Climate and Economic Development in the Tropics Douglas Harry Kedgwin Lee, 1957 Economic Growth and Development in the Tropics Sook Rei Tan, Haejin Jang, Jacob Wood, 2024-02-06 The living standards and scale of development around the world are vastly unequal One notable observation is that much of the poverty stricken area is located between the tropics of Cancer and Capricorn By contrast affluent nations are situated in more temperate zones Such a phenomenon gives weight to the geography hypothesis that seeks to explain the occurrence of global economic inequality by placing an emphasis on the importance of natural elements such as location and climate in determining the economic conditions of a nation This book concentrates exclusively and in depth on the key economic phenomena and factors which shape tropical economies today It examines contemporary economic problems confronting the tropical countries and provides policy recommendations that align with the United Nations Sustainable Development Goals set in the 2030 Agenda It contains research works and case studies of tropical economies that are related to the area of development and environment economics The book's themes range from economic growth poverty reduction income inequality economic globalization international trade capital flow financial development and institutional development to environmental sustainability within the Tropics Recognizing the dynamism and diversity of the tropics the book encompasses empirical and policy analyses that address the key economic issues and challenges in the region so as to provide an important platform from which new policymaking initiatives can flourish This book will draw readership primarily from the fields of economics and public policy particularly under the subject areas of development and environment economics as well as discussions in the sustainability policy space **The tropics and economic development** Andrew Martin Kamarck, 1976 **Tropical Exports and Economic Development** Barbara Ingham, 1981-06-18 **Tropical Development, 1880-1913** William Arthur Lewis, 2005-11-03 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company **Tropical Development** William Arthur, 2013-11-05 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company Economic Development in the Tropics B. W. Hodder, 1971 The Geography of Tropical African Development A. M. O'Connor, 2014-06-28 This best selling textbook focuses on the changes in geographical patterns that have taken place in recent years i.e. on the geographical pattern of recent and current economic change The area covered includes the countries lying between the limits of the Tropic of Cancer and the Tropic of Capricorn In this second edition substantial changes have been made in every chapter in order to keep up to date in respect of both the geographical pattern of development and prevailing attitudes towards it The discussion is still largely confined to the twenty year period between 1956 and 1976 and to the economic component of development *The Nature of Development* Roger D. Stone, 1992 A few

years ago Roger Stone undertook a formidable challenge to travel to representative villages in the tropical corners of the developing world to see how and whether economic development plans had improved the quality of the people's lives while also preserving each region's rich plant and animal life. In *The Nature of Development* Stone reports on his findings and offers a lively prescription for sustainable economic growth that is environmentally sane and economically sound. By commercial and missionary airplane, bus, off-road vehicle and dugout canoe and of course by means of wearying foot journeys Roger Stone reached his far-flung destinations all over Latin America, Asia and Africa. Once there he lived, walked and talked at length with many diverse peoples: the Awa of Ecuador and Colombia, the Oku who live near Kilum Mountain in Cameroon, the Hatam of the Arfak Mountains in Indonesia's Irian Jaya province, the resourceful if under-equipped wardens of Zambia's national park, service fishermen and farmers of a St. Lucia that Caribbean tourists seldom discover. While in the Amazon basin he found sad tales of people without a future and of relentless environmental losses. More often though he returned with stories of hope and encouragement. For as *The Nature of Development* shows, conservation and economic development agencies can work together and the governments of poor and rich countries alike can cooperate to improve human lives and stop disastrous ecological losses in the world's richest habitats. As new imperatives replace the global preoccupation with warfare and reckless modes of development, Stone's book carries a resonant and important message about how we have mistreated our habitats in the past and how we can achieve a new environmental world order.

The Potentials of the Hot-Humid Tropics in Latin America, The Development of Tropical Lands Michael Nelson, 2013-11-26. First Published in 2011. Latin America today is similar to Canada in the early 1900s: a sleeping giant, basically underpopulated, whose potential rests on the exploitation of enormous land, forest, mineral and water reserves. This study, carried out over the period 1967-69, has involved travel throughout much of Latin America north of the Tropic of Capricorn and discussions with people in many different fields, including highway construction, forestry, colonization and agricultural industries in the forest frontier regions and capital cities of the continent. The collection of data required about twelve months of the author in the field.

Business, Industry, and Trade in the Tropics Jacob Wood, Taha Chaiechi, K. Thirumaran, 2022-03-21. The tropics is an area of enormous opportunity and potential. The countries situated between the Tropics of Cancer and Capricorn are largely developing in nature. There is huge interest in the types of business investments made in Southeast Asia, Central Africa and the Amazonian tropical belts. These tropical regions continue to face opportunities and challenges in attracting foreign direct investments as well as the need to complement and/or compete with larger economies external to the tropics. This book provides an empirical assessment of the key sociocultural, economic, environmental and political factors that influence the business dynamics of organizations operating within the tropics. It will address but is not limited to topics such as attracting businesses to the tropics, facilitating smooth stable conditions for business operations and sustainability, national institutions and regulations that shape the way business is done and the increasing deployment of new technologies and entrepreneurial

innovations which are defining the global tropics as a distinct business region It will offer readers a key focus for developing a deeper understanding of the factors and frameworks that influence and shape business activity in the area While the primary audience for the book consists of academics and students from the fields of economics environmental economics developmental economics business international trade tourism and area studies it will also provide a practical resource for government policy analysts wanting to fully appreciate some of the key economic and business issues facing the region
