Economics and Policies in Formulating Renewable Power Development Plans Bai-Chen Xie, Karim Anaya Stucchi, Hong-zhou Li, 2023-11-06 Renewable energy has been considered as an effective way to deal with challenges caused by energy security and climate change. In the past decades, the share of renewable energy in the energy mix has been increasing with a proportion of around 25% globally, benefitting from the steady maturity of economical, technological, and political issues. However, the gap between expectations of fast renewables-driven energy transitions and the reality of today's energy systems, which rely heavily on fossil fuels, remains stubbornly large. The development of renewable energy still faces uncertainties among them are cost changes driven by the potential technology breakthroughs, renewable power market-oriented progress, and various challenges related to grid interconnection of such intermittent renewable energy resources and some other factors. Many countries and regions have issued their plans in boosting the development of renewable power. However, not one renewable power exploitation plan is acceptable universally due to the varied developing level of economies and societies. It is of great significance to explore the economic, technological, and political influences of related factors in achieving the development target for renewable energy.

Emerging Principles of International Environmental Law Sumudu Atapattu, 2007-04-30 Emerging Principles of International Environmental Law is ideally suited for any law or environmental studies student, practitioner, or law academic who is interested in the legal status of emerging principles in the field of international environmental law. Among its highlights, the text examines the interaction of principles/concepts such as sustainable development, the precautionary principle, etc. with one another and how the present international environmental law regime has taken the vast disparity between developed and developing countries into account in designing innovative methods to accommodate this disparity. Following an introductory chapter on the development of international environmental law, the book explores five concepts/principles that have emerged in the recent years in this field and discusses their relationship to one another, particularly how they interact and contribute to the achievement of sustainable development: sustainable development, the precautionary principle, the environmental impact assessment process, and participatory rights, the common but differentiated responsibility principle, and the polluter pays principle. The final chapter evaluates the emergence of a distinct field of international law called International Sustainable Development Law and discusses its future direction. While these principles or concepts have received much attention in previous literature, not much attention has been paid to their interaction with one another and how the present international environmental law regime has taken the vast disparity between developed and developing countries into account in designing innovative methods to accommodate this disparity. It is here the strength of the book lies. The book was written to provide a firm grasp of international environmental law issues and of international law in general. It is intended for the international market for anybody who is interested in the future direction of international environmental law and of sustainable development. As such, it would be relevant not only to the law student and law academic but also to international

organizations such as UNEP Commission on Sustainable Development UNDP and the World Bank as well as for international and national civil society groups engaged in environmental issues and human rights issues Published under the Transnational Publishers imprint *International Commerce*, 1964 International Encyclopedia of Civil Society Helmut K. Anheier, Stefan Toepler, 2009-11-24 Recently the topic of civil society has generated a wave of interest and a wealth of new information Until now no publication has attempted to organize and consolidate this knowledge The International Encyclopedia of Civil Society fills this gap establishing a common set of understandings and terminology and an analytical starting point for future research Global in scope and authoritative in content the Encyclopedia offers succinct summaries of core concepts and theories definitions of terms biographical entries on important figures and organizational profiles In addition it serves as a reliable and up to date guide to additional sources of information In sum the Encyclopedia provides an overview of the contours of civil society social capital philanthropy and nonprofits across cultures and historical periods For researchers in nonprofit and civil society studies political science economics management and social enterprise this is the most systematic appraisal of a rapidly growing field International Trade Charles van Marrewijk, 2017 A fully up to date and comprehensive treatment of International Trade this book provides a solid foundation of international trade flows and theories as well as the latest information on empirical developments and new theoretical insights Fundamental changes in perspectives are covered including the role of the firm in international trade flows and organization in terms of heterogeneity multinational activity and global supply chain activities The theory is illustrated throughout with empirical evidence and an abundance of relevant case studies The body of the text represents the first tier of analysis it provides extensive written and graphical explanations of the structure of international trade As a second tier of analysis technical notes at the end of relevant chapters seek to support students who wish to take their learning further This book is accompanied by an Online Resource Center that features For students Additional review questions Empirical questions based on data provided in Excel files Simulation questions allowing students to experiment with models For lecturers Model answers to questions Animated Powerpoint slides Further questions for use in seminars exams **International Marketing** P.
