of environmental law and the implementation of the ecosystem approach as a means to maintain ecological integrity The main issue addressed is in which manner and to what extent does fragmentation and administrative discretion in environmental law impede the implementation of an ecosystem approach This is explored through analysis of several questions what is an ecosystem approach and how could it be implemented how can economic evaluation of ecosystem services contribute to the debate to what extent is environmental law fragmented and how does this affect the implementation of the ecosystem approach to what extent does environmental law contain administrative discretion and how does this affect the implementation of the ecosystem approach is there a need for greater consistency coherence and a stronger rule of law in environmental law in light of the ecosystem approach The main focus is on Europe with additional international comparisons where appropriate The book concludes by providing a normative portrayal of future environmental law as protective systemic and predictable

University Incubators and Their Role in the Entrepreneurial Ecosystem

Indiran, Logaiswari, Yanamandra, Ramakrishna, 2024-11-27 In recent years university incubators have come to play a crucial role in fostering entrepreneurship and innovation within higher education These incubators serve as breeding grounds for new ideas providing resources mentorship and a supportive environment for aspiring entrepreneurs to turn their concepts into viable businesses By integrating academic research with real world application university incubators help drive economic growth and contribute to the development of entrepreneurial ecosystems University Incubators and Their Role in the Entrepreneurial Ecosystem provides an in depth exploration of the strategies and models that make university incubators successful Covering key aspects like sustainable practices and technology integration this book offers insights into how these incubators foster entrepreneurship within higher education By presenting cutting edge research and case studies these chapters deepen scholarly conversation and inform best practices in the field making it an essential resource for academics practitioners and policymakers interested in university driven entrepreneurship and innovation

Informed Cities Marko Joas, Kate Theobald, David McGuinness, Cristina Garzillo, Stefan Kuhn, 2013-10-30 Informed Cities looks at the knowledge brokerage processes between cities and higher education institutions and in particular evaluates governance mechanisms for monitoring local sustainability and the role of research within this The first part of the book provides an analysis of tools for governing sustainable cities and develops a typology of existing tools It then considers approaches to monitor local sustainability on a European level focusing on a number of key tools such as the Covenant of Mayors Reference Framework for Sustainable Cities and Green Capital Award The second part of the book introduces an explorative application of two tools that the author team have used in practice to monitor local sustainability Urban Ecosystems Europe and Local Evaluation 21 presenting and evaluating European level data collected from local governments The third part of the book looks deeper into a number of case studies discussing how a working and rewarding city university connection can be created and nourished in an administrative and political setting Finally the last part of the book reflects on lessons learned from the application of the

tools and accompanying research process and makes recommendations for further developing monitoring tools for urban sustainability on a European level This book will be essential reading for professionals in urban and regional planning who are tasked with monitoring the effects of sustainability policies as well as for graduate students in planning environmental governance sustainable development and related disciplines *Urbanization, Biodiversity and Ecosystem Services: Challenges and Opportunities* Thomas Elmqvist, Michail Fragkias, Julie Goodness, Burak Güneralp, Peter J. Marcotullio, Robert I. McDonald, Susan Parnell, Maria Schewenius, Marte Sendstad, Karen C. Seto, Cathy Wilkinson, 2013-09-21 Urbanization is a global phenomenon and the book emphasizes that this is not just a social technological process It is also a social ecological process where cities are places for nature and where cities also are dependent on and have impacts on the biosphere at different scales from local to global The book is a global assessment and delivers four main conclusions Urban areas are expanding faster than urban populations Half the increase in urban land across the world over the next 20 years will occur in Asia with the most extensive change expected to take place in India and China Urban areas modify their local and regional climate through the urban heat island effect and by altering precipitation patterns which together will have significant impacts on net primary production ecosystem health and biodiversity Urban expansion will heavily draw on natural resources including water on a global scale and will often consume prime agricultural land with knock on effects on biodiversity and ecosystem services elsewhere Future urban expansion will often occur in areas where the capacity for formal governance is restricted which will constrain the protection of biodiversity and management of ecosystem services **Entrepreneurial Ecosystem** Mathew J Manimala, Kishinchand Poornima Wasdani, 2015-02-09 Economic development is a priority for all nation states whether developing or developed In recent times a few among the developing nations often referred to as the emerging economies have attracted the world's attention because of their fast pace of economic growth While the similarities among these nations for example the BRICS in the pattern of their economic growth are highlighted and discussed the differences are often glossed over This book therefore attempts to present the diverse ways in which entrepreneurship is facilitated in emerging economies through a compilation of research papers from six different countries India China Singapore Hong Kong Nigeria and New Zealand belonging to the class of emerging economies The papers included in this book cover a variety of topics related to the creation and management of an entrepreneurial ecosystem such as intercultural interactions IPR issues government policies for SMEs social entrepreneurship opportunity identification green entrepreneurship employee entrepreneurship symbiotic ventures and social capital social fluidity mapping for reducing failure stigma green awareness in the corporate world and among entrepreneurs venture capital for growth immigrant entrepreneurs entrepreneurial success and life satisfaction among others The contributions are supported by an introductory chapter that provides an integrative framework by unifying the diverse patterns of economic development in the different countries under various institutional inadequacies as a process of muddling through to development necessitated by the non

systematic development of the ecosystem for new venture creation This book is indeed a must read for those interested in understanding the process of entrepreneurship and economic development in emerging economies **Advances in**

Multi-scale Variability of Ecosystem Functioning in European and Chinese Shelf Seas Xueen Chen,Qicheng Meng,Jie Nie,Wenyan Zhang,Jun Sun ,Ute Daewel,2024-08-26

Continued global warming and ocean acidification are predicted with high confidence while the direction and magnitude of changes of other atmospheric drivers e g precipitation wind and nutrient loading are of high uncertainty and regionally dependent Biogeochemical responses of coastal shelf seas to external drivers are often nonlinear involving feedback that may amplify or dampen a perturbation imposed on the system Coupled physical biogeochemical process based numerical models have proven useful in elucidating the mechanistic interplay and relative importance of the different factors contributing to ecosystem functioning with increasing realism This research topic aims to understand and compare marine ecosystem functioning in Chinese and European shelf seas based on studies that use state of the art modeling and monitoring of coastal ecosystem dynamics This topic will enable more efficient knowledge share and distribution through a comparative assessment between distinct coastal shelf systems in China and Europe to further our understanding of complicated ecosystem dynamics in response to a changing climate and increasing anthropogenic pressure It will allow us to better understand the sensitivity of coastal shelf ecosystem functioning to physical and biogeochemical perturbations the role of shelf seas in global carbon cycling and the resilience of Chinese and European shelf seas to ongoing and future changes in climate and anthropogenic activities

Biodiversity in the Green Economy Alexandros Gasparatos,Katherine J. Willis,2015-06-05 In the past decade the growing realization that biodiversity and human wellbeing are inextricably linked has led to the adoption of numerous environmental policies The concept of the Green Economy has gained particular attention as an economic system where growth is possible within environmental limits The preservation of ecosystem services and the halt of biodiversity loss are identified as key pillars of the Green Economy Despite the concept s momentum there is still no clear understanding of how biodiversity fits within a Green Economy In the current debate biodiversity is rarely acknowledged in economic sectors other than agriculture forestry fisheries and tourism and when it is acknowledged biodiversity and its conservation feature more as buzzwords than as concrete and tangible components of the Green Economy This book aims to identify understand and offer pragmatic recommendations of how biodiversity conservation can become an agent of green economic development This book establishes ways to assess biodiversity s contributions to the economy and to meaningfully integrate biodiversity concerns in green economy policies
