Ecology Of Place Planning For Environment Economy And Community

Daniel D. Chiras

Ecology Of Place Planning For Environment Economy And Community:

The Ecology of Place Timothy Beatley, Kristy Manning, 2013-04-22 Current patterns of land use and development are at once socially economically and environmentally destructive Sprawling low density development literally devours natural landscapes while breeding a pervasive sense of social isolation and exacerbating a vast array of economic problems As more and more counties begin to look more and more the same hope for a different future may seem to be fading But alternatives do exist The Ecology of Place Timothy Beatley and Kristy Manning describe a world in which land is consumed sparingly cities and towns are vibrant and green local economies thrive and citizens work together to create places of eduring value They present a holistic and compelling approach to repairing and enhancing communities introducing a vision of sustainable places that extends beyond traditional architecture and urban design to consider not just the physical layout of a development but the broad set of ways in which communities are organized and operate Chapters examine the history and context of current land use problems along with the concept of sustainable places the ecology of place and ecological policies and actions local and regional economic development links between land use and community planning and civic involvement specific recommendations to help move toward sustainability The authors address a variety of policy and development issues that affect a community from its economic base to its transit options to the ways in which its streets and public spaces are managed and examine the wide range of programs policies and creative ideas that can be used to turn the vision of sustainable places into reality The Ecology of Place is a timely resource for planners economic development specialists students and citizen activists working toward establishing healthier and more sustainable patterns of growth and development

Environmental Rhetoric and Ecologies of Place Peter N. Goggin, 2013-07-18 Understanding how rhetoric and environmental rhetoric in particular informs and is informed by local and global ecologies contributes to our conversations about sustainability and resilience the preservation and conservation of the earth and the future of human society This book explores some of the complex relationships collaborations compromises and contradictions between human endeavor and situated discourses identities and landscapes social justice and natural resources movement and geographies unpacking and grappling with the complexities of rhetoric of presence Making a significant contribution to exploring the complex discursive constructions of environmental rhetorics and place based rhetorics this collection considers discourses actions and adaptations concerning environmental regulations and development sustainability exploitation and conservation of energy resources Essays visit arguments on cultural values social justice environmental advocacy and identity as political constructions of rhetorical place and space Rural and urban case studies contribute to discussions of the ethics and identities of environment and the rhetorics of environmental cartography and glocalization Contributors represent a range of specialization across a variety of scholarly research in such fields as communication studies rhetorical theory social cultural geography technical professional communication cartography anthropology linguistics comparative literature ecocriticism

literacy studies digital rhetoric media studies and discourse analysis Thus this book goes beyond the assumption that rhetorics are situated and challenges us to consider not only how and why they are situated but what we mean when we theorize notions of situated place based rhetorics

Civic Tourism: The Poetry and Politics of Place Dan Shilling,2007 Examines the tourism industry in the light of civic values that go beyond economics to the social and environmental impacts of tourism development exploring ways to develop a responsible tourism ethic

Environmental Science 6e (paper) Daniel D. Chiras,2013 *Design with the Desert* Richard Malloy,John Brock,Anthony Floyd,Margaret Livingston,Robert H. Webb,2016-04-19 Typical development in the American Southwest often resulted in scraping the desert lands of the ancient living landscape to be replaced with one that is human made and dependent on a large consumption of energy and natural resources This transdisciplinary book explores the natural and built environment of this desert region and introduces development tools for shaping its future in a more sustainable way It offers valuable insights to help promote ecological balance between nature and the built environment in the American Southwest and in other ecologically fragile regions around the world

Growth Management and Public Land Acquisition Christopher Coutts,2016-04-15 Bringing together a team of national experts this volume offers a detailed look at the links between public land acquisition programs and efforts to yield smart growth outcomes in the USA Both public land acquisition programs and state and local growth management efforts have been examined in detail but while there is growing recognition that land acquisition can play an important role in smart growth outcomes there has so far been little research into the nexus of these areas of public policy This book investigates various aspects of the land acquisition smart growth linkage and describes model programs and makes recommendations for the adoption of land acquisition efforts nationally and internationally It will appeal to practising planners policy makers public officials and citizen groups as well as academics of urban planning environmental studies geography and other disciplines which examine issues of urban sprawl

The Sociology of Community Connections John G. Bruhn,2011-07-18 Many of our current social problems have been attributed to the breakdown or loss of community as a place and to the fragmentation of connections due to an extreme value of individualism in the Western world particularly in the United States Not all scholars and researchers agree that individualism and technology are the primary culprits in the loss of community as it existed in the middle decade of the 20th century Nonetheless people exist in groups and connections are vital to their existence and in the daily performance of activities The second edition of the Sociology of Community Connections will identify and help students understand community connectedness in the present and future

