**Economic Change and the National Question in Twentieth-Century Europe** Alice Teichova, Herbert Matis, Jaroslav Pátek, 2000-11-30 The authors in this collection of essays address the largely neglected but significant economic aspects of the national question in its historical context during the course of the twentieth century There exists a large gap in our understanding of the historical relationship between the national question and economic change Above all there is insufficient knowledge about the economic dimension of the historical experience with regard to the former multi national states such as the Soviet Union Yugoslavia or Czechoslovakia and equally too little is known about the economic component of national tensions and conflicts in bilingual Belgium or Finland or the multilingual Spain or Switzerland At the same time as emphasis is placed on the complex relationships between the economy and society in individual European countries questions of state identity language religion and racism as instruments of economic furtherance are at the centre of the contributors attention

*The Making of the Slovak People's Party* Thomas Lorman, 2019-05-30 Winner of the BASEES George Blazycza Prize In 1945 just six years after coming to power the Slovak People's Party SLS was disbanded as a criminal organisation and its leader Jozef Tiso hanged for treason What made it possible for the SLS initially founded in 1905 by priests to represent the Catholic Slovak minority residing in the north of the Kingdom of Hungary to form an openly pro Nazi government in 1939 And what put Slovakia on the path to a fascism that would see more than 45 000 Jews deported to their deaths in 1942 To answer these questions Thomas Lorman draws on more than a decade's research in archives across the region in Hungarian Slovak and Latin and studies the party's formative years in depth for the first time in English Lorman examines the various strands which fused to form the party and its popularity including a complex and nebulous nationalism Catholicism and a resounding mistrust of liberalism and modernity *The Making of the Slovak People's Party* is a vital and timely study of the genesis and success of far right movements that will be essential reading for all scholars working on 20th century Eastern European history nationalism and the interplay of religion and politics

*The Political Economy of Interwar Foreign Investment* Jerzy Łazor, 2024-04-30 France was interwar Poland's main ally and the biggest source of the country's foreign investment The two roles were closely connected Paris used its position in Warsaw to win preferential treatment for its firms while Polish authorities depended on France to finance their modernization policies and military spending The relationship's asymmetric character bred conflict and in the 1930s dissenting voices compared French actions in Poland to imperialism and colonial expansion This book untangles the complex mix of economics policy and politics in Franco Polish relations Based on government and company level sources it evaluates the part played by French capital in Poland and discovers the mechanisms ruling French FDI and public loans Exploring case studies of specific sectors and themes it asks questions about the modernizing potential of FDI interwar economic imperialism the workings of asymmetric investment and the interactions between investments and politics Understanding the unequal footing of Warsaw and Paris it goes beyond

imperialistic interpretations and examines the leeway available to the weaker partner of the relationship The book contributes to economic history of Central and Eastern Europe and more generally to our understanding of the position of peripheral countries in the interwar global system Controversial Heritage and Divided Memories from the Nineteenth Through the Twentieth Centuries Marco Folin, Heleni Porfyriou, 2020-09-06 What is the role of cultural heritage in multi ethnic societies where cultural memory is often polarized by antagonistic identity traditions Is it possible for monuments that are generally considered as a symbol of national unity to become emblems of the conflictual histories still undermining divided societies Taking as a starting point the cosmopolitanism that blossomed across the Mediterranean in the age of empires this book addresses the issue of heritage exploring the concepts of memory culture monuments and their uses in different case studies ranging from 19th century Salonica Port Said the Palestinian region under Ottoman rule Trieste and Rijeka under the Hapsburgs up to the recent post war reconstructions of Beirut and Sarajevo *The Politics of Decimalisation in the UK* Andy Cook, 2021-12-14 The introduction of decimal currency in the UK and Ireland in February 1971 is a subject strangely neglected by historians of the period despite it being a change which affected the daily life of everyone living in the British Isles at the time Most histories of the 1960s and 1970s treat it as a mere footnote an administrative reform of little significance or ignore it altogether What commentary there has been tends to be ill informed seeing decimalisation either as a harbinger of creeping Europeanisation or the trigger for the inflation of the mid 1970s or both 50 years after D Day there has been no comprehensive historical study of decimalisation other than an official account by the secretary to the Decimal Currency Board Noel Moore in 1973 This ground breaking work debunks the myths around the decimalisation project and demonstrates through an extensive examination of official documents and contemporary media reports that the reform was an essentially conservative one Far from ditching tradition in favour of Euro normality by retaining the pound as the heaviest currency in the developed world the UK government keen to maintain the supposed prestige of Sterling effectively defended British exceptionalism Only in the Irish Republic was the issue of compatibility with the currencies of Western Europe seriously considered In examining the debates around decimalisation in Britain and Ireland from the mid 1950s through to 1971 this book fills a gap in the historiography and through the prism of decimalisation nuances our understanding of both the internal politics of the UK and Ireland and relationships with Europe and the Commonwealth **Nationalism in a Global World** Sam Pryke, 2017-09-16 What can globalization studies tell us about national identity This text looks at historical and contemporary debates to assess the key issues of nationalism and national identity from economic nationalism to cultural homogenisation Setting issues in a global context and packed with examples this is an important and engaging student text **Salazar** Filipe Ribeiro de Meneses, 2023-12-05 Salazar A Political Biography is the definitive biography of the longstanding Portuguese dictator Ant nio de Oliveira Salazar entered the government of Portugal when Herbert Hoover was president and ended his political career at the end of the Johnson

