Ecosystem concept In Natural Resource Management The:

The Ecosystem Concept in Natural Resource Management George Van Dyne, 2012-12-02 The Ecosystem Concept in Natural Resource Management focuses on the ecosystem concept and its application to natural resource management. It presents examples of research concepts on natural resource phenomena and discusses ecosystem implications for natural resource management. It also covers range, forest, watershed, fisheries, and wildlife resource science and management. Organized into four sections encompassing 10 chapters, this volume begins with an overview of the meaning, origin, and importance of ecosystem concepts before proceeding with a discussion of field research projects that address the ecosystem concept and the ways in which the concept has been or can be useful in both research and management in natural resource sciences. More specifically, it explores major developments in the field of ecology in relation to natural resource management with examples from forest ecology. It also introduces the reader to procedures for studying grassland ecosystems, the watershed ecosystem concept, and studies of nutrient cycles, ecosystem concepts in forestry, ecosystem models in watershed management, and the implementation of the ecosystem concept in training in the natural resource sciences. This book is a valuable resource for scientists, educators, technicians, and training resource managers as well as students in resource management courses.

The Ecosystem Concept in Natural Resource Management George M. Van Dyne, 1971 [The Ecosystem Concept in Natural Resource Management](#) George M. Van Dyne, 1971 [The Ecosystem Concept in Natural Resource Management](#) George M. Van Dyne, 2013 [The Ecosystem Concept In Anthropology](#) Emilio F. Moran, Susan H. Lees, 2019-09-06 Critics of the ecosystem concept have noted the tendency of ecosystem-based studies to overemphasize energy flow, to rely on functionalist assumptions, to neglect historical and evolutionary factors, and to overlook the role of individuals as the locus of natural selection and decision making. In this volume, leading figures in the study of biological and human ecology evaluate these criticisms and propose ways to advance the state of knowledge in ecological research.

Managing Natural Resources for Development in Africa Washington Odongo Ochola, P. C. Sanginga, Isaac Bekalo, 2010 The complex and dynamic interlinks between natural resource management (NRM) and development have long been recognized by national and international research and development organizations and have generated voluminous literature. However, much of what is available in the form of university course books, practical learning manuals, and reference materials in NRM is based on experiences from outside Africa. *Managing Natural Resources for Development in Africa: A Resource Book* provides an understanding of the various levels at which NRM issues occur and are being addressed scientifically, economically, socially, and politically. The book's nine chapters present state-of-the-art perspectives within a holistic African context. The book systematically navigates the tricky landscape of integrated NRM with special reference to Eastern and Southern Africa against the backdrop of prevailing local, national, regional, and global social, economic, and environmental challenges. The authors' wide experience, the rich references made to emerging challenges and opportunities,

and the presentation of different tools principles approaches case studies and processes make the book a rich and valuable one stop resource for postgraduate students researchers policymakers and NRM practitioners The book is designed to help the reader grasp in depth NRM perspectives and presents innovative guidance for research design and problem solving including review questions learning activities and recommended further reading The book was developed through a writeshop process by a multi disciplinary team of lecturers from the University of Nairobi Egerton University Kenyatta University the University of Zimbabwe the University of Malawi Makerere University and the University of Dar es Salam In addition selected NRM experts from regional and international research organizations including the World Agroforestry Center ICRAF the Africa Forest Forum RUFORUM IIRR and the International Development Research Centre IDRC participated in the writeshop and contributed material to the book

Adaptive Management of Natural Resources

George H. Stankey, 2005 This report reviews the extensive and growing literature on the concept and application of adaptive management Adaptive management is a central element of the Northwest Forest Plan and there is a need for an informed understanding of the key theories concepts and frameworks upon which it is founded Literature from a diverse range of fields including social learning risk and uncertainty and institutional analysis was reviewed particularly as it related to application in an adaptive management context The review identifies opportunities as well as barriers that adaptive management faces It concludes by describing steps that must be taken to implement adaptive management

Ecosystem Planning in Florida Samuel David Brody,2016-04-29 While ecosystem management requires looking beyond specific jurisdiction and focusing on broad spatial scales most planning decisions particularly in the USA are made at local level By looking at land use planning in Florida this volume recognizes the need for planners and resource managers to address ecosystem problems at local and community levels The factors causing ecosystem decline such as rapid urban development and habitat fragmentation occur at the local level and are generated by local land use policies This book argues that understanding how local jurisdictions can capture and implement the principles of managing natural systems will lead to more sustainable levels of environmental planning in the future

Institutions and Sustainability Volker Beckmann,Martina

Padmanabhan,2009-02-07 From the first vague idea to use Konrad Hagedorn s 60th birthday as an inspi tion for taking stock of his vibrant academic contributions this joint book project has been a great pleasure for us in many ways Pursuing Hagedorn s intellectual development we have tried to reflect on the core questions of humanity according to Ernst Bloch Who are we Where do we come from and Where are we heading In this way and without knowing it Konrad Hagedorn initiated a c lective action process he would have very much enjoyed if he had been allowed to take part in it But it was our aim and constant motivation to surprise him with this collection of essays in his honour Konrad Hagedorn was reared as the youngest child of a peasant family on a small farm in the remote moorland of East Frisia Germany During his childhood in the poverty ridden years after the Second World War he faced a life where humans were heavily dependent on using nature around them for their livelihoods meanwhile he learned about the fragility of the environment As a boy he tended a one room schoolhouse where his great intellectual talents were first r ognised and used for co teaching his schoolmates These early teaching expe ences might have laid the foundations for his later becoming a dedicated lecturer and mentor

