Ecological Thinking A New Approach To Educational Change:

Ecological Thinking Shoshanah Keni, 2002 In *Ecological Thinking* Shoshana Keiny relates the arguments of this book to the new ecological paradigm based on open instead of closed systems which see humans not as outsiders but as part of the system Keiny uses the term ecological thinking as a holistic framework for thinking about ways in which teachers need to be engaged in participatory interactive learning processes which seek to generate new understanding and knowledge that changes their professional context Ecological Thinking is based on several projects in which teacher educators researchers parents and or other members of the community collaborated in order to jointly transform education Written as a personal narrative Keiny illustrates an Action Research process that emphasizes the interplay between praxis and theory **The SAGE Handbook of Educational Action Research** Susan E Noffke, Bridget Somekh, 2009-05-07 This handbook presents and critiques predominant and emergent traditions of Educational Action Research internationally Now a prominent methodology Educational Action Research is well suited to exploring developing and sustaining change processes both in classrooms and whole organisations such as schools Departments of Education and many segments of universities The handbook contains theoretical and practical based chapters by highly respected scholars whose work has been seminal in building knowledge and expertise in the field It also contains chapters exemplifying the work of prominent practitioner and community groups working outside universities The Editors provide an introduction and conclusion as well as an opening chapter which charts the historical development of action research and provides an analysis of its underlying theories The handbook is organized into four sections each beginning with a short introduction Action research methodology diversity of rationales and practices Professional Knowledge production staff development and the status of educators Personal Self awareness development and identity Political Popular knowledge difference and frameworks for change This is a key resource for scholars and graduate students at doctors and masters levels as well as school leaders and administrators Susan Noffke is Associate Professor of Curriculum Instruction at the University of Illinois Urbana Champaign and co editor with R B Stevenson of *Educational Action Research* Teachers College Press 1995 She taught at the primary school level for a decade and has led masters and doctoral level courses in action research for the past 20 years She continues to work with many collaborative projects with schools and school districts Bridget Somekh is Professor of Educational Research at Manchester Metropolitan University UK She is a founder editor of the *Educational Action Research* journal and has been a co ordinator of the Collaborative Action Research Network CARN for many years She is co editor of *Research Methods in the Social Sciences* SAGE 2005 and author of *Action Research a Methodology for Change and Development* Open University Press 2006 *The SAGE Handbook of Educational Action Research* Bridget Somekh, 2009-05-19 There has been a huge growth of interest in action research in educational settings over the past 20 years across the Americas Europe Australia and Africa this Handbook provides a scholarly reference text that will inform the development of the field *Environmental Education and Advocacy*

Edward A. Johnson, Michael J. Mappin, 2005-03-03 Environmental education has often blurred the distinction between ecological science and environmental advocacy Growing public awareness of environmental problems and desire for action may be contributing to this blurring There is a need to clarify the distinction between the role of ecological science and the role of social and political values for the environment within environmental education This book addresses this need by examining the changing perspectives of ecology in education and the changing perspectives of education in environmental education Guidelines are provided for assessing the science and education perspectives within environmental education along with suggested frameworks for development of programs and resources that integrate current science education and action This book will be of interest to environmental educators ecologists interested in environmental education and curriculum and resource developers
