command system in favour of a market mechanism in a country whose market institutions had been destroyed under forty years of communist rule This book recounts the events of this period and the course taken by the new government and analyzes the significance of this for the transition process in Poland and elsewhere The Labour Market Impact of the EU Enlargement Floro Ernesto Caroleo, Francesco Pastore, 2010-03-18 Floro Ernesto Caroleo and Francesco Pastore This book was conceived to collect selected essays presented at the session on The Labour Market Impact of the European Union Enlargements A New Regional Geography of Europe of the XXII Conference of the Italian Association of Labour Economics AIEL The session aimed to stimulate the debate on the continuity fracture of regional patterns of development and employment in old and new European Union EU regions In particular we asked whether and how different the causes of emergence and the evolution of regional imbalances in the new EU members of Central and Eastern Europe CEE are compared to those in the old EU members Several contributions in this book suggest that a factor common to all backward regions often neglected in the literature is to be found in their higher than average degree of structural change or more precisely in the hardship they experience in coping with the process of structural change typical of all advanced economies In the new EU members of CEE structural change is still a consequence of the continuing process of transition from central planning to a market economy but also of what Fabrizio et al 2009 call the second transition namely that related to the run up to and entry in the EU **The Urban Mosaic of Post-Socialist Europe** Sasha Tsenkova, Zorica Nedovic-Budic, 2006-12-02 The book explores urban dynamics in post socialist Europe 15 years after the fall of communism The urban mosaic metaphor expresses the complexity diversity and uniqueness of the processes and spatial outcomes in post socialist cities The book examines the urban development and the policy and planning processes that have resulted from the socio economic political and institutional transformations characterizing the move to markets and democracy The emerging urban phenomena are illustrated with in depth case studies sensitive to historical themes cultural issues and the socialist legacy Cities featured in the book include Kazan St Petersburg Moscow Warsaw Prague Komarno Budapest Belgrade Bucharest Sofia and Tirana The edited volume is organized around the following four themes the driving forces of post socialist change urban processes and spatial change housing and retail sector transformation and urban planning and policy responses **Europe and Economic Reform in Africa** Obed O. industrial output data for four Eastern European countries is examined In order to determine the extent to which structural adjustment has taken place since the initiation of market oriented reform The latter created a massive relative price shock whose affects on the structure of the industrial sectors of these economies is shown to have been relatively small at least one to two years after the reforms An implication is that one argument in favor of more gradualist reform based on the premise that more gradualism implies a smaller output cost in the short run is questionable By and large in these economies the output cost associated with the removal of relative price distortions may still have to be faced

**The European Central Bank and the European Macroeconomic Constitution** Klaus Tuori,2022-09-22 The book is about money central banking and constitutions It explains how the European Central Bank was established to ensure stability and prosperity for the euro area The ECB was guided and controlled by a coherent European Macroeconomic Constitution However this model has failed during recurring crises and the ECB has started to act as the euro area fire brigade Consequently it is pushing the boundaries of monetary policy and with that challenging the accountability mechanisms and fundamentally also the democratic legitimacy of the EMU The book sheds light on this complex economic constitutional setting with a view on the future The imbalance between various new operations and a single price stability objective is difficult to remedy New objectives of financial stability economic adjustment and environmental sustainability can cause fundamental ruptures between the ECB s formal role and its actions and they also dangerously overburden monetary policy moving forward with substantial risks

**Economic Adjustment and Reform in Eastern Europe and the Soviet Union** Franklyn D. Holzman,1988 Economic reform structural adjustment macroeconomic stabilization and participation in the world economy are interconnected aspects of the same issue the long term economic viability of centrally planned economies in the rapidly changing economic environment of the modern world Any economic strategy that focuses on only one or two of these aspects at the expense of the others is likely to fail yet even strategies that build on all of these bases may well fail unless political leaders can muster exceptional skill garner international support and enjoy some good luck The contributions to this volume reflect the recent research on this issue by various specialists on the economies of the Soviet Union and Eastern Europe Each author emphasizes macroeconomic stabilization structural adjustment participation in the larger world economy or economic reform
