Foreign Direct Investment as a Tool for Poverty Reduction in Developing Countries

Ronald K.S. Wakyereza, 2019-10-15 The textbook experience of poverty can be witnessed in a number of developing countries in Sub Saharan Africa South East Asia and Latin America Accordingly Foreign Direct Investment FDI has been identified as an important tool for poverty reduction as it is noted to accelerate economic growth and employment in a nation and is currently an essential issue for countries such as Uganda This book finds that Ragnar's 1953 Vicious Circle of Poverty remains undisputed even today showing that attracting FDI is not the end but that a nation's absorption capacity is equally paramount The implications of the FDI frog leap theory for developing countries and the Community Capital Absorption Capacity Development CCACD framework provide plausible poverty reduction approaches in the 21st century Without such measures bringing an end to poverty is likely to elude governments and multinational corporations in developing countries

Democracy on Trial, All Rise!

Anuradha Kataria, 2011 There is a widening gap between democracy as a theory and its practice While supposedly a solution to the problems of the developing world in practice democracy has more often led to instability civil wars genocides fundamentalism crime and corruption In contrast in the West voting rights were extended gradually over a century or two in tandem with economic empowerment and also social awakening The democratic republics that evolved out of this long process were stable and progressive In the developing world a shortcut to the end and premature political opening up has

proven disastrous for many a nation like Nigeria Iraq Congo Kenya Pakistan South Africa etc Even in the few stable ones like India democracy has failed to make a dent in poverty alleviation and has instead got caught in divisive election stunts At the same time some unitary states like China have surged far ahead of others and broken out of the largely poor and deteriorating mould Why What are the reasons democracy does not work in the developing world Could it be made to work through improvements or is it the wrong model altogether The notion that democracy is going to transform our world holds little credence to anyone who has witnessed its true colors like the author has hailing from India and also having lived in China and some other countries Thus as a scientist and researcher she has studied the history politics and economics of some 150 countries across the world The book delves into the complex world of subversive election winning strategies secession movements coalition governments the meaning of freedom to people living amidst violence and poverty as well as a study of other sociopolitical systems Without any a priori theories willing to go where the evidence leads the author is able to point out the Emperor s new clothes for what they truly are It may be time to challenge our perfect theory as democracy may not be the answer to the developing world s problems The quest for truth leads us to surprising answers in terms of progressive transient alternatives for the developing world as well as some pointers for streamlining democracy the system per se Democracy on Trial is a compelling discovery of fresh answers and pragmatic solutions to the pressing problems of our times from large scale abject poverty in developing countries across Asia and Africa to many civil wars and ongoing mayhem in others One book that comes close to the perspective in Democracy on Trial All Rise is The Future of Freedom by Fareed Zakaria Zakaria s is the first book to acknowledge democracy s failure in the developing world but it leaves the important question what is the alternative largely unanswered and falls back on rationalizations to conclude Most of the current literature on democracy is primarily theoretical in nature and addresses some of its faults but democracy per se is eulogized The new title is different in that it answers the question of what is the alternative or a way forward based on an empirical analysis that carries the reader along to the conclusions The perspective is new as yet unexplored and marries the progressive with the pragmatic *Democratisation of Myanmar* Nehginpao Kipgen, 2021-09-30 On February 1 2021 Myanmar s military coup abruptly ended a decade of a civilian military hybrid regime a massive setback for the democratisation process Citizens from all walks of life took to the streets and protests erupted over the following weeks and Myanmar became the centre of global attention This book brings up to date how the story of Myanmar s experiment with democracy unravelled over the last few years This second edition Traces the political transition of Myanmar from a military rule of nearly five decades to a short lived democratic experiment Outlines the factors that contributed to this transition and the circumstances in which it took place Shows how political groups especially Aung San Suu Kyi s National League for Democracy NLD and the military worked together and paved the way for democratisation and what led to the failure of the NLD government Examines the 2020 general election and the declaration of national emergency following the NLD landslide

electoral win Bringing together a balance of primary ethnographic fieldwork and nuanced analysis this book will be of great interest to scholars and researchers of Asian and Southeast Asian Studies politics and political processes democratisation process and democratic transitions international relations and peace and conflict studies especially those concerned with Myanmar

Tax in Developing Countries Great Britain: Parliament: House of Commons: International Development Committee, 2012-08-23 This report highlights the importance of tax collection in developing countries and recommends that the UK's aid programme should increase its focus on supporting tax authorities This is equally valid for all forms of taxation including VAT personal income taxation and corporate taxation It is also essential that taxes are paid on a fair and equal basis by all New tax rules on developing countries the Controlled Foreign Companies CFC rules are designed to discourage UK owned corporations from using tax havens Traditionally these rules have applied to all UK owned corporations both those operating in the UK and those operating overseas Under the new rules however this will apply only to corporations operating in the UK making it easier for those operating in developing countries to use tax havens A number of NGOs have campaigned vigorously against the changes with ActionAid estimating that developing countries may lose up to 4 billion in tax revenues as a result The UK Government does not accept this estimate

but does not deny that there will be some cost to developing countries The Committee recommends that subject to the outcome of its own analysis the Government should consider reversing the change as a matter of urgency The Committee also received evidence which argued that the Government should require UK owned companies to report their financial information on a country by country basis rather than on an aggregate basis The Government is reluctant to act unless other EU countries do likewise but the Committee believes that it should act unilaterally **Human Rights in Developing**

The Politics of Education in Developing Countries Sam Hickey,Naomi Hossain,2019-02-21 Why have many developing countries that have succeeded in expanding access to education made such limited progress on improving learning outcomes There is a growing recognition that the learning crisis constitutes a significant dimension of global inequality and also that educational outcomes in developing countries are shaped by political as well as socio economic and other factors The Politics of Education in Developing Countries focuses on how politics shapes the capacity and commitment of elites to tackle the learning crisis in six developing countries Bangladesh Cambodia Ghana Rwanda South Africa and Uganda The problem of education quality is serious across the Global South The Politics of Education in Developing Countries From Schooling to Learning deploys a new conceptual framework the domains of power approach to show how the type of political settlement shapes the level of elite commitment and state capacity to improving

learning outcomes The domain of education is prone to being highly politicized as it offers an important source of both rents and legitimacy to political elites and can be central to paradigmatic elite ideas around nation building and modernity Of particular importance is the relative strength of coalitions pushing for access as against those focused on issues of higher quality education This book concludes with a discussion of entry points and strategies for thinking and working politically in relation to education quality reforms and critical commentaries **Elections in Hard Times** Thomas Edward Flores,Irfan Nooruddin,2016-09 Demonstrates why elections fail to promote democracy when countries lack democratic experience and are held during civil conflict **Hearings** United States.
