Sustainable Development: Concepts, Rationalities and Strategies Sylvie Faucheux,Martin O'Connor,Jan van der Straaten,2013-03-14 3 decision support techniques that do not depend exclusively on market incentives and monetary valuation The World Conservation Strategy published by the mCN 1980 recognised the full dimensions of these problems and introduced the concept of sustainable development placing the emphasis on the exploitation of natural systems and the use of biological natural resources within limits so that the availability of these resources for use by future generations would not be jeopardised by the current use of them At this time the imposition of quotas and the definition of critical loads and environmental standards were suggested as the sorts of instruments necessary to cope with the problems of limited availability of environmental resources Although the mCN publication did not obtain a high international profile the idea of policy norms to respect critical loads has become quite widely accepted in the environmental policymaking of Western countries This has often put the policy agencies in difficult situations Polluting industries are inclined to argue that the critical loads are defined too restrictively The complexity and time lags of ecological effects makes it hard to say exactly what

constitutes a critical load beyond which there will be irreversible damage and lobbying interests can play on these uncertainties to try and weaken the environmental standards In addition polluting industries can use the argument of negative impacts on the economy particularly as regards employment and export prospects to blackmail governments regulatory agencies and the general public

Regional Economic Development Robert J. Stimson, Roger R. Stough, Brian H. Roberts, 2013-03-09 Regional economic development has attracted the interest of economists geographers planners and regional scientists for a long time And of course it is a field that has developed a large practitioner cohort in government and business agencies from the national down to the state and local levels In planning for cities and regions both large and small economic development issues now tend to be integrated into strategic planning processes For at least the last 50 years scholars from various disciplines have theorised about the nature of regional economic development developing a range of models seeking to explain the process of regional economic development and why it is that regions vary so much in their economic structure and performance and how these aspects of a region can change dramatically over time Regional scientists in particular have developed a comprehensive tool kit of methodologies to measure and monitor regional economic characteristics such as industry sectors employment income value of production investment and the like using both quantitative and qualitative methods of analysis and focusing on both static and dynamic analysis The father of regional science Walter Isard was the first to put together a comprehensive volume on techniques of regional analysis Isard 1960 and since then a huge literature has emerged including the many titles in the series published by Springer in which this book is published
