Economics Of Crime Deterrence And The Rational Offender Contributions To Economic Analysis S:

Economics of Crime Erling Eide,Paul H. Rubin,Joanna Mehlop Shepherd,2006 Economics of Crime presents the basic model of criminal behavior and law enforcement The authors start by reviewing the economics of criminal behavior Models of criminal behavior applying the model of individual rational behavior are presented Empirical studies surveyed use regression analyses and employ data from states and police regions down to individuals These studies tend to support the hypothesis that the probability of punishment and the severity of punishment have a deterrent effect on crime Methodological problems relating to the assumption of rationality statistical identification of equations measurement errors and operationalization of theoretical variables are discussed Economics of Crime also review the theory of public enforcement including probability and severity fines and imprisonment repeat offenders incentives of enforcers enforcement costs and enforcement errors Economics of Crime is intended for economists and lawyers practitioners scholars and students in the field of law and economics microeconomics and criminology who wish to learn the basics of the economics of crime criminal behavior and law enforcement Ibss: Political Science: 1994 British Library of Political and Economic Science at the London School of Economics,1995-12-08 The IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences

Economics of Crime Erling Eide,Jørgen Aasness,Terje Skjerpen,1994-11-11 In this volume the rational choice model is extended to a framework of norm guided theories of crime are incorporated Based on this framework a broad range of regression analyses of crime in various parts of the world is reviewed Many general methodological problems of empirical studies of crime are discussed such as identification of models model selection measurement errors and choice of measures corresponding to theoretical concepts In an empirical chapter using panel data for police districts in Norway a novel procedure of identification of models of crime is employed The model includes measurement relations allowing for random and systematic errors in the registered numbers of crimes and clear ups Academics in economics criminology and sociology will find this book invaluable **Analyzing Rational Crime — Models and Methods** Olof Dahlbäck,2013-04-17 Olof Dahlbäck's book breaks new ground for the analysis of crime from a rationality perspective by presenting models and methods that go far beyond those with which researchers have hitherto been equipped The book examines single crimes individual criminality and societal crime and it discusses thoroughly the general decision theoretical presuppositions necessary for analyzing these various types of crime An expected utility maximization model for a single discrete choice regarding the commission of a crime is the foundation of most of the analyses presented A version of this model is developed that permits interpersonal comparisons and this basic model is used when deriving more complex models of crime as well as when analyzing the potential for such derivations The rigorous powerful methods suggested provide considerable opportunities for improving research and for seeing old problems in a new light **Economics and Ethics 1** Wilhelm E. Krelle,2012-12-06

When one gets older one looks at the science in which one has been working for a long time from a certain distance such that the general approach the contours of the whole and the connections to other parts of the social sciences come to the foreground whereas the elaboration of the details must be left to younger colleagues This applies also to this book details are left to younger colleagues if they find it worthwhile to try this new approach I know quite well that the ideas presented here are incomplete and more in the spirit of a research program than a final product in itself But time runs out I personally think that this new road is worthwhile trying but of course I as the author am not unprejudiced On the other hand after a certain age one is not so sensible to be torn to pieces by his critics nature will do that anyway I present here only the basic ideas the hard core of the theory and leave out most of the definitional relations which close the system I leave that to the interested reader and to the scholar who wants to work with the system There are some repetitions in the book Handbook of Public Economics Martin Feldstein,A.J. Auerbach,2002-01-25 The Field of Public Economics has been changing rapidly in recent years and the sixteen chapters contained in this Handbook survey many of the new developments As a field Public Economics is defined by its objectives rather than its techniques and much of what is new is the application of modern methods of economic theory and econometrics to problems that have been addressed by economists for over two hundred years More generally the discussion of public finance issues also involves elements of political science finance and philosophy These connections are evidence in several of the chapters that follow Public Economics is the positive and normative study of government s effect on the economy We attempt to explain why government behaves as it does how its behavior influences the behavior of private firms and households and what the welfare effects of such changes in behavior are Following Musgrave 1959 one may imagine three purposes for government intervention in the economy allocation when market failure causes the private outcome to be Pareto inefficient distribution when the private market outcome leaves some individuals with unacceptably low shares in the fruits of the economy and stabilization when the private market outcome leaves some of the economy s resources underutilized The recent trend in economic research has tended to emphasize the character of stabilization problems as problems of allocation in the labor market The effects that government intervention can have on the allocation and distribution of an economy s resources are described in terms of efficiency and incidence effects These are the primary measures used to evaluate the welfare effects of government policy **Journal of Economic Literature** ,1995

Adam Tock Reference Reviews In discussing a criminology topic lecturers and course textbooks often toss out names of theorists or make a sideways reference to a particular theory and move on as if assuming their student audience possesses the necessary background to appreciate and integrate the reference However university reference librarians can tell you this is often far from the case Students often approach them seeking a source to provide a quick overview of a particular theory or theorist with just the basics the who what where how and why if you will And reference librarians often find it difficult to guide these students to a quick one stop source In response SAGE Reference is publishing the two volume Encyclopedia of Criminological Theory available in both print and electronic formats This serves as a reference source for anyone interested in the roots of contemporary criminological theory Drawing together a team of international scholars it examines the global landscape of all the key theories and the theorists behind them presenting them in the context needed to understand their strengths and weaknesses In addition to interpretations of long established theories it also offers essays on cutting edge research as one might find in a handbook And like an unabridged dictionary it provides concise to the point definitions of key concepts ideas schools and figures Coverage will include contexts and concepts in criminological theory the social construction of crime policy implications of theory diversity and intercultural contexts conflict theory rational choice theories conservative criminology feminist theory Using Dynamic General Equilibrium Models for Policy Analysis Glenn W. Harrison,2000 This volume offers an up to date treatment of dynamic general equilibrium modelling The book written by some of the most experienced researchers in the field contains a rich array of policy settings The issues considered include trends in the policy use of dynamic general equilibrium models environmental policy trade liberalization and enlargement of the European Union the impact of education and tax policy on human capital accumulation tax policy and the labour market and public finances in relation to population ageing **Bibliographie Internationale de Science Politique** ,1994 **A Study of Economic Reform** Brian Silverstone,Alan Bollard,Ralph G. Lattimore,1996 Studies the economic reforms of New Zealand from one of the most interventionist OECD economies to one of the most open market based economies Provides a platform for further research **The Oxford Handbook of Offender Decision Making** Wim Bernasco,Henk Elffers,Jean-Louis van Gelder,2017-05-08 Although the issue of offender decision making pervades almost every discussion of crime and law enforcement only a few comprehensive texts cover and integrate information about the role of decision making in crime The Oxford Handbook of Offender Decision Making provide high quality reviews of the main paradigms in offender decision making such as rational choice theory and dual process theory It contains up to date reviews of empirical research on decision making in a wide range of decision types including not only criminal initiation and desistance but also choice of locations times targets victims methods as well as large variety crimes including homicide robbery domestic violence burglary street crime sexual crimes and cybercrime Lastly it provides in depth treatments of the major methods used to study offender decision making including experiments observation studies surveys offender interviews and simulations

Comprehensive and authoritative the Handbook will quickly become the primary source of theoretical methodological and empirical knowledge about decision making as it relates to criminal behavior Bibliographic Index, 2004
