Constructing Intellectual Property Alexandra George,2012-03-12 What is intellectual property This book examines the way in which this important area of law is constructed by the legal system It argues that intellectual property is a body of rules created by the legal system that regulate the documented forms of abstract objects which are also defined into existence by the legal system Intellectual property law thus constructs its own objects of regulation and it does so through the application of a collection of core concepts By analyzing the metaphysical structure of intellectual property law and the concepts the legal system uses to construct intellectual property the book sheds new light on the nature of this