Cities as Sustainable Ecosystems Peter Newman,Isabella Jennings,2012-09-26 Modern city dwellers are largely detached from the environmental effects of their daily lives The sources of the water they drink the food they eat and the energy they consume are all but invisible often coming from other continents and their waste ends up in places beyond their city boundaries Cities as Sustainable Ecosystems shows how cities and their residents can begin to reintegrate into their bioregional environment

and how cities themselves can be planned with nature's organizing principles in mind Taking cues from living systems for sustainability strategies Newman and Jennings reassess urban design by exploring flows of energy materials and information along with the interactions between human and non human parts of the system Drawing on examples from all corners of the world the authors explore natural patterns and processes that cities can emulate in order to move toward sustainability Some cities have adopted simple strategies such as harvesting rainwater greening roofs and producing renewable energy Others have created biodiversity parks for endangered species community gardens that support a connection to their foodshed and pedestrian friendly spaces that encourage walking and cycling A powerful model for urban redevelopment Cities as Sustainable Ecosystems describes aspects of urban ecosystems from the visioning process to achieving economic security to fostering a sense of place

Diálogos: Placemaking in Latino Communities Michael Rios, Leonardo Vazquez, 2012-06-25
Latinos are one of the largest and fastest growing social groups in the United States and their increased presence is profoundly shaping the character of urban suburban and rural places This is a response to these developments and is the first book written for readers seeking to learn about engage and plan with Latino communities It considers how placemaking in marginalized communities sheds light on and can inform community building practices of professionals and place dwellers alike Di logos Placemaking in Latino Communities will help readers better understand the conflicts and challenges inherent in placemaking and to make effective and sustainable choices for practice in an increasingly multi ethnic world The essays explore three aspects of place the appropriation and territorialization of the built environment the claiming of rights through collective action and a sense of belonging through civic participation The authors illustrate their ideas through case studies and explain the implications of their work for placemaking practice A consistent theme about planning and design practice in Latino communities emerges throughout the book placemaking happens with or without professional planners and designers All of the essays in Di logos demonstrate the need to not only imagine build and make places with local communities but also to re imagine how we practice democracy inclusive of cross cultural exchange understanding and respect This will require educators students and working professionals to incorporate the knowledge and skills of cultural competency into their everyday practices

Linking Architecture and Education Anne Taylor, 2009-05-16 For the past forty years Anne Taylor has studied how schools classrooms playgrounds homes museums and parks affect children and how they learn As a result she has developed a holistic sustainable philosophy of learning environment design She argues persuasively that architects must integrate their design knowledge with an understanding of the developmental needs of learners while at the same time educators parents and students must broaden their awareness of the built natural and cultural environment to maximize the learning experience In other words schools and other environments can themselves become three dimensional textbooks When architects are cognizant of newer models of education and educators view the environment as more than a box in which to teach prescribed lessons the result is an informed architecture that enables children to discover the power of their

own learning The book presents numerous examples of dynamic designs that are the result of interdisciplinary understanding of place Taylor includes designer perspectives forums derived from commentary by outside contributors involved in school planning and a wealth of photographs of thoughtful and effective solutions to create learning environments from comprehensive design criteria Because the concept of school is enlarged to a community campus the book also spawns a new model of teaching and learning This book is essential reading for educators architects and community members who are anxious to transform education in America and elsewhere Anne Taylor is the most outstanding educator leading proponent and practitioner in the three dimensional textbook field Her work is the finest resource available for connecting students young and old to their learning environments and visa versa Edward E Kirkbride NCARB REFP Before Western man divided the universe into discrete subject matter areas the order in the universe was and still is both interdisciplinary and holistic The branching of trees spiraling of shells meandering of streams and the radial designs of flowers for example represent an analogy of mathematics biology and art The current artificial separation of subject matter is in contrast to the way the world is constructed and the way children perceive it Architecture and the study of the built natural and cultural environment synthesize the world of material things and the world of ideas Further more it helps us to realize that we are a part of not apart from the environment This book is a tool and a gift to designers educators and students everywhere to assist them in seeing the meaning behind all that we view and use for living on earth To know our precious relationship to our surroundings is the intent of this book In this way life is a work of art and each of us is an artist Anne Taylor

