Selfe,1999-11-03 Part critique of existing policy and practice part call to action Technology and Literacy in the Twenty First Century explores the complex linkage between technology and literacy that has come to characterize American culture and its public educational system at the end of the twentieth century To provide a specific case study of this complex cultural formation award winning educator Cynthia L Selfe discusses the Technology Literacy Challenge an official federally sponsored literacy project begun in 1996 that has changed at fundamentally important levels the definition of literacy and the practices recognized as constituting literate behavior in America Selfe tries to identify the effects of this new literacy agenda focusing specifically on what she calls serious and shameful inequities it fosters in our culture and in the public education system among them the continuing presence of racism poverty and illiteracy She describes how the national project to expand technological literacy came about what effects it has yielded why the American public has supported this project and how teachers of English language arts and composition have contributed to this project despite their best intentions A primary goal of this study is to make teachers of English and composition increasingly aware of the new literacy agenda and to suggest how they might positively influence its shape and future direction both in the classroom and in the community This awareness is an integral part of educators larger professional responsibility to understand the way in which our culture thinks about and values literacy Perhaps even more important argues Selfe this awareness is part of teachers ethical responsibility to understand how literacy and literacy instruction directly and continually affect the lived experiences of the individuals and families with whom teachers interact

Theorizing Composition Mary Kennedy, 1998-06-25 The last 25 years have witnessed extraordinary growth in the academic specialization variously described as composition studies or rhetoric and composition What was noticeable about the field in its infancy was a preoccupation with practice a lack of emphasis on theory and an exclusive reliance on the writing process As its disciplinary status has grown the field has become far more theoretical Composition studies has expanded its focus reconceptualized the writing process and embraced a wide range of critical perspectives The result of this change is that terms such as poststructuralism social construction gender and genre which were largely unknown in 1965 now dominate discussion This reference book is a guide to the multiplicity of theories that have emerged to form the disciplinary foundation of composition studies The volume consists of 66 entries each of which is written by an expert contributor and focuses on a particular theory or group of theories While the entries show how various individuals have contributed to theoretical movements very few concentrate on the work of a single theorist Each entry first provides a critical summary of a particular theory or group of theories including key elements basic concepts and claims and information about seminal or particularly influential works It then reviews the theory's critical reception in composition studies and discusses its significance in the field The bibliography at the end of each entry lists primary texts and major scholarship related to the theory and provides additional suggestions for further reading The volume closes with a selected bibliography of important works
