**Building Surveys and Reports** James Douglas,2010-12-13 This book provides guidance on building survey work for typical residential commercial and industrial buildings with advice on how to diagnose a wide range of defects It considers both modern and older construction methods together with new and traditional materials The particular problems of alteration and renovation work are discussed with guidance on how to carry out measured surveys A separate chapter covers survey problems after flood and fire damage and the legal section takes account of recent developments in case law relating to inspections and surveys of properties This new edition continues to provide a thorough treatment of all the key issues relating to surveying buildings dealing with the problems that surveyors are likely to

encounter when inspecting buildings Changes for the new edition include Examples and references have been updated  
 Evaluation of condition rating systems for domestic and commercial buildings A new section on the home condition reports  
 More information on slate defects Bibliography revised and expanded to make it more comprehensive Additional appendix  
 showing the home condition report format      **Building Adaptation** James Douglas, 2006-08-11 As existing buildings age  
 nearly half of all construction activity in Britain is related to maintenance refurbishment and conversions Building adaptation  
 is an activity that continues to make a significant contribution to the workload of the construction industry Given its  
 importance to sustainable construction the proportion of adaptation works in relation to new build is likely to remain  
 substantial for the foreseeable future especially in the developed parts of the world Building Adaptation Second Edition is  
 intended as a primer on the physical changes that can affect older properties It demonstrates the general principles  
 techniques and processes needed when existing buildings must undergo alteration conversion extension improvement or  
 refurbishment The publication of the first edition of Building Adaptation reflected the upsurge in refurbishment work The  
 book quickly established itself as one of the core texts for building surveying students and others on undergraduate and  
 postgraduate built environment courses This new edition continues to provide a comprehensive introduction to all the key  
 issues relating to the adaptation of buildings It deals with any work to a building over and above maintenance to change its  
 capacity function or performance      **La permanenza in architettura** Aa.Vv., 2011-11-10T00:00:00+01:00 Il termine  
 permanenza riferito all'architettura significa mantenimento e affermazione nel tempo dei valori tecnici funzionali e simbolici  
 degli edifici indica una precisa categoria di vita utile Sul piano operativo richiama anche la programmazione della durata e il  
 progetto della obsolescenza fisica e funzionale un'azione prioritaria il cui controllo acquisisce valore strategico ai fini della  
 realizzazione stessa dell'intervento Oggi al concetto di permanenza sempre più spesso contrapposto quello di temporaneità due  
 paradigmi che nella loro contrapposizione toccano e per questo ci inducono a indagare importanti questioni di politica  
 tecnica ed edilizia con significative ricadute anche su altri campi come l'economia e soprattutto le politiche ambientali In  
 altre parole giusto che il tema della programmazione della durata edilizia si affianchi sempre più all'esigenza di un uso più  
 razionale delle risorse disponibili Del tema il testo propone riflessioni sui termini storici terminologici e problematici e in  
 conclusione su alcune questioni prettamente operative The word permanence when related to architecture means  
 maintaining and assurance of technical functional and symbolic values of buildings during the time it denotes a specific  
 category of service life At operational level it also refers to service life planning and to management of physical and  
 functional obsolescence an overriding action whose control takes on a strategic value in order to project construction in itself  
 Today it is more and more often contrasted the idea of permanence besides that of temporariness two paradigms that in their  
 opposition concern and owing to this persuade us to investigate important matters related to technical and construction  
 politics with meaningful consequences on other fields too as well as economy and above all environmental politics In other

words it is right that service life planning of buildings comes more and more abreast of need of a more rational use of available resources On such theme the work proposes some notes about historical terminological and problematic background and last of all on some typically operational issues Massimo Lauria Reggio Calabria 1964 architetto professore associato di Tecnologia dell'Architettura presso la Facoltà di Architettura dell'Università Mediterranea di Reggio Calabria Svolge attività di ricerca nell'Unità Operativa STOA del Dipartimento Arte Scienza e Tecnica del Costruire nel campo della progettazione dell'esistente con particolare attenzione ai temi della riqualificazione tecnologica e della manutenzione edilizia