administration He remained in power for forty years 1928-1968 one of the longest tenures in modern history Unlike the other great dictators of the twentieth century Salazar an academic immersed himself in the minutiae of government and administration maintaining a prodigious work rate until illness forced his retirement He successfully managed his country's finances despite the impact of the Great Depression imposing a harsh policy of austerity He then preserved Portugal's neutrality during the Second World War ultimately favouring Great Britain and the United States But Salazar was at heart an extremely conservative even reactionary statesman He relied on secrecy and a police state to maintain the order which he believed was necessary to control progress Rejecting the anti colonialist movements in Asia and Africa he plunged Portugal into a series of wars in Africa it could ill afford Fully revised and updated throughout this remains the authoritative biography of a key Portuguese political leader who was a significant presence in twentieth century politics This book will be of interest to historians of the far right international diplomacy and Portugal Salazar de Filipe, 2010-06-23 The only complete political biography by a major Portuguese historian **Creating Nordic Capitalism** Susanna Fellman, Martin Jes Iversen, Hans Sjögren, Lars Thue, 2017-09-16 Creating Nordic Capitalism illuminates how the economies of five small North European countries Denmark Finland Norway Iceland and Sweden became so competitive during the twentieth century Through rigorous analysis the authors propose and describe the defining features of Nordic capitalism **The Road to Home Rule** Paul A. Townsend, 2016-11-22 Shows that a rising antipathy in Ireland toward Victorian Britain's expanding global imperialism was a crucial factor in popular support for Irish Home Rule *Business and Politics in Europe, 1900-1970* Terry Gourvish, 2003-08-28 This book reflects an increased interest in establishing connections between the political history and the business history of Europe in the twentieth century The book includes research on the interactions of politicians businessmen and their institutions in eight countries with particular focus on the highly charged inter war period Fourteen essays cover subjects under four main headings the business politics paradigm banking finance business and politics in the National Socialist period and the business community and the state Together they form a fitting tribute to the academic scholarship and inspiration offered by Alice Teichova In her distinguished career and in particular after the publication of her path breaking book *An Economic Background to Munich* in 1974 she did much to stimulate a collaborative approach to international comparative work in the field of economic political and business history The case studies presented here demonstrate her considerable legacy to the subject Nation, State and the Economy in History Alice Teichova, Herbert Matis, 2003-05-08 Originally published in 2003 this book addresses the rarely explored subject of the reciprocal relationships between nationalism nation and state building and economic change Analysis of the economic element in the building of nations and states cannot be confined to Europe and therefore these diverse yet interlinked case studies cover all continents Authors come to contrasting conclusions some regarding the economic factor as central while others show that nation states came into being before the constitution of a national market The essays leave no doubt that

the nation state is an historical phenomenon and as such is liable to expiry both through the process of globalisation and through the development of a cyber society which evades state control. By contrast developments in southeastern Europe, the former USSR and parts of Africa and the Far East show that building the nation state has not run its course.

