decisions are made The book then moves on to discuss the relevance of this perspective to contemporary issues through a wide variety of international case studies including World Heritage protection landscape preservation indigenous people and cultural tourism

*Communication Yearbook 16* Stanley Deetz, 2012-05-23 The *Communication Yearbook 16* focuses on the study of communication within corporate organizations Part II explores the role of communication studies in such timely issues as communication technology globalization and multiculturalism The final section focuses on three theoretical debates in which contributors discuss communication during initial interaction the motivation to communicate and communication in decision making and problem solving groups Commentaries on each chapter provide alternative perspectives extend issues of significance and

help engage the reader in the contemporary debates in each area      **Communication Yearbooks Vols 6-33 Set**

*An Everglades Providence* Jack E. Davis, 2009 Profiles the suffragist feminist and environmentalist who fought for the preservation and protection of the Everglades and won the battle that turned it into a national wilderness area Gender and Food Shelley L. Koch, 2019-02-22 Gender and Food A Critical Look at the Food System synthesizes existing theoretical and empirical research on food gender and intersectionality to offer students and scholars a framework from which to understand how gender is central to the production distribution and consumption of food **Native Foods** Michael D. Wise, 2023-06-22 Native foods are ubiquitous in America but they often go unrecognized and unidentified So too do the countless farms gardens and other places created by Native American people to feed and nourish their families and communities over generations Over the last five centuries of settler colonialism this inconspicuousness of Native American food and agriculture has helped configure Americans imaginations of food and agriculture in ways that require critical identification Drawing attention to this issue Native Foods brings to bear approaches from the fields of food studies and Indigenous studies to explore how biophysical patterns of settler colonial land use have worked as narrative frames for structuring historical views of Native agriculture Following the lead of Indigenous food sovereignty advocates and activists the book emphasizes the presence and persistence of Native American cuisine and documents how Native foods and agricultural techniques were never lost but only obscured by the peregrinations of colonialism capitalism and various other historical transformations *Grassroots Post-Modernism* Gustavo Esteva, Madhu Suri Prakash, 1998 Gustavo Esteva is one of Latin America s best known alternative thinkers about development For this book he teams up with Madhu Suri Prakash to offer a vibrant and provocative critique of the Western development paradigm
