**Mipes;Econ Lib Democ Civil Soci** NA NA,2014-01-14 This 12 country comparative volume examines the impact of economic structural adjustment programs upon grassroots civil associations and the implications for political liberalization and democratization in the developing countries of Latin America Africa Asia and the Middle East The authors take an in depth look at the impact of economic reform upon women s groups human rights organizations social welfare non governmental organizations unions and business associations They challenge the prevailing assumption that economic reform will automatically lead to greater democratization Economic Liberalization, Democratization and Civil Society in the Developing World R. Bensabat-Kleinberg,J. Clark,2000-06-22 This twelve country comparative volume examines the impact of economic structural adjustment programmes upon grassroots civil association and the implications for political liberalisation and democratization in the developing countries of Latin America Africa Asia and the Middle East The authors take an in depth look at the impact of economic reform upon women s groups human rights organisations social welfare non governmental organisations unions and business associations They challenge the prevailing assumption that economic reform will automatically lead to greater democratization **Economic Liberalization and Authoritarianism** Christian Neugebauer,2021-11-29 Contrary to other world regions political regimes in the Middle East and North Africa MENA remain largely authoritarian While the search for explanations is still ongoing Christian Neugebauer draws attention to a hitherto underresearched factor economic liberalization Being part of a global shift from state led development towards structural adjustment in the economy these policies also deeply affected the countries of the MENA region This makes the resilience of authoritarianism in the region all the more puzzling as a large part of the scientific community expected economic liberalization to undermine authoritarian regimes Neugebauer strives to solve the puzzle with a comparative case study that covers four countries Egypt Tunisia Jordan and Morocco and their political regimes from independence in the 1950s to the Arab Spring in 2011 He shows that two specific policies of economic liberalization might in fact have been relevant for regime stability consumer price liberalization and privatization *The Role of Civil Society in Africa's Quest for Democratization* Abadir M. Ibrahim,2016-12-08 This book tests many of the assumptions hypotheses and conclusions connected with the presumed role of civil society organizations in the democratization of African countries Taking a comparative approach it looks at countries that have successfully democratized those that are stuck between progress and regression those that have regressed into dictatorship and those that are currently in transitional flux and evaluates what role if any civil society has played in each instance The countries discussed South Africa Ghana Nigeria Ethiopia Egypt and Tunisia represent a diverse set of social and political circumstances and different levels of democratic achievement providing a rich set of case studies Each sample state also offers an internal comparison as each has historically experienced different stages of democratization Along the course of each case study the book also considers the effect that other traditionally

studied factors such as culture colonization economic development and foreign aid may have had on individual attempts at democratization The first extensive work on civil society and democratization in Africa the book adds new insights to the applicability of democratization theory in a non Western context both filling a gap in and adding to the existing universal scholarship This book will be useful for scholars of political science economics sociology and African studies as well as human rights activists and policy makers in the relevant geographical areas Civil Society and Women Activists in the Middle East Wanda Krause,2012-05-27 In the Middle East and in Egypt in particular there has always been a tendency to accord complete supremacy to the authority and might of the state and to see society as a separate powerless entity However after the uprising of 2011 this assumption was turned on its head And it is the wide range of political activity beyond the remit of the official state where Wanda Krause locates a dynamic potential for political change from the bottom up She looks in particular at the influential role of women s private voluntary organisations in Egypt in shaping concepts of civil society and democracy Exploring both secular and Islamist organisations she offers a steadfast critique of the view that Islamic women activists are insignificant backward or uncivil Krause s examination of women activists in Egypt today is vital for those interested in Middle East and Gender Studies as well as those researching the wider issues of civil society and democratisation Development, Civil Society and Faith-Based Organizations G. Clarke,M. Jennings,T. Shaw,2007-11-28 This book examines the role of faith based organizations in managing international aid providing services defending human rights and protecting democracy It argues that greater engagement with faith communities and organizations is needed and questions traditional secularism that has underpinned development policy and practice in the North *The Illusion of Civil Society* Jon Shefner,2012-05-31 Much has been written about how civil society challenges authoritarian governments and helps lead the way to democratization These studies show that neoliberal economic policies have harmed many sectors of society weakening the state and undermining clientelistic relationships that previously provided material benefits to middle and low income citizens who are then motivated to organize coalitions to work for greater social justice and equality Recognizing this important role played by civil society organizations Jon Shefner goes further and analyzes the variegated nature of the interests represented in these coalitions arguing that the differences among civil society actors are at least as important as their similarities in explaining how they function and what success or lack thereof they have experienced Through an ethnographic examination extending over a decade Shefner tells the story of how a poor community on the urban fringe of Guadalajara mobilized through an organization called the Uni n de Colonos Independientes UCI to work for economic improvement with the support of Jesuits inspired by liberation theology Yet Mexico s successful formal democratic transition won with the elections in 2000 was followed by the dissolution of the coalition Neither political access for the urban poor nor their material well being has increased with democratization The unity and even the concept of civil society has thus turned out to be an illusion Contesting the Repressive State Kira D. Jomet,2018 This book advances research on

the collective action dilemma in protest movements by examining protest mobilization leading up to and during the 2011 Egyptian Revolution and 2013 June 30th Coup in Cairo Egypt The book is organized chronologically and touches on why and how people make the decision to protest or not protest during different periods of the revolutionary process The overarching question is Why and how do individuals who are not members of political groups or organizers of political movements choose to engage or not engage in anti government protest under a repressive regime In answering the question the book argues that individual decisions to protest or not protest are based on the intersection of the following three factors political opportunity structures mobilizing structures and framing processes It further demonstrates that the way these decisions to protest or not protest take place is through emotional mechanisms that are activated by specific combinations of these factors The goal of the book is to investigate the relationship between key structural factors and the emotional responses they produce By examining 170 interviews with individuals who either protested or did not protest it explores how social media violent government repression changes in political opportunities and the military influenced individual decisions to protest or not protest

*Arab Spring* Kjetil Fosshagen,2014-03 The events of the Arab Spring presented a dramatic reconstitution of politics and the public sphere through their aesthetic and performative uses of public space Mass demonstrations have become a new global political form grounded in the localization of globalizing processes institutions and relationships This volume delves beneath the seemingly chaotic nature of events to explore the structural dynamics underpinning popular resistance and their support or suppression It moves beyond what has usually been defined as Arab Spring nations to include critical views on Bahrain the Palestinian territories and Turkey The research and analysis presented explores not just the immediate protests but also the historical realization appropriation and even institutionalization of these critical voices as well as the role of international criminal law and legal exceptionalism in authorizing humanitarian interventions Above all it questions whether the revolutions have since been hijacked and the broad popular uprisings already overrun suppressed or usurped by the upper classes

Youth Activism in Egypt Ahmed Tohamy,2016-08-24 In this book Ahmed Tohamy analyses the often neglected trajectory that led up to the protests in Egypt that culminated in the fall of Hosni Mubarak in February 2011 Tohamy s assertion is that by examining the decade preceding this momentous event we see that the youth movement far from being inert was extremely active Tohamy uses the Social Movements Theory to argue how Egyptian youth became a new agent of change in the Middle East By positioning the youth activists as dynamically engaging with their social and political contexts within a framework of opportunities and constraints his analysis strikes at the heart of the debates concerning the nature and substance of revolution and its effects on state and society