Natural Resource Management Issues in

Human-Influenced Landscapes Hemachandra, Dilini, Dissanayaka, Samantha, 2024-08-22 Researchers working on natural resource management issues in human influenced landscapes need to be able to elicit both biophysical and socio economic information and explore the interactions between these realms to identify appropriate management options Biophysical scientists are increasingly interested in researching natural resource management This however requires a sensitivity to the socio ecological dimensions in a landscape and at least a basic understanding of how to incorporate such in the research designing phase *Natural Resource Management Issues in Human Influenced Landscapes* documents the firsthand research designing experience of prolific researchers for the knowledge of budding researchers which is not usually shared in journal publications The chapters showcase cases narrated by the authors about their field experiences and cross country comparisons Covering topics such as biodiversity plant genetic resources and sustainable production this premier reference source is an essential resource for ecologists government officials students and educators of higher education librarians researchers and academicians

Encyclopedia of Environment and Society Paul Robbins, 2007-08-27 As befits the topic this beautifully packaged wonderfully illustrated interdisciplinary resource has more than 1200 entries written by specialists A helpful reader's guide groups topics like agriculture conservation and ecology movements and regulations politics pollution and society A resource guide chronology glossary and list of the UN's economic indicators complete the set Library Journal this important work gives a well focused snapshot of environmentalism in the early 21st Century and it will remain valuable into the future both for its content and as a yardstick to measure progress toward sustainability and conservation Summing Up Recommended Undergraduates and general readers CHOICE Booklist Editors Choice 2008 This superb interdisciplinary work should find a place on the shelves of every public and academic library that has the least bit of interest in environment issues which should mean just about all Booklist Starred Review Where does the environment leave off and society begin When expanding production and consumption drives greenhouse gas emissions that warm the planet which in turn influence the conditions of economic expansion it is unclear where the climate ends and the economy begins This fact is not new to our era however our social and natural sciences have only recently come to grips with the incredible complexity of the world

described by understanding the environment and society as being of a piece As a result in the last decade there has been an unprecedented explosion of new concepts theories facts and techniques that follow from such an understanding The Encyclopedia of Environment and Society brings together multiplying issues concepts theories examples problems and policies with the goal of clearly explicating an emerging way of thinking about people and nature With more than 1 200 entries written by experts from incredibly diverse fields this innovative resource is a first step toward diving into the deep pool of emerging knowledge The five volumes of this Encyclopedia represent more than a catalogue of terms Rather they capture the spirit of the moment a fascinating time when global warming and genetic engineering represent only two of the most obvious examples of socio environmental issues Key Features Examines many new ideas about how the world works what creates the daunting problems of our time and how such issues might be addressed whether by regulation markets or new ethics Demonstrates how theories of environmental management based on market efficiency may not be easily reconciled with those that focus on population and both may certainly diverge from those centering on ethics justice or labor Offers contributions from experts in their fields of specialty including geographers political scientists chemists anthropologists medical practitioners development experts and sociologists among many others Explores the emerging socio environmental problems that we face in the next century as well as the shifting and expanding theoretical tools available for tackling these problems Covers regions of North America in greater detail but also provides a comprehensive picture that approaches as effectively as possible a cohesive global vision Key Themes Agriculture Animals Biology and Chemistry Climate Conservation and Ecology Countries Geography History Movements and Regulations Organizations People Politics Pollution Society Packed with essential and up to date information on the state of the global socio environment the Encyclopedia of Environment and Society is a time capsule of its historic moment and a record of where we stand at the start of the 21st century making it a must have resource for any library These inspiring volumes provide an opportunity for more new ways of thinking behaving and living in a more than human world Selected Water Resources Abstracts ,1971-07

Environmental Management Nedjelko D. Suljak,1976 Application of Threshold Concepts in Natural Resource Decision Making Glenn R. Guntenspergen,2014-02-07 Natural resource managers face a complex decision making environment characterized by the potential occurrence of rapid and abrupt ecological change These abrupt changes are poorly accommodated by traditional natural resource planning and decision making processes As recognition of threshold processes has increased contemporary models of ecological systems have been modified to better represent a broader range of ecological system dynamics Key conceptual advances associated with the ideas of non linear responses the existence of multiple ecological stable states and critical thresholds are more likely the rule than the exception in ecological systems Once an ecological threshold is crossed the ecosystem in question is not likely to return to its previous state There are many examples and a general consensus that climatic disruptions will drive now stable systems across ecological thresholds This

book provides professional resource managers with a broad general decision framework that illustrates the utility of including ecological threshold concepts in natural resource management. It gives an entry into the literature in this rapidly evolving concept with descriptions and discussion of the promising statistical approaches for threshold detection and demonstrations of the utility of the threshold framework via a series of case studies.