Capitalism in Chaos Máté Rigó, 2022-08-15 Capitalism in Chaos explores an often overlooked consequence and paradox of the First World War: the prosperity of business elites and bankers in service of the war effort during the destruction of capital and wealth by belligerent armies. This study of business life amid war and massive geopolitical changes follows industrialists and policymakers in Central Europe as the region became crucially important for German and subsequently French plans of economic and geopolitical expansion in the late nineteenth and early twentieth centuries. Based on extensive research in sixteen archives, five languages and four states, Máté Rigó demonstrates that wartime destruction and the birth of war millionaires were two sides of the same coin. Despite the recent centenaries of the Great War and the Versailles peace treaties, knowledge of the overall impact of war and border changes on business life remains sporadic, based on scant statistics and misleading national foci. Consequently, most histories remain wedded to the viewpoint of national governments and commercial connections across national borders. Capitalism in Chaos changes the static historical perspective by presenting Europe's East as the economic engine of the continent. Rigó accomplishes this paradigm shift by focusing on both supranational regions including East Central and Western Europe as well as the eastern and western peripheries of Central Europe: Alsace, Lorraine and Transylvania from the 1870s until the 1920s. As a result, Capitalism in Chaos offers a concrete, lively history of economics during major world crises with a contemporary consciousness toward inequality and disparity during a time of collapse.

Nations Apart Radka Šustrová, 2024-02-15 Focusing on the striking contradiction between destruction and care, violent repression and the simultaneous development of the welfare state, Nations Apart brings a new revisionist interpretation of an occupied society.

Europe and the Post-Yugoslav Space Branislav Radeljic, 2016-04-22 Charting the path from intervention to integration, Europe and the Post-Yugoslav Space examines the role of Europeanization on the development of the countries of the former Yugoslavia: Slovenia, Croatia, Macedonia, Montenegro, Serbia, Bosnia and Herzegovina, and Kosovo. They may have a shared history, but their experiences, views, and attitudes to European integration vary dramatically. Opinion within each state is often equally as keenly divided as to the benefits of active membership. The debate within each country and their comparative differences in approach provide fascinating case studies on the importance and relevance of the EU and the effectiveness of Europeanization. A wide range of contributors with significant experience gained within the EU, as well as their country of origin, use their expert understanding of the language and cultures of the countries concerned to provide detailed and rich insights into the troubled history and potential of the post-Yugoslav space.

*Paying for the Liberal State* José Luís Cardoso, Pedro Lains, 2010-02-08 Public finance is a major feature of the development of modern European societies, and it is at the heart of the definition of the nature of political regimes. Public finance is also a

most relevant issue in the understanding of the constraints and possibilities of economic development This book is about the rise and development of taxation systems expenditure programs and debt regimes in Europe from the early nineteenth century to the beginning of World War I Its main purpose is to describe and explain the process by which financial resources were raised and managed The volume presents studies of nine countries or empires that are considered highly representative of the widest European experience on the matter and discusses whether there are any common patterns in the way the different European states responded to the need for raising additional resources to pay for the new tasks they were performing

**Nationalism and Ethnic Conflict** Berch Berberoglu, 2005-12-13 This book examines the origins and development of nationalism and national movements in the twentieth century and provides an analysis of the nature and dynamics of nationalism and ethnic conflict in a variety of national settings Examining the intricate relationship between class state and nation the book attempts to develop a critical approach to the study of nationalism and ethnonational conflict within the broader context of class relations and class struggles in the age of globalization The book consists of three parts made up of seven chapters Part I examines classical and contemporary conventional and Marxist theories of nationalism Part II provides a series of empirical comparisons of nationalism and ethnic conflict on a world scale focusing on the Third World the advanced capitalist countries and Eastern Europe and the former Soviet Union A highlight of this section of the book is a detailed comparative case study of the Palestinian and Kurdish nationalism and national movements Part III provides a political analysis of the relationship between class state and nation and lays out the class nature of nationalism and the role of the state in ethnonational conflicts that are the political manifestations of deeper class struggles that have been the driving force of nationalism and ethnic conflict in the era of globalization Berberoglu contends that future studies of nationalism and ethnonational conflict must pay closer attention to the dynamics of class forces that are behind the ideology of nationalism by examining national movements in class terms For only through a careful class analysis of these forces and their ideological edicts will we be able to clearly understand the nature of nationalism and ethnonational conflicts around the world