Living Above the Store Martin Melaver, 2009 Not Merely Sustainable Restorative A viable business is a living thing embedded in the complex web of economy community and ecology Done right business can help correct the modern stresses of environmental degradation and social fragmentation and create value for workers shareholders and additional stakeholders in the community Living Above the Store explores a road less traveled and chronicles how business can navigate a new path toward successful restorative practices Book jacket *Sustainable Governance in B Corps* Patrizia Gazzola, Matteo Ferioli, 2023-07-12 This book aims to develop the theme of non financial reporting and the necessity of pursuing sustainable development with particular reference to Benefit Corporations and Certified B Corps The research offers a systematic and exploratory analysis with the goal of developing a conceptual framework for supporting companies in

the achievement of sustainable governance in line with the United Nations guidelines for sustainable development The first chapter reviews the relevant literature and analyzes the concept of sustainable development focusing on the United Nations policies and SDGs Chapter 2 reviews the relevant literature on corporate social responsibility describing its evolution from its birth during the Industrial Revolution through to the present day Chapter 3 focuses on non financial reporting and emphasizes the need to establish effective social communication with stakeholders that includes environmental social and governance ESG aspects Chapter 4 explores the value of Benefit Corporations and Certified B Corps which are companies that have adopted an innovative business model that combines the need for both corporate social responsibility and profitability Finally the last chapter uses examples of Italian fashion B Corps to illustrate how such companies make decisions based on CSR

The Landscape of Reform Ben A. Minteer, 2006 In *The Landscape of Reform* Ben Minteer offers a fresh and provocative reading of the intellectual foundations of American environmentalism focusing on the work and legacy of four important conservation and planning thinkers in the first half of the twentieth century Liberty Hyde Bailey a forgotten figure in the Progressive conservation movement urban and regional planning theorist Lewis Mumford Benton MacKaye the forester and conservationist who proposed the Appalachian Trail in the 1920s and Aldo Leopold author of the environmentalist classic *A Sand County Almanac* Minteer argues that these writers blazed a significant third way in environmental ethics and practice a more pragmatic approach that offers a counterpoint to the anthropocentrism versus ecocentrism use versus preservation narrative that has long dominated discussions of the development of American environmental thought Minteer shows that the environmentalism of Bailey Mumford MacKaye and Leopold was also part of a larger moral and political program one that included efforts to revitalize democratic citizenship conserve regional culture and community identity and reclaim a broader understanding of the public interest that went beyond economics and materialism Their environmental thought was an attempt to critique and at the same time reform American society and political culture Minteer explores the work of these four environmental reformers and considers two present day manifestations of an environmental third way Natural Systems Agriculture an alternative to chemical and energy intensive industrial agriculture and New Urbanism an attempt to combat the negative effects of suburban sprawl By rediscovering the pragmatic roots of American environmentalism writes Minteer we can help bring about a new civic minded environmentalism today

Dynamic Urban Design Michael A. Von Hausen, 2013 For future human survival and quality of life the world needs a more inclusive rigorous socially inspired and comprehensive urban design model integrated with sustainable development This book delivers that model Back cover

The Business of Sustainability Chris Laszlo, Karen Christensen, Daniel S. Fogel, Gernot Wagner, Peter J. Whitehouse, 2010-01-01 *The Business of Sustainability* is a core resource for policy makers members of the development community entrepreneurs and corporate executives as well as business and economics students and their professors It contains rich analysis of how sustainability is being factored into industries across

the globe with enlightening case studies of businesses serving as agents of change Contributing authors provide a groundbreaking body of research based knowledge They explain that the concept of sustainability is being re framed to be positive about business instead of being tied to the old notion of a trade off between business and society that is if business wins society and the environment must lose and they explore how economic development can contribute to building our common future

Geography in America at the Dawn of the 21st Century Gary L. Gaile,Cort J. Willmott,2005

Geography in America at the Dawn of the 21st Century surveys American geographers current research in their specialty areas and tracks trends and innovations in the many subfields of geography As such it is both a state of the discipline assessment and a topical reference It includes an introduction by the editors and 47 chapters each on a specific specialty The authors of each chapter were chosen by their specialty group of the American Association of Geographers AAG Based on a process of review and revision the chapters in this volume have become truly representative of the recent scholarship of American geographers While it focuses on work since 1990 it additionally includes related prior work and work by non American geographers The initial Geography in America was published in 1989 and has become a benchmark reference of American geographical research during the 1980s This latest volume is completely new and features a preface written by the eminent geographer Gilbert White
