Harnessing Technology The Management Of Technology For The Nontechnologist:

Harnessing Technology Stanley L. Robinson, 1991 *Harnessing Technology* is a vital new book that provides the information required for successful management of the technology function in today's industry *Socio-Tech Innovation* Latha Poonamallee, Joanne Scillitoe, Simy Joy, 2020-04-25 This book defines socio technological innovation and lays out different aspects of technology innovation and adoption literature as applied to socio tech innovation and entrepreneurship Socio tech innovation refers to novel solutions that involve development or adoption of technological innovations to address social and or environmental problems with a view towards creating benefit for the larger whole rather than just for the owners or investors Unlike conventional technological innovation socio tech innovation either develops a product specifically for underserved markets and adopts a model in which the market is not an afterthought but the raison d'être Social ventures have not been as successful in scaling up though technology innovation led ventures have therefore meaningful actionable insights that can help social ventures scale up successfully can be gleaned by this process This book offers researchers in innovation and entrepreneurship programs a unique and interdisciplinary approach to studying social innovation that is grounded in technology innovation This book features a series of socio tech venture cases that illustrate these dynamics and can be used in undergraduate and graduate courses *Technology of Empire* Daqing Yang, 2011-04-18 Nearly half a century ago the economic historian Harold Innis pointed out that the geographical limits of empires were determined by communications and that historically advances in the technologies of transport and communications have enabled empires to grow This power of communications was demonstrated when Japanese Emperor Hirohito's radio speech announcing Japan's surrender and the dissolution of its empire was broadcast simultaneously throughout not only the Japanese home islands but also all the territories under its control over the telecommunications system that had in part made that empire possible In the extension of the Japanese empire in the 1930s and 1940s technology geo strategy and institutions were closely intertwined in empire building The central argument of this study of the development of a communications network linking the far flung parts of the Japanese imperium is that modern telecommunications not only served to connect these territories but more important made it possible for the Japanese to envision an integrated empire in Asia Even as the imperial communications network served to foster integration and strengthened Japanese leadership and control its creation and operation exacerbated long standing tensions and created new conflicts within the government the military and society in general *APAIS 1991: Australian public affairs information service* , *The ICT Handbook for Primary Teachers* David Hall, 2010-01-04 Helps those involved in primary education whether in training teaching or leadership roles to develop the ICT knowledge understanding and skills required to enhance children's learning in the classroom *Information Technology and Collection Management for Library User Environments* Walker, Joseph, 2013-11-30 Times have changed and library institutions struggle to maintain relevancy in the Information Age With the inescapable presence of harnessing technologies

for information management and access the role of the library has increased in importance within academic institutions and public communities Information Technology and Collection Management for Library User Environments brings into focus the new responsibility libraries have in meeting patron needs specifically with the use of emerging technologies Highlighting the concepts of collection management library space planning and information technologies this book is a critical guide for library professionals para professionals as well as researchers who wish to meet the diverse needs of patrons in ever changing societies

Management Thomas A. Kochan, Richard Schmalensee, 2003 The MIT Sloan School of Management as conceived by the legendary General Motors chairman Alfred P Sloan was founded in 1952 to draw on the scientific and technical resources of MIT and approach the problems of management with the rigorous research practices for which MIT was famous Fifty years later the Sloan School gathered international leaders in business and management MIT faculty students and alumni to address again the basic principles that should guide business and management This book presents the papers prepared by student faculty teams speeches by business and world leaders and summaries of the discussions from this special convocation taken together they offer a guide to the future of management based on the hallmarks of MIT and Sloan creativity and innovation The topics considered coalesced around three main themes First and paramount is the necessity of building and maintaining trust by means of openness transparency and accountability this was addressed in speeches by Kofi Annan and Carly Fiorina and exemplified by the case study presented of Nike s efforts to rebuild the trust of customers The increasingly complex conditions of the modern global economy emerged as another recurring theme as the participants considered the effect of the growing spectrum of stakeholders on issues of corporate governance The third common theme was the inescapability of technological and scientific change from the Internet as a marketing tool to the organizational impact of information technology
