Drew, 2015-01-28 Decisions about when where and why to commit the United States to the use of force and how to conduct warfare and ultimately end it are hotly debated not only contemporaneously but also for decades afterward We are engaged in such a debate today quite often without a solid grounding in the country's experience of war both political and military This book by

a political scientist and a career military officer and historian is premised on the view that we cannot afford that kind of innocence Updated and revised with new chapters on the Afghan and Iraq wars the book systematically examines twelve U S wars from the revolution to the present day For each conflict the authors review underlying issues and events political objectives military objectives and strategy political considerations military technology and technique military conduct and the better state of the peace that is the ultimate disposition of the original political goals **Reader's Guide to Military**

**Britain Daylight Defeat** Dilip Sarkar, 2025-07-10 Sarkar's sixth volume examines the fourth phase of the Battle of Britain detailing Luftwaffe failures and Britain's resilience. In this the sixth of Dilip Sarkar's unprecedented eight volume series the day by day events occurring in the fourth phase of the Battle of Britain are chronicled and set within a much wider context including the operations of Bomber and Coastal Commands and the Home Front. Renowned for his evidence based approach the author has returned to primary sources the analysis arising often challenging our previous understanding and the popular narrative. In Volume 5 Target London 7 September 1940 17 September 1940 the beginning of the Blitz was explored at length. This illuminated the inescapable fact that Luftwaffe air intelligence completely failed to understand how Fighter Command was organised and controlled nor that it was replacement pilots not aircraft that was Air Chief Marshal Dowding's greatest concern. Indeed on 15 September 1940 Luftwaffe aircrews were briefed to expect but a token resistance over London from the last handful of RAF fighters their morale shattered when their first attack was met by over 300 the second by nearly as many. This convinced Hitler that the Luftwaffe could not achieve the aerial superiority needed for the invasion of Britain to proceed. Two days later Operation Seelowe was postponed indefinitely. Reichsmarschall Herman Goering however still believed that the Luftwaffe could prevail and so continued attacking the UK changing tack yet again. As London had proved it could take it the Luftwaffe whilst continuing to bomb the capital by night now focussed its daylight attacks on the British aircraft industry. Naturally the Supermarine Spitfire factory at Southampton was a primary target it was subsequently badly hit with great loss of life. Other factories in the West Country were also targeted and owing to a navigation error due to cloud cover the picturesque town of Sherborne was devastated on 30 September 1940. By that date however it was clear that Goering's He 111 force was unable to continue absorbing such losses and the type was exclusively switched to night bombing thereby substantially reducing the German daylight bombing force. On 20 September 1940 Me 109 fighter bombers attacked London and going forward the next and final phase would see such attacks and high flying fighter sweeps dominate the daytime arena. Such raids though were never going to defeat Britain so it is fair to say that the period reviewed in this volume really did see the Daylight defeat of the Luftwaffe over England in 1940 and the events involved are interpreted and recounted in great detail.

**The Secret History of RDX** Colin F. Baxter, 2018-05-18 The noted historian offers a compelling sociohistorical account of an often overlooked yet critical WWII explosive twice as powerful as TNT. Choice. During the early years of World War II American ships crossing the Atlantic were virtually defenseless against German U boats. Bombs and torpedoes fitted with TNT barely dented the hulls of Axis naval vessels. Then seemingly overnight a top secret manufacturing plant appeared near Kingsport Tennessee producing a sugar white substance called Research Department Explosive code name RDX. Twice as deadly as TNT and overshadowed only by the atomic bomb RDX proved to be pivotal in the Battle of the Atlantic and directly contributed to the Allied victory in WWII. In *The Secret History of RDX* Colin F. Baxter documents the journey of the super explosive from conceptualization at Woolwich Arsenal in England to mass production at Holston

Ordnance Works in east Tennessee Baxter examines the debates between RDX advocates and their opponents and explores the use of the explosive in the bomber war over Germany in the naval war in the Atlantic and as a key element in the trigger device of the atomic bomb Drawing on archival records and interviews with individuals who worked at the Kingsport powder plant Baxter illuminates both the explosive s military significance and its impact on the lives of ordinary Americans involved in the war industry Much more than a technical account this study assesses the social and economic impact of the military industrial complex on small communities on the home front *American Airpower Comes of Age* General Henry H.

C.

Peden,2007-02-08 This book integrates strategy technology and economics and presents a new way of looking at twentieth century military history and Britain s decline as a great power G C Peden explores how from the Edwardian era to the 1960s warfare was transformed by a series of innovations including dreadnoughts submarines aircraft tanks radar nuclear weapons and guided missiles He shows that the cost of these new weapons tended to rise more quickly than national income and argues that strategy had to be adapted to take account of both the increased potency of new weapons and the economy s diminishing ability to sustain armed forces of a given size Prior to the development of nuclear weapons British strategy was

based on an ability to wear down an enemy through blockade attrition in the First World War and strategic bombing in the Second and therefore power rested as much on economic strength as on armaments      *American Airpower Comes of Age: General Henry H.
