Excerpt from *Harmony Simplified A Simple and Systematic Exposition of the Principles of Harmony Designed Not Only to Cultivate a Thorough Knowledge of Chord Construction but Also to Practically Apply That Knowledge and to Develop the Perceptive Faculties* This little work offers no apology for its publication It aims at the following distinct objects I To treat the subjects of Scales Keys Signatures and Intervals so thoroughly that the pupil will be prepared to understand with ease the principles of chord construction II To present the subject of Chord Construction in such a manner that the pupil will be obliged to form all chords himself thus deriving a practical knowledge of the subject III To discard all arbitrary rules Instead of blindly struggling with a mass of contradictory rules the pupil is made acquainted with the original principles from which the rules are derived and his judgment cultivated to apply them with discretion IV The principles of the natural resolution of dissonances are shown instead of giving the rules for the resolution of chords of the seventh The pupil will apply these principles not only to chords of the seventh but to all fundamental dissonances V The chords of the Dominant Seventh the Diminished Seventh the Major and Minor Ninth and the Italian French and German Sixth are shown to be but different forms of the same chord with a perfectly uniform resolution thus enormously reducing the difficulty of understanding these harmonies and diminishing the complexity of the whole Harmonic System VI The system of Attendant Chords will be found very helpful in understanding those chords which though outside the key evidently are closely related to some of its triads
