Battista, 2018-12-07 This unique volume surveys recent research on spatial visualization in mathematics in the fields of  
cognitive psychology and mathematics education The general topic of spatial skill and mathematics has a long research  
tradition but has been gaining attention in recent years although much of this research happens in disconnected subfields  
This volume aims to promote interaction between researchers not only to provide a more comprehensive view of spatial  
visualization and mathematics but also to stimulate innovative new directions in research based on a more coordinated effort  
It features ten chapters authored by leading researchers in cognitive psychology and mathematics education as well as  
includes dynamic commentaries by mathematics education researchers on cognitive psychology chapters and by cognitive  
psychologists on mathematics education chapters Among the topics included From intuitive spatial measurement to  
understanding of units Spatial reasoning a critical problem solving tool in children s mathematics strategy tool kit What  
processes underlie the relation between spatial skill and mathematics Learning with and from drawing in early years  
geometry Communication of visual information and complexity of reasoning by mathematically talented students Visualizing  
Mathematics makes substantial progress in understanding the role of spatial reasoning in mathematical thought and in  
connecting various subfields of research It promises to make an impact among psychologists education scholars and  
mathematics educators in the convergence of psychology and education      *Harcourt Math* , 2003-03      **Canadian Books**
