The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK's economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government **Urban and Environmental Economics** Graham

centers of economic opportunity The challenge for African policymakers is to ensure that urban development is orderly and that the process is inclusive and emphasizes the protection of the environment hence green growth The Oxford Handbook of Economic Geography Gordon L.
