Originally published as a single volume. The Heart of Listening has been reissued as two separate volumes because of public demand for a more concise, portable edition. Milne, a third-generation Scottish osteopath, begins by explaining the visionary approach to healing and how it may be applied to the realm of craniosacral work. He explains the importance of meditation, centering, and the cultivation of heartfulness in the development of compassionate practice. Milne introduces the reader to the story of visionary work, its genesis, evolution, philosophy, and practice, and explains how a grounding in meditation, sensitive touch, and intuitive perception can lead to a remarkable unfoldment in skill development.

*Mathematics (Education) in the Information Age* Stacy A. Costa, Marcel Danesi, Dragana Martinovic, 2020-12-10. This book brings together ideas from experts in cognitive science, mathematics, and mathematics education to discuss these issues and to present research on how mathematics and its learning and teaching are evolving in the Information Age. Given the ever-broadening trends in Artificial Intelligence and the processing of information, generally, the aim is to assess their implications for how math is evolving and how math should now be taught to a generation that has been reared in the Information Age. It will also look at the ever-spreading assumption that human intelligence may not be unique, an idea that dovetails with current philosophies of mind such as posthumanism and transhumanism. The role of technology in human evolution has become critical in the contemporary world. Therefore, a subgoal of this book is to illuminate how humans now use their sophisticated technologies to chart cognitive and social progress. Given the interdisciplinary nature of the chapters, this will be of interest to all kinds of readers, from mathematicians

themselves working increasingly with computer scientists to cognitive scientists who carry out research on mathematics cognition and teachers of mathematics in a classroom Mathematics & Science in the Real World ,2000 Recording for the Blind & Dyslexic, ...
