Hard Travellin The Story Of The Migrant Worker:

Hard Travellin' Kenneth Allsop, 1967 The Great Depression in United States History David K. Fremon, 2014-09 The Great Depression began when the never ending party of the Roaring Twenties came to a sudden halt On October 29 1929 which became known as Black Tuesday the stock market crashed starting a downward economic slide David K Fremon recounts the fascinating events leading to the crash of the New York Stock Exchange and tells of personal tales as a quarter of hard working people were without jobs banks failed businesses were wiped out and the Great Depression began This book is developed from THE GREAT DEPRESSION IN AMERICAN HISTORY to allow republication of the original text into ebook paperback and trade editions *Migration and Development* Ronald Skeldon, 2014-09-19 The first text that specifically links both international and internal migration with development at a global level The world is divided into a series of functionally integrated development zones which are identified not simply on the basis of their level of development but also through their spatial patterns and historical experience of migration Migration and Development stresses the importance of migration in discussing regional rather than simply country differences These variations in mobility are placed within the context of a global hierarchy although regional national and local cultural and social conditions are certainly not ignored in this wide ranging work **Pathologies of Travel** , 2016-08-22 The essays in this volume which range across Europe America and Africa and from the 18th to the 20th centuries argue that the experience of travel and the business of representing that experience involved an obligatory engagement with the disturbing perception that travel s pleasures were inseparable from its dangers and ennui Despite the confidence of some medical authorities in their recommendations of the therapeutic benefits to be derived from change of air as a way of restoring a state of health such opinions failed to establish a consensus either amongst those who followed such peripatetic prescriptions or amongst the medical professions in general Mad doctors and climatologists alike were forced to adopt an essentially partisan stance in arguing their case for such recommendations and were confronted by rival practitioners who could marshal counter case histories which demonstrated diametrically opposed conclusions concerning the advisability of travel To this extent the history of travel and its pathologies is a particularly revealing instance of the way medical thinking was dependent on localised studies which might do more to challenge the universal applicability of generally accepted theories than they did to confirm their diagnostic reliability The essays collected here not only contribute to our understanding of the conception and application of a variety of medical ideas showing how they depended on beliefs about climate and corporeal constitution as well as often inconsistent data or reports culled from travellers and geographically dispersed case histories but also open up illuminatingly complex perspectives on the uncertainties and dangers of the phenomenon of modern travel Nomads Under the Westway Christopher Griffin, 2008 Chris Griffin offers an account of the communities of Irish travellers Romani gypsies and other nomads who live and work beneath London s Westway **The Tramp in America** Tim Cresswell, 2004-06-01 The Tramp in America provides the first
