The second practice of nineteenth-century tonality William Kinderman, Harald Krebs, 1996-01-01 In 1861 a half century before Arnold Schoenberg's break with tonality a young composer associated with Liszt saw a threshold to musical modernism as lodged in the suspension of the main key As the unified tonal perspective of earlier music yielded increasingly to dualistic key structures often laden with chromaticism the language of music was transformed In *The Second Practice of Nineteenth Century Tonality* nine prominent theorists and historians explore aspects of this musical evolution from Schubert to the end of the nineteenth century Many works discussed are masterpieces of the performance repertory ranging from Chopin's piano pieces and Wagner's music dramas to the symphonies of Bruckner The integration of analytical and historical approaches in the essays seeks to avoid narrow specialization as well as the polemic stance of some recent studies A critical assessment of issues including intertextuality narrative and dramatic symbolism enriches this investigation of what may be described as the second practice of nineteenth century tonality
